

THE DAILY EXAMINER.

JULY 3, 1896.

PROMPT ACTION NEEDED

Reports from Washington show that the receipts of the Government from all sources for the fiscal year 1896 approximate \$326,500,000, and the expenditures for the like period \$352,000,000, making a deficit for the fiscal year \$25,500,000. For 1895 the deficit was \$12,000,000, and for 1894 \$70,000,000, so that the deficits for the past three years aggregate \$117,500,000. For the month of June the receipts were \$26,500,000, and the expenditures \$28,000,000, making an excess of receipts of \$1,500,000. Because of the heavy interest payments in July and the payment of the sugar bounty claims, which will be commenced in this month, and also because of appropriations made available by Congress, it is estimated that the deficit for July will foot up to nearly \$10,000,000. We see, also, in the United States a continued heavy depression of industry and commerce. Such are the results of tariff tinkering. The Democratic party obtained power by denouncing the Protective tariff as legalized robbery, and ascrib- ing to it all the evils, real and imaginary, that afflicted the United States' people. But they didn't dare, after they were installed in office, to bring down a Free Trade tariff. They procrastinated. They took time to consider. They tried in the meantime to reassure the threatened industries. Finally they passed the Wilson Bill. The threatened industries, with the banks and the people dependent upon them, began to restrict business from the moment the great Democratic victory was proclaimed. A period of depression ensued. Finally a crisis was precipitated. Prices went down. Commercial houses failed. Many industries were ruined. Banks were smashed. Millions suffered. Deficits followed deficit. The people are waiting—only waiting—for an early opportunity to rectify their disastrous blunder. If we may judge by the utterances of the Toronto Globe, the Liberal Government propose to follow a similar course. They will do nothing about the tariff just now, but they will, it is intimated, redeem their pledges later on. In the meantime they will issue a commission, or something of that sort, and make inquiry into the state of industry. By just such action the Democrats of the United States kept distrust alive and ushered in the era of ruin and dismay. It is not reassuring to find that the objection of the States has been laid upon Mr. Laurier and his colleagues. If they are going to change the tariff, as they promised to do, every interest of the country demands that they shall do so at once. If they are not going to make any material change in the tariff, let them say so at once. Let there be no "beating about the bush,"—no playing with matters of momentous interest to the country. Better, far better, that Messrs. Laurier, Cartwright & Co. should make an open confession and stand self-condemned of winning their election upon false pretences than that Canada should suffer in such degree as the United States have suffered. Prompt action on the part of the Liberal Ministry, in respect to tariff reform, is, above all things, needed.

CHEESE.

The prospect for cheese is much brighter than at this time last year. Markets are ruling up to 7 1/2 cents in some cases, which is fully one cent per pound higher than last June. We are glad to know that patrons of the factories are recovering from the depression consequent on the low prices of last year, and are supplying large quantities of milk to the factories. The farmers should stand together and give the business a fair trial. One year's experience in any business is not enough to prove its adaptability to our circumstances. Having made preparations for the business, and having the factories to pay for and keep in repair, patrons ought to think seriously before they withdraw their support. Even with milk at fifty cents per hundred pounds, we think that manufacturing it into cheese is the best thing that can be done with it during the hot weather. Then in the latter part of the season prepare for butter making by putting in separators, so that cream may be supplied to creameries in some central locality. Dairying has proved a success on the Island as far as making in quantity is concerned. The quality has also been good—and the average price obtained for Island cheese was higher than the average obtained for that of any other province in the Dominion the past season. The price of dairy produce has not dropped as much as prices of other farm products—oats at 25 cents and potatoes at 10 cents and cattle at 3 1/2 cents. Take courage, farmers, and continue to patronize the factories, each striving to do his utmost to raise the standard of the quality of our cheese till it will score the full 100 points in excellence. You may be sure that the price will then be right. Co-operative dairying has been successfully inaugurated, and should, and will, have a bright future if the farmers only stick together at this time and pull it through this little temporary depression.

One of the most amusing features of the grip papers that now, in their canvassing round for and printing interviews with people, saying that they are satisfied with having the grip in power and Mr. Laurier for premier. The grip papers are evidently very sceptical about the verdict of the polls being according to the wish of the people of Canada, and already they feel that some favorable popular sentiment needs to be evoked to bolster up the combination.

POOR HOUSE

On the morning after the publication of the report of the Grand Jury in January last, the Hon. Donald Macpherson paid a visit to the Poor House—and there was a breeze in the institution. Judging by the report which we publish to-day the effects of the breeze were not lasting. The language of the Grand Jury, studiously moderate, is calculated to convey the impression that our unfortunate poor, aged and infirm, are kept in filthy and uncomfortable rooms, and that the Government has neglected its duty in regard to them. Neglect of the poor—those who are always with us—ought not to be tolerated in a Christian land. We hope that the Government will instantly take such action as may be necessary in the premises. At this time of the year, cleanliness and ventilation are essential. We want no pestilence-breeding places in the neighborhood of Charlottetown.

CROPS AND CROP PROSPECTS.

Jesse showers have wonderfully improved the appearance of our growing crop. Hay has been thickened at the bottom and forwarded so that there is now a good prospect of an average crop. Our farmers will, however, do well if they gather every spear. All that can be saved will probably be needed here, and if the reports of a short crop in Great Britain and Europe be true, hay will be sold at a high figure. The present prospects of a large crop of wheat, oats, potatoes, turnips and corn are excellent, though it is, of course, too soon to count upon results. The area under cultivation this year is rather larger than that of last.

NOTES AND COMMENTS

The population of the City of London and its suburbs now reaches the enormous total of 4,171,812. Some persons affect to believe that business will not boom or all grow rich after the accession of Mr. Laurier and Sir Richard. But those persons judge by what has been done and said by these gentlemen in the past. It is stated in Montreal that Mr. Laurier, if called to office, will not bring down his tariff changes during the first session. The Montreal Star points out that the long suspense that this indicates would have a disastrous effect upon the manufacturing interests of the country. A despatch from Ottawa says that Mr. J. L. Booth laid off a number of men last week, and more dismissals followed yesterday. Mr. Booth is a lawyer and not a politician. Those who lost their employment will now be able to realize how much truth there was in the Liberal cry of "vote for Laurier and higher wages." The era of prosperity has also promised to be beginning in the way the Conservatives said it would—by contraction of business and loss of employment.

The Raines liquor law has gone into force in New York State. Smallpox and yellow fever are causing great loss of life in Cuba. Cattle are dying by thousands on the Arizona ranges, owing to the drought. It is reported that a brother of Dr. Janeson has been killed by the Mataelele. A despatch from Cairo says the cholera returns for June show 4,419 cases and 3,598 deaths. A reception will be tendered to Mr. Laurier by the Liberals of Ottawa upon his arrival at the capital. Laurier leads in Saskatchewan by 94 votes. There are two places to near from, but it is thought they will change the result. The number of horses killed for consumption as food in Paris last year was 23,186, this being exclusive of 43 mares and 353 donkeys. In a fire in an arsenal near Fort Muellet in the vicinity of Metz, capital of Lorraine, Tuesday night, an explosion occurred which killed seven men and injured several others. Sir Charles Rivers-Wilson, before leaving Montreal for England, expressed his belief that Grand Trunk affairs were progressing under the management of President Hayes. French physicians are urging a determined stand against the ravages of alcoholism. In forty-five years the consumption of alcohol has quadrupled, averaging in 1894 four litres per head. The United States' treasury statement for the fiscal year 1896 discloses a deficit of \$25,000,000. The deficits for the past three years aggregate \$117,500,000. The deficit for July is estimated at \$10,000,000. A body of Christian insurgents had an engagement with and defeated Turkish irregular troops near Boukovie, Crete. Seventeen troops were killed and many wounded. The Christians captured several guns. A Vienna despatch to the London Chronicle says that an agreement has been concluded between Serbia and Montenegro providing for common action against Turkey and Austria in regard to all national and religious questions. According to reports from Berlin the investigation into the Holyresky disaster has been quashed, because it was found that a number of persons in high position were implicated in the charges of misappropriation of the fund for supplying food and drink for the peasants. The Montreal Gazette very aptly remarks that "the man who cannot make a cross in a circle, to signify for whom he votes, is not likely to be able to form much of an idea as to the political situation, or which party is right and which wrong." Just as well that we should lose his vote. The two or three lynchings reported last week in the United States were those of white men. A man in Maryland, charged with the murder of his wife and sister-in-law, was taken from jail by a mob of thirty men and hanged. The jail was a rickety old building and in charge of nobody that night but an aged colored man. There had been some talk of lynching, but the sheriff had taken no extra precautions. So far as reported, the main reason for lynching the man was to save the county the expense of his trial. The Chinese Envoy, Li Hung-Chang, has accomplished nobody knows what in St. Petersburg, and is now the same interesting and mysterious figure in Germany, where he has paid the most fulsome compliments to the Emperor, and has returned in return; but whether he has accomplished any diplomatic service for his unfortunate country is not revealed. I, deed, it is by no means certain that any privileges or concessions which he has secured would not, out of pure jealousy, fall of ratification.

Baking Powder, 25 cents a lb. JOHNSON & JOHNSON.

EDUCATION OF THE DEAF OF PRINCE EDWARD ISLAND. There are throughout the province of P. E. Island between twenty and thirty deaf children of school age only three of whom, unfortunately, are under instruction at the Institution in Halifax. It would be well for the people of this province to know that our deaf population has recently been made by the government for the education of our deaf children at the Institution in Halifax. The directors of that admirable school are open to receive the deaf children from the Island and board and educate them free of charge as far as the parents are concerned. It is said that in spite of such advantages so many of these afflicted ones are growing up uneducated in our midst and we would earnestly urge the clergy, the teachers and all others interested in education to communicate with Mr. J. Fearon the principal of the Institute in Halifax concerning the presence of any deaf children in their neighborhood. It is to be hoped that this news will be copied by all the newspapers in P. E. Island and have the effect of bringing all the deaf of the community under instruction.

ENGLISH ORPHANS.—A small party of English orphans from Mr. Middlemore's home arrived here last evening in the steamer from Pictou.

WEARING FRUIT ALREADY.

Workmen Discharged Because of Uncertainty Regarding Tariff. LONDON, Ont., June 30.—The manufacturing interests of the city are in a somewhat unsettled state on account of the uncertainty on the tariff question. A large number of men were laid off for an indefinite period on Saturday night in the various factories. More than half the employees of the London and Petrolia Barrel Company were discharged yesterday, and the wages of the remaining sixty men reduced. The Company's output is chiefly purchased by the Petrolia oil works, and the destruction of that industry is feared. The McClary Manufacturing Company also dismissed forty men because of tariff uncertainty. Sixteen hands of the London Bolt Works were laid off on Saturday, as the company does not wish to be caught with a large stock on hand, in view of tariff reduction. Several hands were also laid off for the same reason at Stevens' Foundry and Leonard's Boiler Works.

St. Catherines, Ont., June 30.—The first effect of the late election and uncertainty as to the tariff has already been felt in this district. A large number of the employees of the Welland Valve Works were notified that as soon as the work they are engaged on is finished their services will be no longer required. The new order, it is said, more than 100 men, and others are likely to follow.

CORNWALL, June 29.—The victory of the Liberal party on Tuesday last is already bearing fruit in this section. Some of the leading citizens of Alexandria who were to be shareholders of the proposed joint stock company which was to have built a boot and shoe factory in that town this summer, when asked what the company's prospects were, declared that since Mr. Laurier had succeeded in carrying the country they could not see their way clear to invest a dollar in any manufacturing business, as the Canadian markets were likely to be glutted ere long with the surplus products of the United States, hither to kept out by the protective tariff.

Montreal, July 1.—The rolling mill have shut down and will not open until business warms. The board of directors of the Dominion Cotton Mill Company will meet shortly to consider the situation. In view of the fact that the United States mills are overstocked and would gladly unload on the Canadian market it is possible the Dominion mill will curtail production to actual requirements. A despatch from Ottawa says that Mr. J. L. Booth laid off a number of men last week, and more dismissals followed yesterday. Mr. Booth is a lawyer and not a politician. Those who lost their employment will now be able to realize how much truth there was in the Liberal cry of "vote for Laurier and higher wages." The era of prosperity has also promised to be beginning in the way the Conservatives said it would—by contraction of business and loss of employment.

NEW NEWS.

The Raines liquor law has gone into force in New York State. Smallpox and yellow fever are causing great loss of life in Cuba. Cattle are dying by thousands on the Arizona ranges, owing to the drought. It is reported that a brother of Dr. Janeson has been killed by the Mataelele. A despatch from Cairo says the cholera returns for June show 4,419 cases and 3,598 deaths. A reception will be tendered to Mr. Laurier by the Liberals of Ottawa upon his arrival at the capital. Laurier leads in Saskatchewan by 94 votes. There are two places to near from, but it is thought they will change the result. The number of horses killed for consumption as food in Paris last year was 23,186, this being exclusive of 43 mares and 353 donkeys. In a fire in an arsenal near Fort Muellet in the vicinity of Metz, capital of Lorraine, Tuesday night, an explosion occurred which killed seven men and injured several others. Sir Charles Rivers-Wilson, before leaving Montreal for England, expressed his belief that Grand Trunk affairs were progressing under the management of President Hayes. French physicians are urging a determined stand against the ravages of alcoholism. In forty-five years the consumption of alcohol has quadrupled, averaging in 1894 four litres per head. The United States' treasury statement for the fiscal year 1896 discloses a deficit of \$25,000,000. The deficits for the past three years aggregate \$117,500,000. The deficit for July is estimated at \$10,000,000. A body of Christian insurgents had an engagement with and defeated Turkish irregular troops near Boukovie, Crete. Seventeen troops were killed and many wounded. The Christians captured several guns. A Vienna despatch to the London Chronicle says that an agreement has been concluded between Serbia and Montenegro providing for common action against Turkey and Austria in regard to all national and religious questions. According to reports from Berlin the investigation into the Holyresky disaster has been quashed, because it was found that a number of persons in high position were implicated in the charges of misappropriation of the fund for supplying food and drink for the peasants. The Montreal Gazette very aptly remarks that "the man who cannot make a cross in a circle, to signify for whom he votes, is not likely to be able to form much of an idea as to the political situation, or which party is right and which wrong." Just as well that we should lose his vote. The two or three lynchings reported last week in the United States were those of white men. A man in Maryland, charged with the murder of his wife and sister-in-law, was taken from jail by a mob of thirty men and hanged. The jail was a rickety old building and in charge of nobody that night but an aged colored man. There had been some talk of lynching, but the sheriff had taken no extra precautions. So far as reported, the main reason for lynching the man was to save the county the expense of his trial. The Chinese Envoy, Li Hung-Chang, has accomplished nobody knows what in St. Petersburg, and is now the same interesting and mysterious figure in Germany, where he has paid the most fulsome compliments to the Emperor, and has returned in return; but whether he has accomplished any diplomatic service for his unfortunate country is not revealed. I, deed, it is by no means certain that any privileges or concessions which he has secured would not, out of pure jealousy, fall of ratification.

THE POLICY OF DELAY. Inquiry to Be Made Into the Condition of Industry. Toronto, July 3. The Globe says that it is at liberty to announce that the tariff will not be revised during the short summer session of Parliament, but will remain unaltered until the early part of next year, the intervening period being occupied by a careful inquiry into the condition of industry in all its branches—agricultural, manufacturing, etc.

GALA DAY

Conway Station —ON— Thursday, July 9. Programme of the Conway Fair. 1. Pleasant trip to the Fair Grounds on the special trains from Tignish and Charlottetown. Bring baskets. 2. Pleasant day's enjoyment at the Fair. 3. Hacks on the Fair Grounds. Mr. Brown will run a hack from Conway to the rights to be seen at the parochial residence. Brown's hack. Look out for it. 4. Swing under the supervision of the mayor of Conway—His Honor Bernard Crowdale. 5. Temperance saloons open all day. 6. Ice cream supplied by our friend, Mr. Compton's Summer Baskets. 7. TELEGRAPHIC.

SPECIAL DISPATCHES TO THE EXAMINER MR. LAURIER'S NEW CABINET News Concerning Its Personnel. Reports From Various Sources. MONTREAL, July 3. At a dinner, last night, tendered to Prof. Thomas Fortin, the member-elect for Laval, J. Israel Tarte said that he was in a position to state that Sir Oliver Mowat, Hon. W. S. Fielding and Hon. A. G. Blair, the premiers respectively of Ontario, Nova Scotia and New Brunswick, will be in the cabinet of Hon. Wilfrid Laurier. HALIFAX, July 3. A despatch from Montreal to the Halifax Herald says—"It is stated that Mr. Laurier's slate is as complete as it can be made until the Government is really in Liberal hands. Your correspondent learns that the several provinces will be represented as follows:— Quebec—Laurier, Tarte, Geoffroy, Fisher and Fitzpatrick holding portfolios, with another member yet to be decided upon without a portfolio. Ontario—Sir Oliver Mowat, Sir Richard Cartwright, Hon. Messrs. Patterson, Mills and Mulock. Nova Scotia—D. C. Fraser and Dr. Borden. Prince Edward Island—Mr. Davies. It is understood that a gentleman west of the Lakes will be chosen before the new ministry is complete and that Attorney-General Sifton may be the man, although Joe Martin's friends suggest that he should contest the seat in Brandon (left vacant by Dalton McCarthy) and enter to sit for North Simcoe) and the decision to the new Government as Minister of the Interior. OTTAWA, July 3. A prominent Liberal politician who arrived here from Montreal to-night says that it is about decided that Mr. Laurier will be President of the Council, Mr. Geoffroy, Minister of Justice, Mr. Tarte, Minister of Railway; Mr. Pelletier, Secretary of State; Mr. Fisher, Minister of Agriculture, and Mr. Devlin (probably) Solicitor General. Attorney-General Blair and Colonel Donville are making a big fight for Cabinet positions, and great exertions are being made to keep Sir Richard Cartwright out. But he wants the Finance portfolio, and he does not like the idea of being shelved.
