### ARIES (March 21-April 20)

There is a big decision in your life this week. What you do now will affect your future plans, so be careful.

### TAURUS (April 21-May 21)

You will be whisked off your feet and have all your fantasies fulfilled. Better wear a raincoat.

### GEMINI (May 22-June 21)

Your sign of the twins means that everything you do is two sided. Weigh your options carefully, and watch out for evil twins.

### CANCER (June 22-July 22)

Have you seen the movie Single White Female? Check your roommate's closet for skeletons, axes, and other suspicious objects.

### LEO (July 23-Aug 23)

Venus is entering your fifth moon in the house of Jupiter, which will cause your cosmic waves and kinships to fluctuate.

### VIRGO (August 24-September 23)

For someone who's sign is the virgin, you have been being very naughty. Step back, and think about what is happening in your life.

### LIBRA (September 24-October 23)

You will be struck with an uncanny urge to listen to the music from high school. This is scary enough, so beware of going to far and recreating clothing trends as well.

### SCORPIO (October 24-November 23)

Ouch! Are you really thinking about putting a metal ring THERE? Think carefully about your options before you decide.

### SAGITTARIUS (November 24-December 21)

As usual your sparkling personality and devastating good looks will win you friends and admirers. Revel in the lime-light. Listen to the Supremes and get into some table-top dancing.

### CAPRICORN (December 22-January 20)

Papers are due, exams are coming up, but nothing can faze you this week. You are laid back, as always, and things are just falling into place.

### AQUARIUS (January 21-February 19)

Stop stressing about that information you have been waiting for. There are envelopes bearing good news in your future.

### PISCES (February 20-March 20)

You will be propositioned by a cute Sagittarian. You should accept the offer, and make one of your own.
