Quebec Senator Dies Suddenly

MONTREAL. (CP) - Senator William J. Hushion died suddenly at his home in suburban Westmount Thursday night. He was 70. Senator Hushion, in failing health for more than a year, had been Liberal representative for Victoria riding since 1940. Previously, he had been a member of the House of Commons for Montreal-St. Ann from 1924 to 1930 when he was defeated in a general election. He was re-elected to the Commons in 1935. Mr. Hushion was a member of the Quebec Legislature in 1923 and an alderman of the City of Montreal for 14 years. Survivors include his widow, the former Winnifred Dempsey of Montreal, a daughter, Mrs. J. A. Farrell, and two sons, Donald E. Hushion and William J. Hushion, Jr., all of Montreal.

Sues Hospital For Moustache

MEMPHIS, Tenn. (AP) - A 46-year-old man filed suit against a doctor and a hospital Thursday, claiming he entered an operating room with his moustache, came without it, and hasn't been able to grow another one since. Fred B. Oliver, a grocery store checker, asked a total of \$15,000 damages from Baptist Hospital and Dr. Charles W. Ingle. His suit claimed that he had been unable to grow a new moustache because during the operation his upper lip "had suffered a severe and permanent injury to the skin by a noxious agent which resulted in atrophy of the skin on his lip and depigmentation and destruction of the hair follicles."

GOSPEL HALL

(Corner Prince & Hurd Sts.) ORDER OF MEETINGS Lord's Day - Sunday School - 10:00 a.m. Breaking of Bread - 11:00 a.m. Gospel Meeting - 7:30 p.m. Everybody heartily invited To These Meetings. "Christ Jesus came into the world to save sinners." - 1 Tim. 1:5.

WORDS FOR THE WORLD

"Baha'ullah teaches that an equal standard of human rights must be recognized and adopted. There is no distinction or preference for any soul in the dominion of His justice and equity." Also, "education is essential and all standards of training and teaching throughout the world of mankind should be brought into conformity and agreement; a universal curriculum should be established and the basis of ethics be the same." From The Sacred Writings of The Baha' World Faith.

Mayor Reviews

Continued from page 1

parties I feel sure that, from this source of revenue, if pursued a little further in the coming year, bigger and better results will still be derived.

Finance

Again Civic Account shows a surplus of \$8,105.65 and I must congratulate not only the Finance Committee but all the Committee's for this could have been accomplished only by strict economy in all departments. It is noted that nothing has been charged to Capital account that should not have been. This would indicate sound financing, under the guidance of Councillor Johnstone.

"The net debt of the City at the present time is \$2,846,109.67. This made a per capita debt of \$181.42."

Your Finance Committee has worked most strenuously in the collection of arrears of taxes and here again, I wish to state that their efforts have borne fruit. According to the statement of the City Clerk, it shows an increase of \$16,285.86, over the previous year.

Streets

"The Street Committee, under Councillor Storey, had another busy year. The contract with Warren (MacIntyre) Ltd. was finalized. A contract for the laying of concrete side-walks was entered into with M. F. Schurman Co. and some 5 1/2 miles of new work was done. In the Fall, many of our secondary streets in the residential sections were chip-sealed. This was done by our own men, with the aid of the Provincial Department of the Public Works."

"The Police Department carried on in its usual efficient manner, and had another busy year, under the efficient charge of Chief MacArthur. His report shows a comprehensive outline of a busy year, and shows great attention to duty on the part of the Force. They have been untiring in their efforts at all times, to see that this important branch of the City's work has been well looked after."

Public Property

"The Public Property Committee, under the chairmanship of Councillor Keefer, found early in the Spring that it was necessary to put a new roof on the Harris Memorial Library and erect new skylights. This was done under contract by County Construction Company New asphalt walks were laid on Hillsboro and Connaught Squares at the East end of Rochford Square a large parking area was also laid, which did much to facilitate parking in this area. The roof of the City Hall was found to be in a state of disrepair and was renewed under contract by Mr. Richard Rubhart."

"The Police Department carried on in its usual efficient manner, and had another busy year, under the efficient charge of Chief MacArthur. His report shows a comprehensive outline of a busy year, and shows great attention to duty on the part of the Force. They have been untiring in their efforts at all times, to see that this important branch of the City's work has been well looked after."

Other Departments

"The Fire Department, under Councillor McCormac, continued to function in its usual efficient manner. An annunciator board has been set up in the Fire Station in conjunction with the Sprinkler Systems which have been installed by many of our large business firms. This should do much to further increase the efficiency of the Department."

"The Market Committee, under Councillor Cudmore, has carried on in a most satisfactory manner. I feel that the proposed plan,

Strange But True

By F. H. MacArthur

Our pioneer parents applied cut onions to wasp stings. For the stings of bees they used vinegar.

One of the strangest houses in the world was built by Jack de Groat of Scotland. The householder held 8 Groat and the unique house had 8 doors and windows, one for each member of the family, strange but true.

The bushy tail of the squirrel helps it to balance as it leaps from limb to limb. Also, to some extent, the tail acts as a parachute in preventing the animal from falling too fast.

The coconut tree is the most useful to man in that the kernel of its nut supplies millions of people with food, as well as with a valuable oil. The fibers from the outer husk are made into ropes, mats, etc. The leaves are used to thatch roofs, and medicine is obtained from its roots.

There is no speed limit on private automobiles in Denmark. Norman Saksuig, the world's champion typist, can punch about 150 words a minute.

The spine of the human anatomy is capable of supporting 2,600 pounds.

In Scotland there is a superstition that it's bad luck to kill a spider. This dates back to the time of Robert Bruce in 1314. Bruce sat watching a spider fall for the sixth time to fasten its web to the ceiling. As he watched he took one of his henchmen that he had tried 6 times to become king of Scotland. He said that if the spider tried a seventh time and succeeded it was a sign that he should again set on Scotland's throne. Both the spider and Bruce succeeded on the 7th try.

Jimmy Tracy who has retired from his bus-catching business has caught 12,000 lightning bugs which he sold to the Johns Hopkins University scientists.

The tunnel walls and supporting pillars in Toronto's new, soon-to-be-opened subway is being sound-proofed to make it the quietest subway in the world.

Strange as it may seem, the signing of the Korean armistice brought to an end the longest peace negotiations in history. The talks lasted for 2 years, 17 days. In all 375 meetings were held.

It is estimated that hundreds of thousands of dollars in winning race track pari-mutual tickets are left uncashed by racing fans in the U.S.A. and Canada every year.

Some 2,000 years ago a British prince discovered the mineral springs which in 1891, the English town is named. He suffered from leprosy and was sent away from the court. Coming to the springs he noticed some porkers living in the mud. They appeared to be suffering from rheumatism and later he noticed they got well. So the prince got into the mud himself and tradition says was completely healed, cured of his ailment. Thereupon the springs were erected, palaces and temples erected, and the city of Bath founded.

The city of Dundee, Scotland, boasts a building which contains all the churches under a single roof.

There's a curious custom in Oakham, England, connected with horsehoes, namely: That the chief smithy in olden days had the right to levy toll on any horseman passing through the town, while every peasant entering Oakham for the first time was obliged to present a horsehoe. Many of our kings and queens paid this toll.

In the case of big lizards, snakes, crocodiles, and alligators, it is sufficient if they get a meal once a week. And strange but true they are always fed on Friday afternoons and feeding begins at 4 p.m.

In the case of the snake, the creature wraps the whole dinner in its mouth and then swallows it in one gulp.

The melodious song of a bird comes directly from the bird's throat. The tongue has not a part in forming the notes. Inside the bird's throat is a tiny membrane whose vibrations are controlled by air passing through the tube. In other words, nature has provided the song birds with a musical reed instrument.

Here's how the ancient Chinese sprang out of the mud and why pain for the control of dental decay, bats and other small creatures were partly roasted and eaten.

Mouth washes of the urine of a child were commonly prescribed for inflammation of the gums. However repulsive, this remedy was used in many countries, throughout the ages and up to a little over a century ago.

It is interesting to note urea and ammonia, found in quantity in urine, are active components of some modern toothpastes and dentifrices. The reader may be assured that the source of these substances in modern use is highly refined and chemically pure material.

Among the earliest records of China and other countries one reads of the strange belief that a small worm was responsible for the destruction of teeth and the eating of toothaches. The theory persisted up to the 18th century when scientists disproved the presence of worms in decayed teeth.

Ancient Egypt is credited with having the first dentists although there is little evidence of the technical nature of their work. However, dentists of those days used gold wire to link together loosened teeth, and in some cases replacements or lost teeth were incorporated in the appliances.

The Roman Law of the 5th century B.C. forbade burying gold with a dead body, except such gold as was fastened to the teeth.

5,000 years has failed to bring about the eradication of dental diseases. But preventative measures now available to everybody, goes a long way in helping to reduce diseases of the mouth and teeth.

I believe I mentioned last year that some thought should be given to making plans for our Centennial which will be in the year 1955. We did last year obtain information from Halifax as to the form of celebration they had for their bicentennial celebration. However, I pass this along to the incoming Council.

"I cannot close my report without recording the passing of Sgt. Lawrence McInnis and to those left to cherish his memory, we extend our sincerest sympathy.

"To you Councillors, and to all Civic officials and City employees, for your good work, I offer my sincerest thanks."

Hampton and Vicinity

Heavy trucks and trailers, hauling the great, heavy, long steel framework for the \$430,000 High School building in the city, have been daily passing through here from Borden, notwithstanding heavy roads, the result of recent storms.

On Jan. 19, plows again opened the main highways filled at cuttings by heavy snow drifts caused by heavy gales, daily traffic being resumed as gales subsided.

Games played at North River Rink between the Bull Dogs and Graham's Road teams, resulted in the score of 12-5 favor of the Bull Dogs, and at Crapaud Rink between Kelly's Cross and Hampton School teams resulted in the score of 3-1 favor of Kelly's Cross.

Relations and friends of Mrs. W. A. MacQuarrie are pleased to learn that she is gradually recovering from a recent serious illness.

Province wide sympathy is being extended to the nearest-of-kin of the late Mr. W. A. MacQuarrie, whose sudden death, following a very brief illness, occurred at his late residence on January 23, in his 92nd year. With one exception, his family of three sons and five daughters were present at his bedside before his passing. Widely known, highly respected, active in all matters pertaining to the best interests of church, home, and community, Mr. MacQuarrie will be greatly missed in each of these spheres and by all who had the privilege of his acquaintance.

Mrs. John Rogerson was hostess to the W. M. S. of Hampton Church at the Wednesday evening meeting held at her home, January 20. Mrs. J. Dixon, presided and was assisted at the devotional period by Mrs. Baxter, Mrs. G. R. Ferguson, and Mrs. M. K. Dixon. Mrs. G. R. Ferguson was appointed a delegate to attend the Provincial at Charlottetown. Grateful acknowledgment of generous donations for society work received from Mrs. MacFarlane, Mrs. Priscilla Nelson and Miss Lizzy Beer, were received and acknowledged from the secretaries, February meeting will be held at the home of Mrs. Clayton Morrison. Lunch committee appointed are: Mrs. C. Ince, Mrs. H. Peterson, Mrs. Windsor Bell.

Mrs. G. R. Ferguson of H.M.C.S. Micmac, now at Halifax, has been granted leave of absence to visit his family here, also relatives and friends, previous to leaving, with his ship, on a two-week cruise in Bermuda, and will call briefly, at ports in England.

The Women's Auxiliary of Hampton Church held their January meeting at the home of Mrs. John Rogerson. The worship period was led by the President. Some new work was distributed

St. Dunstan's---One Hundred Years

(Third Chapter)

In July 1884 Reverend James Charles MacDonald was named Rector of the College. The records show that during his rectorship the enrollment increased rapidly - from 25 in 1883 to 100 in 1885. It never again sank to its former low ebb.

In the years immediately following Father J. C. MacDonald's

that year the diocese would celebrate the centenary of Bishop MacEachern's landing on the Island. He pointed out the wisdom and foresight of the pioneer Bishop in founding St. Andrew's College and suggested that the endowment of a professor's chair at the College, to be known as "The Bishop's Chair," would be a most expressive token of gratitude to him. Bishop MacIntyre died in April, 1891.

Father A. P. MacLellan's first term as Rector lasted but one year. He was succeeded, in 1892, by Reverend James Morrison (later Archbishop-Bishop of Antigonish, N.S.). Associated with Father Morrison on the Staff, during his three years in office, were Reverend P. McGrath, Reverend James A. MacDonnell, Reverend A. J. MacDougal, and Reverend I. R. A. MacDonnell, as well as a splendid staff of lay professors. An enduring monument to the energy and executive ability of Father Morrison is the affiliation of St. Dunstan's to Laval University which he brought about in 1892.

The first degrees were conferred the following year when the Bachelor of Arts degree was conferred on Messrs Terence Campbell, Frank Murphy, and William McKenna. (Rev. Terence Campbell was later Rector of St. Dunstan's and has now retired and returned to live at the College.)

In 1894 the conferring of degrees took place on June 22, in

appointment: there were many additions to the College Staff, and some changes in the courses which were offered to the students. In 1886 Reverend Dr. P. J. O'Ryan of Quebec joined the Staff. It is to him and his associate, Reverend John A. MacDonald (later parish priest of Grand River), that succeeding generations owe their gratitude for the composition of that singularly appropriate motto, "Ex Eodem Fonte Fides et Scientia" which St. Dunstan's has borne with pride and distinction.

In 1885 a Commercial Course was introduced into the curriculum, and placed under the direction of Mr. A. P. MacLellan (later parish priest of St. Andrew's). In 1890, only six years after his appointment to St. Dunstan's College, Father J. C. MacDonald was named Titular Bishop of Irima and coadjutor to Bishop MacIntyre, Bishop of Charlottetown.

Bishop MacDonald, however, remained Rector of St. Dunstan's for a year after his episcopal consecration. In 1890, too, Reverend A. P. MacLellan and Reverend Peter Curran, both recently ordained priests, were appointed to the College Staff; and it was the same Father MacLellan whom Bishop MacDonald appointed to succeed him when he gave up the rectorship in 1891.

In 1890 Bishop MacIntyre issued a pastoral letter to the faithful of the diocese calling their attention to the fact that during

among the members present, and the purchase of material for sewing and fancy work was left with the purchasing committee. The February meeting will be held at the home of Mrs. C. Morrison, with the devotional period to be led by Mrs. Windsor Bell.

Mrs. John MacQuarrie, entertained Hampton W. I. at the January meeting at her home, with Mrs. Jas. V. Campbell presiding. This was an interesting meeting, and a considerable agenda of business was satisfactorily despatched. Prof. Cross Cudmore, Mrs. Earle Colbeck, distributed sewing work among the members. Following in regular order of business, a committee was appointed to make arrangements for an entertainment to be held in the Hall at an early date. The February meeting of the W. I. will be held at the home of Mrs. Gordon Vilett.

Notwithstanding other near-by conflicting events, on January 22, all roads led to Hampton Hall, for those constituting a sewing society, occupying almost the entire seating capacity of this Hall, present to hear and greatly enjoy a well-rendered variety Scotch program, sponsored by the L. O. B. A. of DeSable, with Mr. C. E. Shaw, chairman, choruses, with Miss Kathleen MacFarlane as company, quartets, directed by Dr. MacDonald, Scotch dances particularly including the sword dance) by the Misses Hart, conducted by Misses Della Ferguson and Gloria Myers, were a credit to the participants. The highlight of the evening was a fine address on "The Opening" will mark more than the successful completion of a great engineering enterprise. The dock itself and the need for it constitute a notable advance in what may be fairly called a new industrial revolution that has been going on quietly in Britain since the war."

Commenting on the opening of the new dock, the Manchester Guardian editorially stated: "The opening will mark more than the successful completion of a great engineering enterprise. The dock itself and the need for it constitute a notable advance in what may be fairly called a new industrial revolution that has been going on quietly in Britain since the war."

Since the Second World War, Britain's refinery capacity has increased sevenfold. She now stands fourth among the world's oil refiners, trailing only the United States, Russia and The Netherlands West Indies.

Commenting on the opening of the new dock, the Manchester Guardian editorially stated: "The opening will mark more than the successful completion of a great engineering enterprise. The dock itself and the need for it constitute a notable advance in what may be fairly called a new industrial revolution that has been going on quietly in Britain since the war."

the Lyceum, Charlottetown. A newspaper of the day carried the following graphic report of the event: "The distribution of prizes over His Lordship the Bishop, Reverend Doctors Morrison and Walker, Judge Hodgson, Doctor Conroy, His Honor Governor Howland and James Jeffrey Roache, Esq., ascended the platform and the ceremony of conferring the degree of Bachelor of Arts began. The first five, all of who, except Dr. Morrison, are degree men of Laval University with which St. Dunstan's College is affiliated. There were but two candidates for degrees: viz., Mr. P. D. McGowan of Hope River and Mr. J. E. O'Brien of Droichead. They were conducted and presented to the Pro-Chancellor, Rev. Dr. Morrison, by Mr. Justice Hodgson, after which the usual formula was gone through and both young men donned their gowns and were invested with their degrees. The proceedings during the ceremony were conducted widely in Latin. The address to the graduates was given by James Jeffrey Roache, Esq., editor of the Boston Pilot, and one of the distinguished members of the St. Dunstan's Alumni, etc., etc."
