LET'S TALK IT OVER by "d". Of all the problems which modern civilization has faced unemployment is one of the most difficult ones. It is the one with which one of our most humiliating failures has been associated. It first reared its ugly head after the industrial revolution in England, and in the years that have passed since then no statesman or group of statesmen have been able to cope with it. "A chicken in every pot" and "a car in every garage" have been but empty catch-words for election propaganda. Statisticians sometimes give us figures to show that the number of unemployed in a certain country at a certain time has dropped 30 or 40 or 50%. They are generally complacent about it as if these figures showed that we had at last conquered the unemployment problem. But even the reduced figures are appalling when you sit down and think about it. We talk a great deal of the "four freedoms", first mentioned in connection with the drawing up of the Atlantic Charter. "Freedom from fear" is perhaps the one most often quoted. But how can a man have freedom from fear if he is unemployed, and at the mercy of charitable or government institutions for his very means of subsistence? One of the greatest fears a man can have is the fear that tomorrow his children may go hungry. Granted that there are people in the world to whom work is something to avoid at all costs. But after you have subtracted these ne'er-do-wells from the unemployed, there are still in normal times an appalling number of men who are willing and anxious to work but cannot find anything to do. A lot of them are, perhaps, not filled with that drive and initiative which conquers all obstacles, but they are still honest, industrious citizens who are being robbed of their birthright because no one has found an answer to this monumental problem. If the world does not owe us a living, surely it owes us an opportunity to make one for ourselves. One solution appears in time of war, or of preparation for war. Then our unemployed become an asset to the country. Many of them find the way into our armed services, and help to defend our liberties, at least one of which some of them have rarely enjoyed. It should not take war, or the threat of war, to put "a chicken in every pot." When the statesman who can solve this problem appears, he will be elected without kissing a single baby, or even driving electors to the polls.

"First they slaughtered each other and then they went after us and the same vocabulary was good for both exercises which was a convenience. "Our friends were out of sorts, out of patience and, need I add, out of office." Senator Estes Kafauer of Tennessee, the most militant campaigner for nomination and the most successful from the standpoint of pledged delegates, caused a furor when he appeared late on the convention floor and his followers interrupted the speech-making to cheer him. This convention is unlike that of the Republicans at which the leading contenders never appeared in the convention hall. Kafauer and other openly-avowed candidates such as Senator Richard Russell of Georgia, Senator Bob Kerr of Oklahoma, Vice-President Alben Barkley and W. Averell Harriman have been moving about freely in all fields of convention activities. Barring a Stevenson surrender to public demand it would seem the race is between Barkley, Harriman and Kafauer and many ballots may be necessary when voting comes, probably late Wednesday or early Thursday.

RETIREES FROM RCAF.—Flying Officer Alwynne Vimpy Handy of St. Stephen, N.B., yesterday bid goodbye to his fellow officers and Royal Canadian Air Force comrades on retiring to civilian life and the supplementary reserve of the R.C.A.F. In the past ten years he has completed two engagements with the R.C.A.F., the first as a wartime air gunner, the second as a radio officer in the R.C.A.F. regular force. During World War II, Flying Officer Handy served overseas as wireless air gunner with the R.C.A.F. coastal command. After the war, he served on transport squadrons and 13 Photo Squadron. During this latter tour he served both in the Arctic and the North West Territories where he achieved no mean reputation as a radio officer, huntsman and fisherman. The popular young officer has decided to enter the automobile garage and repair business in St. Stephens, N.B. Knowing his mechanical skill and the high reputation he has achieved in the Air Force, his fellow officers feel sure that he will be a valued addition to the community. S.

DISTINGUISHED.—Continued from page 1. Rogers, Mr. Rogers began his painting during the First World War, while overseas. While in a convalescent camp at Epsom he was invited by an artist in the next cot to accompany him on a sketching trip. Misadventure in Aberdeen. After watching the other man at work he began to experiment himself and found that he enjoyed it and that his pictures showed promise. On one of his sketching expeditions in 1918 he found himself in Aberdeen painting a scene which included a lighthouse, and was deeply engrossed in his work until stopped by a policeman. He tells of being taken to the police station where his credentials were checked by a telegram to London, and then being given a pass to sketch in other areas. He later learned that between his easel and the lighthouse had been a well camouflaged anti-aircraft battery. Throughout his career Mr. Rogers has worked in all mediums, at one time even working in water colours from a thumb-nail box while flying in a glider. In addition to portraiture and landscapes he has done considerable illustrating and painting of magazine covers. When at home in Vermont Mr. Rogers teaches a class of painter under a program by the Department of Adult Education. Mrs. Rogers is well-known in her own right as one of America's few accomplished authorities on dance notation. A few years ago, when a theatrical company in New York wished to have the choreography of a musical success being played in England, Mrs. Rogers was sent over to write down all the movements being used in order that they might be duplicated in New York. Mr. and Mrs. Rogers and their two children are extremely happy in their visit to the Island and hope to find a suitable summer home where they can come every year.

LESS ACREAGE.—Contracted acreage of peas for production in Canada in 1952 is estimated at 44,780, down 750 acres from last year.

LET'S TALK IT OVER by "d". Of all the problems which modern civilization has faced unemployment is one of the most difficult ones. It is the one with which one of our most humiliating failures has been associated. It first reared its ugly head after the industrial revolution in England, and in the years that have passed since then no statesman or group of statesmen have been able to cope with it. "A chicken in every pot" and "a car in every garage" have been but empty catch-words for election propaganda. Statisticians sometimes give us figures to show that the number of unemployed in a certain country at a certain time has dropped 30 or 40 or 50%. They are generally complacent about it as if these figures showed that we had at last conquered the unemployment problem. But even the reduced figures are appalling when you sit down and think about it. We talk a great deal of the "four freedoms", first mentioned in connection with the drawing up of the Atlantic Charter. "Freedom from fear" is perhaps the one most often quoted. But how can a man have freedom from fear if he is unemployed, and at the mercy of charitable or government institutions for his very means of subsistence? One of the greatest fears a man can have is the fear that tomorrow his children may go hungry. Granted that there are people in the world to whom work is something to avoid at all costs. But after you have subtracted these ne'er-do-wells from the unemployed, there are still in normal times an appalling number of men who are willing and anxious to work but cannot find anything to do. A lot of them are, perhaps, not filled with that drive and initiative which conquers all obstacles, but they are still honest, industrious citizens who are being robbed of their birthright because no one has found an answer to this monumental problem. If the world does not owe us a living, surely it owes us an opportunity to make one for ourselves. One solution appears in time of war, or of preparation for war. Then our unemployed become an asset to the country. Many of them find the way into our armed services, and help to defend our liberties, at least one of which some of them have rarely enjoyed. It should not take war, or the threat of war, to put "a chicken in every pot." When the statesman who can solve this problem appears, he will be elected without kissing a single baby, or even driving electors to the polls.

GOVERNOR OF.—Continued from page 1. administration to guarantee by federal action the fair treatment of Negroes and the determination of southerners that the Negro problem is one for the states alone. Appeals For Harmony. Governor Stevenson appealed for avoidance of strife within the party and recalled the bitterness of the fight two weeks ago during the Republican convention. "First they slaughtered each other and then they went after us and the same vocabulary was good for both exercises which was a convenience. "Our friends were out of sorts, out of patience and, need I add, out of office." Senator Estes Kafauer of Tennessee, the most militant campaigner for nomination and the most successful from the standpoint of pledged delegates, caused a furor when he appeared late on the convention floor and his followers interrupted the speech-making to cheer him. This convention is unlike that of the Republicans at which the leading contenders never appeared in the convention hall. Kafauer and other openly-avowed candidates such as Senator Richard Russell of Georgia, Senator Bob Kerr of Oklahoma, Vice-President Alben Barkley and W. Averell Harriman have been moving about freely in all fields of convention activities. Barring a Stevenson surrender to public demand it would seem the race is between Barkley, Harriman and Kafauer and many ballots may be necessary when voting comes, probably late Wednesday or early Thursday.

RETIREES FROM RCAF.—Flying Officer Alwynne Vimpy Handy of St. Stephen, N.B., yesterday bid goodbye to his fellow officers and Royal Canadian Air Force comrades on retiring to civilian life and the supplementary reserve of the R.C.A.F. In the past ten years he has completed two engagements with the R.C.A.F., the first as a wartime air gunner, the second as a radio officer in the R.C.A.F. regular force. During World War II, Flying Officer Handy served overseas as wireless air gunner with the R.C.A.F. coastal command. After the war, he served on transport squadrons and 13 Photo Squadron. During this latter tour he served both in the Arctic and the North West Territories where he achieved no mean reputation as a radio officer, huntsman and fisherman. The popular young officer has decided to enter the automobile garage and repair business in St. Stephens, N.B. Knowing his mechanical skill and the high reputation he has achieved in the Air Force, his fellow officers feel sure that he will be a valued addition to the community. S.
