One thing about daily newspapers. they seem to know what interests people most when they're interested in buying them. Only 13% found television ads, and 5% radio ads, to have this same timeliness. And people like newspaper ads. 83% use them as shopping guides, and have found that newspaper ads are a reliable source of value at a good price. On the other hand, 56% felt television ads made extravagant claims that were hard to believe. Small wonder so many advertisers use daily newspapers. The way the odds are stacked, their newspaper ads may run just when you're in the market for their product. And it gives them a nice head start when what they advertise is something that interests you most.
