YOUTH TRAINING SHORT COURSES

VOCATIONAL SCHOOL, CHARLOTTETOWN

The following short courses are offered and may be held if a sufficient number of applications are received.

1. **HOMEMAKING**—A six-week course beginning January 16, 1956 and open to any woman 16 years of age or older. The course will include: cooking and nutrition, sewing, handicrafts, home nursing and other topics of interest to the group.

2. **EGG GRADING**—A three-week course, beginning in February, and designed to train young men and women in the operation and management of Egg Grading Stations. This course is conducted at Birch Court and the instruction is given by members of the staff of the Federal Department of Agriculture.

3. **AGRICULTURE**—A four-week course beginning early in February and designed not only to provide knowledge and skills but also to develop in the student a sense of the dignity and importance of Agriculture as a calling. This course includes instruction in Animal Health, Animal Husbandry and Field Crops. The course is conducted at Birch Court and instruction is given by members of the staffs of the Federal and Provincial Departments of Agriculture.

4. **FARM MECHANICS**—A six-week course, conducted at the Vocational School, beginning early in February and designed to give practical instruction in the various forms of farm mechanics and engineering. The course includes: car repair, tractor repair, farm machinery, farm building design and mathematics as applied to Agriculture.

Financial assistance is available for those from rural areas, who satisfactorily complete any one of the above four courses, providing they must live away from home while receiving instruction.

Those interested in taking any of these courses should communicate at once with the Principal of the Vocational School, Charlottetown.

The famous statue of Peter Pan in Kensington Gardens, London, England, was set up overnight 40 years ago as a surprise for the children.

To Take Part In Seal Hunt

ST. JOHN'S, Nfld. (CP)—The Newfoundland sealers' Algerian and Terra Nova will join the Halifax vessel Arctic Prowler in the seal hunt this spring. James Grieve, director of shipping for the commercial house of Bowring Brothers, Limited, said Thursday the vessel would again participate in the yearly hunt off the Labrador coast and Gulf of St. Lawrence. The Arctic Prowler will recruit a Newfoundland crew. The three ships are the only ones known so far to be going to the seal floes.

Consumers Try To Hoard Steel

CLEVELAND (AP)—More and more consumers are trying to stockpile steel, expecting continued shortages and price increases, "Steel" magazine says. The metalworking weekly says 30 per cent of the American manufacturers would survey said they hope to fatten steel inventories. Steel producers are booked up for as far ahead as they will accept orders, the magazine says, with current production representing orders booked 30 days or more ago.

"Steel" says plates are critically short. Structural shapes, sheets and bars are also in short supply. Heavy requirements for construction, pipelines, and freight cars are increasing. The magazine's price composite on finished steel held at \$127.68 a net ton for the week ended Jan. 4 despite scattered price increases in the industry. Scrap prices continued to rise, with "Steel's" composite at \$22.17 a gross ton, a 34-cent increase over the preceding week.

"Steel" says production for the week ended Saturday was at 97 per cent of the new weekly capacity of 2,461,893 net tons.

Expect Minor Reductions In Schedule Of Tariffs

OTTAWA (CP)—Minor reductions in Canadian tariffs likely will result from the new round of world tariff negotiations opening to Geneva Jan. 18.

But on the whole, Canadian officials expect to give little and get little from the bargaining—the fourth major round of post-war negotiations under the 35-country General Agreement on Tariffs and Trade.

The reason is that the United States, the main negotiator, is limited by U. S. law to bargain for reductions of only five per cent of existing American rates in each of the next three years.

If the existing rate on an imported product is, say, 20 per cent, it can negotiate a reduction only of one percentage point.

That, say Canadian officials, leaves little room for bargaining. And reductions of five per cent of existing rates may not have much impact on boosting export trade.

BETTER THAN NONE

But they feel that any reductions however minor, are better than none. The Canadian concessions granted will, of course, be no greater in value than those obtained, so Canadian reductions will also be minor.

Canada's main negotiations will be with the U. S. All countries which have signified willingness to participate in the new round of bargaining, there will be about 24 of the 35 GATT member countries—have exchanged lists of items on which they would like to negotiate.

These lists are confidential, though it is known that Canada's main interest is in getting reductions on American tariffs on some farm items and metals.

HISTORIC ROOMS

Christ's College at Cambridge preserves the rooms once occupied by its founders, Lady Beaufort, mother of Henry VII.

LAWBREAKERS PRAY

KALAMAZOO, Mich. (AP)—Judge Clark M. Olmstead had 35 traffic law violators brought before him Tuesday night, bow their heads in prayer in thanks, that their violations hadn't caused death to themselves or others. The judge also had them say a prayer in memory of more than 600 persons killed in traffic accidents throughout the United States during the Christmas weekend.

Two Cylinders Started It Ford's Fabulous Enterprise Made Many Millionaires

DETROIT (AP)—Enshrined in the Henry Ford Museum at nearby Greenfield Village, is a small motorized buggy with a two-cylinder engine, chain transmission, bicycle wheels and tiller steering.

It is the first automobile the elder Henry Ford designed and built in 1892-93. From it stemmed some 33,000,000 subsequent Ford cars and the golden stream of profits that made the Ford Motor Company perhaps the most fabulous of American industrial enterprises.

How many millionaires were made by the meteoric development of the company is anybody's guess. Counting original stockholders, members of the Ford family and those who inherited the wealth amassed by their parents and grandparents, the total probably would exceed three-score.

And others are in the making. They are the high executives of the Ford Motor Co. who were given the privilege of buying some stock in the company when they joined it in the reorganization the younger Henry Ford started in 1946.

The story of the Ford Motor Company has many of the ingredients of a fairy tale. It starts with a \$28,000 fund raised by a dozen persons in 1903. Included in this was a \$100 investment by the late V. Couzens, sister of the late United States senator James Couzens, which later netted her \$335,000.

Couzens himself sold his holdings in 1919 for something in excess of \$29,000,000. His initial investment was \$1,000 in cash and a note for \$1,500 to cover purchase of 25 shares. The other shareholders got about \$50,000,000 for their holdings.

When Ford proposed to turn profits back into the business for expansion, some stockholders dissented. Two of them, the late John F. and Horace E. Dodge, went to court and forced a partial distribution.

Ford retaliated by threatening to withdraw from the company and start a new one if the minority stockholders refused to sell out to him. In 1919 the company became a family-owned affair, Ford

and his son, Edsel, taking over the minority holdings.

The company's net income that year was \$69,924,410.52, according to figures in the Ford archives. DOMINATED BY FORD

From 1919 through most of 1945 the company not only family-owned; it was dominated by the elder Ford. When he resigned as president Ford was 82. It was said his resignation was forced by members of his family who threatened to sell their stock if he insisted upon retaining his one-man rule.

Ford wanted no partners outside his family. He resigned his grandson, Henry Ford II, was named president. The elder Ford died in April, 1947.

Meanwhile the younger Ford had started his vast reorganization program. Indications of its success were shown in the recent announcement that by the end of 1957 the company will have spent or committed more than \$3,750,000,000 since 1946 on new manufacturing facilities—all coming from earnings, depreciation accruals and more efficient turnover of working capital.

market absorption and not to a deterioration of British competitive strength. A slight decline in coal production due to the manpower shortage had to be made good by larger imports, but iron and steel output rose satisfactorily. In consumer goods industries, employment declined, and there was a similar contraction in housebuilding.

On the other hand, all metal-using industries surged ahead and closed the year again with full order books. With labor shortages becoming more acute in these trades, mechanization and automation account for a growing proportion of industrial plant expenditure. Investment in new production capacity is becoming more selective.

BOOM IN SECURITIES

The stock exchange boom in industrial shares reached its climax about the middle of the year, even though the impact of higher interest rates were felt by fixed-interest securities in April.

Credit curbs caused temporary inconvenience to the discount market, small business firms, and indirectly to credit institutions such as the building societies which were forced to raise their mortgage rates to 5 1/2 per cent.

By November, however, the financial markets had settled down to the "dearer money" policy. Early in December the ordinary share index was still three per cent higher than at the beginning of the year, though 12 per cent below the mid-year peak.

Fixed-interest government securities were 12 per cent down, with gold mining shares down 20 per cent. Oil and base metal values showed substantial gains during the year. Among equities, shipbuilding and television shares were the only substantial advances. Chemicals, electrical and other engineering shares retained some of the gains of the first-half of 1955, while textile, stores, tobacco and food shares all were lower.

In the final quarter of 1955, a slight but distinct improvement occurred in all economic fields.

Mechanical Clam Digger Said Efficient Machine

OTTAWA (CP)—Automation has come to the clam flats of the Maritime provinces in the form of a mechanized clam digger.

Dr. J. L. Hart, chief of the St. Andrews N. B. fisheries experimental station, told the story of the machine to fellow scientists Thursday at the annual meeting of the fisheries research board.

He said the mechanized digger, an experimental model built for the station, gave encouraging results. Although it was built to eliminate destruction of young clams which occurs in hand-dugging operations, the machine might eventually eliminate the back-breaking work of the clam-digger.

The mechanical digger is a scoop equipped with water jets in front. It is pushed through the sand by a shallow-draft boat and clams loosened from the bottom by its jets enter the scoop and are carried up to the boat by an endless belt conveyor.

IMPROVE EFFICIENCY

In experiments at Clam Harbor, N. S., Dr. Hart reported the machine harvested clams to a depth of 14 inches from 1,200 square feet of bottom in an hour. It was 90 per cent efficient in harvesting small clams and 50 per cent efficient in taking larger clams. Scientists now are modifying the

design to improve its efficiency in taking larger clams. Dr. H. B. Hachey of the fisheries research board, an oceanographer, said a general upward trend in water temperatures in the north Atlantic since 1940 has brought a big extension in the cod fishery in Greenland waters. At the same time, it has brought a scarcity of cod fish on various fishing banks off the Nova Scotia coast and a northward expansion of some species of marine life.

The meeting was given a report on an extensive survey of haddock populations made by the staff of the Newfoundland fisheries research station at St. John's. The report said that as a result of new information obtained in the survey off the Grand Banks and the St. Pierre bank, fishing skippers will be better informed in future about when to fish and where to cast their nets.

BUTTER STOCKS RISE

OTTAWA (CP)—Creamery butter stocks rose at Dec. 1 to 114,073,000 pounds from 103,027,000 in the corresponding period last year, the bureau of statistics reported Monday. Creamery butter production increased 10 per cent during November to 15,631,000 pounds from 14,200,000 last year and in the first 11 months of the year to 303,829,000 pounds from 299,882,000.

CIDER GUIDER

BRANTFORD, Ont. (CP)—E. H. Garrard, bacteriological expert of Ontario Agricultural College, has suggestions for making apple cider. For a tart, acid taste he recommends Red Astrachan, Duchesne, Yellow Transparent and Alexander varieties. For a milder flavor, Wealthy, Baldwin, Jonathan, King and Northern Spy.

PROPOSES CAR LAW

TORONTO (CP)—Provincial Secretary Nickle Wednesday suggested that Ontario should refuse to license automobiles unless they met certain standards of safety. Mr. Nickle is the second Ontario cabinet minister within two days to suggest that some form of control over the automobile-manufacturing industry is necessary to cut traffic deaths.

Schurman's School Parade ANNOUNCES

The following contestants have been selected by our Judges to compete in the Semi-Finals to be held at the Summerside High School on the following dates and times.

FOUR AND OVER CLASS ROOM SCHOOLS WEDNESDAY, JANUARY 11th AT 4:30 P.M.
FOUR AND OVER CLASSROOM SCHOOLS FRIDAY, JANUARY 13th AT 4:30 P.M.

1 TO 3 CLASSROOM DIVISION 4 AND OVER CLASSROOM DIVISION
