

When the children are hungry, what do you give them? Food.

When thirsty? Water.

Now use the same good common sense, and what would you give them when they are too thin? The best fat-forming food, of course. Somehow you think of Scott's Emulsion at once.

For a quarter of a century it has been making thin children, plump; weak children, strong; sick children, healthy.

INSECTS AS HOODOOS.

They Keep Settlers Away From Many Parts of the World.

Nothing could more strikingly illustrate the importance of small things than the large role which is now attributed to the mosquito in the etiology of some of the most serious and widespread diseases to which the human race is subject. It is truly said that what prevents the successful colonization of many tropical countries and what throws the greatest obstacle in the way of civilization of and good government in vast regions of central Africa is not climate, not distance from home and not unfriendliness on the part of the natives. The obstacle is malaria, and now we find that the prevalence of malaria, so far as man is concerned, depends on the mosquito, and that this pestilent little insect, in addition to irritating and annoying, is the means by which the poison of malaria is propagated and distributed.

For years back botanists have known the important part played by birds in the scattering of seed and of insects in the distribution of the pollen of plants, and it seems not unlikely that pathologists will have to recognize in a much larger degree than has till lately been done the large part taken by the subordinate forms of life by which we are surrounded—our cattle, our horses, our dogs and cats, our flies, our mosquitoes, and perhaps even our fleas—in distributing disease from man to man, and, as is stated in regard to the mosquito and malaria, in deciding whether the extension of our empire over great areas of the globe's surface shall be possible or not.—Hospital.

Punctuation.

What a great difference in the meaning of a sentence a misplaced comma can make! Take the following, for example:

"James, my husband is a very sick man."

"James, my husband, is a very sick man."

The following bit of perverse punctuation was perpetrated by an English compositor. What the author meant to say can be ascribed by a rearrangement of the punctuation marks:

"Caesar entered on his head; his helmet on his feet; armed sandals upon his brow; there was a cloud in his right hand; his faithful sword in his eye; an angry glare saying nothing, he sat down." —Pittsburg Chronicle-Telegraph.

The Spanish Oath.

In Austria a Christian witness is sworn before a crucifix between two lighted candles, and, holding up his right hand, says, "I swear by God, the Almighty and All Wise, that I will speak the pure and full truth, and nothing but the truth, in answer to anything I may be asked by the court."

Jewish witnesses, while using the same words, add to their solemnity by placing their hands on the page of a Bible on which is printed the third commandment.

A Belgian witness swears to be veracious in these words, "I will speak the truth, the whole truth, and nothing but the truth; so help me God and all the saints."

The Spanish oath is more elaborate. The witness, kneeling on his right knee, places his hand on the sacred book, and, being asked by the judge, "Will you swear to God and by those holy gospels to speak the truth to all you may be asked?" answers, "Yes, I swear." Thereupon the judge says, "Then, if thus you do God will reward you, and if not will require of you." In some parts of the country the ceremony is different. The witness forms a cross by placing the middle of his thumb on the middle of his forefinger, and, kissing his thumb—a practice which would probably be very familiar to some English witnesses—exclaims, "By this cross I swear!"—Law Notes.
