

SEEK MINERALS ON BAFFIN ISLAND

Mobile home for an eight-man expedition to Baffin Island until October, the sleek "Coastal Queen," converted 112-foot wartime Fairmile sub-chaser is shown in Cleveland prior to leaving for the sub-Arctic. Commanded by Ross Toms of

Toronto and captained by Ernest Kean, of St. John's, Newfoundland, the Coastal Queen will be the mobile base for the group's exploration of vast mineral deposits rumored to be found on Baffin Island. The ship is equipped with a helicopter which the

expedition will use in its search for iron, gold, copper, nickel and oil. The expedition is backed by three U.S. firms, including Cleveland steel interests of Cyrus Eaton.

Claims Dew Line Showing 100 Per Cent Durability

By ELTON C. FAY
POINT BARROW, Alaska (AP)—The Distant Early Warning line, a 3,000-mile-long chain of radar stations guarding North America's northern rim, has been operating in test for months and already has shown "100 per cent" capability. Brig.-Gen. Stanley Wray, chief of the United States Air Force electronic defence system, made the evaluation Tuesday at a formal ceremony marking formal delivery of the Alaskan section of the line by the builders, Western Electric Co., to the government. In the first public demonstration for reporters, the DEW line station here picked up a U. S. bomber far out over the polar sea as it streaked toward the warning system at more than 600 miles an hour. After the demonstration, Wray disclosed that in what amounted to unplanned tests, stations along the line—most of them in northern Canada—have spotted unidentified aircraft which later proved to be friendly planes far off course or accidental visitors to the electronic search path. Wray also said a variety of

tests have been taking place during the last month of B-47 jet bombers seeking to penetrate the line at high, medium and low altitude from various approaches over the Arctic Ocean. NO RED PLANES YET At a press conference, Wray also gave these answers to questions. No Soviet planes "that we know of" have been picked up by DEW line stations so far. Present equipment is designed for detection of objects the size of bombers. It is "possible" that jet fighters could get through the line undetected but it is highly unlikely that such short-range aircraft were being used by an enemy at the vast range involved in a strike toward the U.S. The DEW line could pick up guided missiles at "reasonable" altitude, but with present equipment could not pick up ballistic missiles. Wray conceded that it is possible to jam any kind of radar "if enough jamming power were available, but such jamming itself would be a warning that an enemy was operating against the system."

Deplores Need in Canada Of Expensive Second Mortgages

By KEN METHERAL
Canadian Press Staff Writer
LONDON (CP)—Britain's wealthy building societies are casting longing looks at the rich Canadian market. One company has completed a survey of Canadian housing needs and others are planning similar projects before the end of the year. The societies, which in many ways are akin to public utilities, believe establishment of building societies in Canada on the British pattern would provide long-term capital funds for the purchase of new and second-hand

homes at relatively low interest rates. MEMBER SURPRISED George E. Rogerson, executive officer of the Co-operative Permanent Building Society, who returned to Britain recently after an eight-week tour of Ontario and the four western provinces, says he is "appalled" at the high interest rate many Canadians are paying on loans for home building. "We found many Canadians paying more than 20 per cent for second and third mortgages. In this country, building societies lend up to 80 per cent of the cost of a home at an interest rate of only six per cent."

Mining Jobs In Cape Breton

SYDNEY (CP)—H. C. M. Gordon vice-president of Dominion Coal Company said here Wednesday jobs are available in Cape Breton pits for miners left idle by layoffs in the Pictou and Springhill areas. Mr. Gordon said most Cape Breton pits were left without work Wednesday when the MacBean mine at Thorburn, N.S., went back to work with a reduced shift to help cut expenses. In Springhill, miners of No. 4 pit who stayed in the town after the explosion last November that claimed 39 lives, are in line for the same Cape Breton jobs. The number of miners without work in Springhill was not known because many unemployed miners left the town.

Loneliness Is Social Problem.

LONDON (AP)—A friendless woman died alone in a tiny London apartment, leaving a diary with the same entry for every day of the last year of her life. It said: "No one came." Tens of thousands of other Britons—men and women of all ages and from all walks of life—are experiencing that same hopeless, unwanted feeling. Loneliness has become a major social problem in this land of the welfare state. The plight of the lonely in cities and villages throughout Britain was related in a special report prepared by a committee of 14 women social workers from the National Council of Social Service, a privately-financed organization headed by Viscountess Falkland. The committee reported a "distressing and widespread" problem affecting up to 1,500,000 people who live by themselves. In one sense, national characteristics make the problem peculiar to this country. Traditional British reserve makes it almost impossible for many lonely persons to break out of their agonizing isolation. ALOOFNESS "The impersonality of town life is greatly intensified in this country by our passionate belief in trusting oneself to oneself," said the report. Britain is a country where, generally speaking, people don't like talking to strangers. And that complicates things for the lonely person who finally summons up enough courage to try to make a friend. The welfare workers urged the building of more social clubs and community centres to cater to lonely people. They also advised creation of a good neighbor service to help the shy and self-effacing find their way into contact with others.

ALBERTON

LAC and Mrs. Eric Sproule left Alberton on Monday for Mont Apica, Quebec, after spending a brief honeymoon in this vicinity.
Mr. and Mrs. Everett Williams and family of Summerside were Sunday guests of Mr. and Mrs. Arthur Wikie, Alberton.
The Misses Joanne and Beverly Irving of St. Stephen, N.B. are guests at the home of their uncle and aunt, Mr. and Mrs. Cecil Hutt, Alberton South.
On Monday Rev. and Mrs. J.M. Sproule, Alberton had as guests Mr. and Mrs. Edison Hardy and family of Dartmouth, N.S. formerly of York P.E.I.
Mrs. Joseph Gaudet, Alberton is spending a few days with friends in Miscouche and Summerside.
On Sunday Mr. and Mrs. Merritt E. Callaghan, Alberton, had as guests Mrs. Callaghans parents, Mr. and Mrs. Joseph Hughes of Emerald Hill, and Mrs. Harry Green of Bedouque and Mr. and Mrs. Keough of Winnipeg.
Harvey Murphy arrived last week from Toronto to spend some time at the home of his parents, Mr. and Mrs. Stephen Murphy, Alberton.
Eric Caldwell arrived from Dartmouth on Friday to join his wife who has been visiting her parents, Mr. and Mrs. Arthur Wikie, Alberton.
Mr. and Mrs. Caldwell are spending this week as guests of the formers' brother-in-law and sister, Mr. and Mrs. Douglas Woodside, Sea View.
Mr. and Mrs. Wendell Weeks, Alberton, motored to Moncton on Sunday. They were accompanied by the latter's mother, Mrs. James Murphy, and her brothers and sisters, Carmen, George, Doreen and Ruth Murphy of McNeill's Mills.
Mr. and Mrs. Bernard Sproule with their small daughters, Kathy and Susan, returned Tuesday to their home in Liverpool, N.S. after visiting the formers' parents Rev. and Mrs. J.M. Missile Drill Is Now Being Taught By Canadians

By DAVE McINTOSH
Canadian Press Staff Writer
OTTAWA (CP)—Some Canadian soldiers have become so skilled at the intricacies of guided missiles that they now are instructing on the weapons in the United States and Britain. Army headquarters disclosed Tuesday that since 1952 a total of 72 officers and 150 men of the artillery, ordnance corps, army service corps and electrical and mechanical engineers have received special training on ground-to-air and surface-to-surface guided missiles or rockets at various U.S. Army schools. At the same time, the navy disclosed that 10 officers have received or are receiving advanced training on guided weapons in the U.S. and Britain. The RCAF, however, refused to say how many airmen have been trained on missiles. An air force spokesman said the information could not be made public because the RCAF "has not adopted any missiles." In fact, however, the defence department has on order U.S. Navy Sparrow air-to-air missiles for use in the CF-100 jet interceptor or the supersonic CF-105, still in the development stage. ASKED FOR COMMENT Asked for comment on the RCAF's refusal to disclose the information, Defence Minister Peckers said through a spokesman that he did not wish to discuss the matter at this time. The army said its policy is to keep abreast of all developments in the field of guided missiles and rockets and to have a core of trained specialists and instructors "ready for the day when the Canadian Army procures specific weapons."

Ex-C. N. R. Police Inspector Had Strange Jobs

MONTREAL (CP)—Alexander Stewart, who has just retired as a Canadian National Railway police inspector, met royalty, prime ministers and one madman during his 37 years with the force. "During my service I must have travelled several thousands of miles, many of them escorting members of the Royal Family," he said in his home in nearby St. Lambert. Once he was held at gun point for over an hour by a madman. "I was investigating some cable-breaking near St. Hubert, Que., when I saw a man crossing the railway track with a gun," said Mr. Stewart. "I went after him but he refused to listen and held me at gun point. "He finally ran away." The man was caught the next day and certified insane. Mr. Stewart has a picture signed by the Queen and Prince Philip. It is for his service to them on their Canadian tour when the Queen was still Princess Elizabeth. Mr. Stewart also escorted the late King George VI and Queen Mother Elizabeth when they made their Canadian tour before the Second World War. He has been security officer to Sir Winston Churchill, the late Franklin D. Roosevelt, Dwight D. Eisenhower and Queen Juliana of the Netherlands. When Mr. Stewart joined the CNR police in 1920 it had 120 members. Today it has 700.

LOST

JENKINS BROS. LTD. Summerside.

MILES OF TWINE

Mr. A.C. Green of Albany is seen holding a king-sized ball of binding twine weighing more than 30 pounds. The twine which was collected over a number of years was used to bind bundles of Guardians delivered to the Albany Post office. Mr. Green, the village postmaster began saving the twine as a hobby and has deduced that the bundle, if rolled out, would stretch from Tignish to Souris.

PERMIT POLISH SERVICE

For the first time since the 1944 Polish uprising against the Nazis, the Polish Communist authorities permitted the people to hold public memorial services. Here Gen. Duszynski (right), reads service at Warsaw's tomb of the unknown soldier. Thousands of Poles in the former resistance army stand side by side with men in the present Polish army to pay homage to countrymen who fell in World War II. Two perpetual torch-like flames illuminate the scene.

Paving Project Outside S' side

The highway from Summerside town limits on Central Street to St. Eleanors via Sherbrooke is to be paved, it was announced yesterday by Hon. E. P. Foley, minister without portfolio, and member of the Legislative Assembly for the Fifth District of Prince County. The distance to be paved is about two miles, and work will be done by Curran and Briggs Ltd. When this work is done it will provide an alternative all weather entrance to Summerside from the west.

Gives Pointers On How To Ride Shark Bareback

By HAL BOYLE
NEW YORK (AP)—Most swimmers who encounter a shark merely worry how to escape him. A few brave souls, however, have a wild desire to ride him bareback. In both cases John Tassos, a New York advertising executive and authority on skin diving, has the answer. He is the author of "The Underwater World, a guide for sportsmen who want to spear fish, explore wrecks or merely pick up shells from the floor of the sea. How can a swimmer escape if he encounters a shark or barracuda near shore? "The chances are, if you meet one of these big fish near shore, he is well fed and merely curious at seeing you," said Tassos. "The main thing to do is to avoid irritating him. How do you keep him calm? By staying calm yourself. The simplest thing to do is to keep your eyes on him, and swim toward shore, slowly and easily. "Remember he is in his home and you are the stranger and intruder in his house. KEEP COOL "Above all, don't panic. If you thrash the water violently trying to get away, you may excite him and cause him to attack. "If a barracuda insists on coming too close, you can turn and swim toward him and he'll go away—999,999 times out of a million. "If a shark comes too close, put your head under water and yell as loud as you can. 'Go away, you bum! Get lost. He can't hear you, but he can feel the vibrations. If he still comes on, hit him on the nose, which is very sensitive because his brain is right behind it. Usually, then, he'll leave. If he comes back, hit him on the nose again. "But don't panic and start floundering toward shore. The shark and barracuda are among the swiftest fish in the sea. You can't out-swim them—you have to outthink them." However, it is possible to ride a shark bareback and come home alive. Tassos is one of a number of veteran skin divers who enjoy this hobby, now popular in the Bahamas. "It is a far-fetched sport," he

School Opening May Spread Flu

WASHINGTON (AP)—A public health service official said Wednesday there is a possibility the reopening of schools next month might bring on an epidemic of Asiatic flu in the United States. Dr. Carl Dauer added that since this is no certainty, "I don't think we would be justified in not reopening the school."

The Guardian Page 15 Thurs. August 15, 1957

atives of 13 national professional and voluntary health organizations summoned here by the health service to discuss plans for dealing with any outbreak. The disease thus far has occurred only in scattered areas of the U.S., affecting some 13,000 persons. Later, testifying before the Senate appropriations committee, Burney said "even a mild form of the illness could paralyze entire cities during the time an epidemic strikes."

NEW RAF MISSILES UNIT

LONDON (Reuters)—The RAF has formed its first guided missile unit at Valley Airfield in Anglesey, Wales, it was announced Wednesday. The squadron, already fully operational, is training pilots in the use of Fairey Fireflash air-to-air guided missiles.

From One Cook to Another

by Mary Blake
Carnation Home Service Director
OLD-FASHIONED FAVORITES
Men seem to have a nostalgic feeling about the meals our grandmothers used to serve. Well, I've been working on old-time recipes lately. And I've developed very practical versions of several of our grandmothers' recipes. One of these is Chicken Fricassee. The time-saver I use is chicken breasts. The "precision" ingredient is Carnation Evaporated Milk. There's no danger of lumps in the sauce, when you use fresh-tasting Carnation with its special blending qualities that give smoothness and flavor not possible with any other form of milk.

CHICKEN BREASTS FRICASSEE

(Makes 4 servings)
2 large or 4 small chicken breasts, cooked (see below)
1 large can undiluted CARNATION EVAPORATED MILK
5 tbsp. butter
5 tbsp. flour
Salt, pepper
TO COOK THE CHICKEN: Cover chicken breasts with boiling water. Add a small peeled onion, a stick of celery, a carrot, pepper to taste. Cover and simmer gently 45 to 60 minutes, until tender. Have stock FOR THE SAUCE: Mix 1/2 cup milk and 1/2 cup flour to make a cups liquid. Stir butter and flour in saucepan over low heat until smooth. Pour in Carnation and thicken. Season. Add chicken breasts, re-heat and sprinkle with parsley.
sprinkling of dried savory, salt and pepper to taste. Cover and simmer gently 45 to 60 minutes, until tender. Have stock FOR THE SAUCE: Mix 1/2 cup milk and 1/2 cup flour to make a cups liquid. Stir butter and flour in saucepan over low heat until smooth. Pour in Carnation and thicken. Season. Add chicken breasts, re-heat and sprinkle with parsley.

IF THERE'S ONE THING my family likes better than a piece of light, fresh cake — it's cake covered with old-fashioned Maple Cream Frosting! But Maple Cream Frosting used to be unpredictable. That's why I'm so delighted with this failure-proof Carnation version.

"CAN'T-FAIL" MAPLE CREAM FROSTING
(Enough to fill and frost 8-inch layer cake)
1 1/2 cups firmly packed brown sugar
1/2 cup butter
1/2 cup undiluted CARNATION EVAPORATED MILK
Pinch of salt
1 teaspoon vanilla
2 1/2 cups (about) sifted icing sugar
Stir together sugar and butter in saucepan over low heat until mixture boils. Stir in Carnation carefully. Continue to cook and stir until mixture again boils; cook 4 minutes; then cool. Add salt and vanilla; then add enough milk to make consistency spreading consistency. Beat only enough to blend smoothly. Spread quickly on cooled cake.

THERE'S A DELIGHTFULLY DIGNI-FIED sound to the name "Carnation Pudding".

Carnation gives it an appealing golden color and rich, "fresh-cream" flavor. Yet this pudding calls for no butter and only two eggs.
CARNATION PUDDING
Butter a small heat-proof bowl. In it, alternating in small amounts, put 1/4 cup fruit (raisins, candied cherries, citron) and 2 cups diced leftover light cake. Beat 2 eggs slightly with 3 tablespoons sugar and 1/2 teaspoon salt. Mix and add 1/4 cups undiluted CARNATION EVAPORATED MILK and 1/4 cup water, then add 1/4 teaspoon vanilla. Pour over cake. Let stand 1/2 hour. Cover with foil. Steam pudding 1 1/2 hours. Or set bowl in pan of hot water and bake in rather slow oven (325°F.) for 1 hour, until set. Serve with a foamy pudding sauce. (Makes 5 servings.)

FREE! New "Punch 'n Protect" Can Opener
The most practical of can openers! Press it down firmly on top of a Carnation Milk can. It punches 2 holes for easy pouring — then serves as cover for the open can. No labels or colors required. Just write "can opener" on a postcard or slip of paper. Mail to Mary Blake, Dept. CN, Carnation Company Limited, Toronto. Include your name and address.

In Hot Weather
THIS FAST-ACTING YEAST KEEPS WITHOUT REFRIGERATION!
Thousands of Maritime women have found the perfect answer to yeast problems in hot weather. It's the new Fleischmann's Active Dry Yeast! This modern form of famous Fleischmann's Yeast keeps full-strength and fast-acting in your cupboard! No refrigeration! If you bake at home—get a month's supply of Fleischmann's Active Dry Yeast. Always on hand for speedy baking and grand results.
