On the question of fusing history and geography... The student studies the vote was 1,854 in favor and 534 against...

Do you think that the use of marks on report cards, implying as it does some element of competition, is harmful to the student? Yes, 192; No, 2,333. Do you think that sufficient attention is being given to the naturally gifted child? Yes, 498; No, 1,975.

Of this partial list of questions and answers worthy of particular attention is the majority opinion that gifted children are neglected, that pupils of university calibre should be separated from others, and that competition in school is not harmful.

While the report states that they could not be accepted as a basis for action without further careful investigation... "Obviously where teacher opinion is so drastically opposed to the opinion of many generally accepted experts, real research into the matter is required."

Farming is generally believed to be the healthiest of all occupations. This is probably true, although there are no statistics to prove it, as far as we know.

The report states that in 1955—the latest year for which figures are available—there were 14,200 "occupational" deaths. Of this number, 3,700, about 26 per cent, occurred in farm accidents.

All in all, the task of reconciling different viewpoints is a formidable one indeed.

Pooling Abilities... President Eisenhower's invitation to Adlai Stevenson, his rival for the Presidency in 1952 and 1956, to consult with him on American policy to next month's meeting of the NATO council...

EDITORIAL NOTES... Commenting on President Eisenhower's speech in Oklahoma City, the executive secretary of the National Education Association said that what most schools and colleges need is "not a crash program but a long program" to meet educational needs in science and other fields.

Teachers' Opinions... A survey of teacher opinion, reported by the Ontario Teachers' Federation, shows widely different opinions to those generally accepted by many leaders in education.

Former President Truman was a busy man during his seven years in the White House. Already 3-1/2 million documents, public speeches and official letters have been placed in the Truman Memorial Library in Independence, Mo.

Drug Allergies Present Problem

By Herman N. Rudenstein, M.D. FREQUENTLY, a physician is asked to determine the value of skin tests in determining certain allergies.

In the case of airborne pollen, molds and even in some instances of food allergy, these skin tests work very well.

Drug allergy, however, is something new again. Skin tests have relatively little value in diagnosis of allergic reactions to drugs.

How, then, can you and your physician determine whether you are allergic to any specific drugs? EVEN A SUSPICION Well, either of you or your doctor has good reasons to suspect you are allergic to a certain drug.

QUESTION AND ANSWER H.C.: I have been scratched all my life, and have been wearing glasses since five. I am now 48 and, although the glasses help me see better, they have not improved my eyesight.

There will be hockey and skating for the youngsters of Summerside this season, it was learned yesterday, as plans are now being finalized for the erection of an open air rink with an ice surface the same as the Charlotte Town Forum.

Rev. Don McIvor, Liberal, Fort William: "I have often felt that there is one word in (Parliamentary) opening prayer that might be changed for the better."

Mr. Arnold Peters, C. C. F., Kirkland Lake: "I should like to leave the thought with the government that some consideration be given to setting aside November 11 as a national holiday."

Mr. Little John Diet: "Mr. Speaker, I am discussing political pie. It is in his thumb."
