

THE DAILY EXAMINER.

NOVEMBER 6, 1888.

Editorial Notes.

The Moncton Times has been at work comparing the Patriot's statistics of church goers in Charlottetown with figures as to the church goers of Moncton, obtained by its reporters. It is needless to say that the comparison is very greatly to the discredit of Charlottetown.

The political contest in the States will be decided to-day. The Democrats anticipate victory as follows: New York, 35,000 to 40,000 majority; Indiana, 12,000 to 15,000 majority; New Jersey, 9,000 to 10,000; Connecticut by a plurality considerably larger than in 1884.

Mr. C. C. Colby, M. P., writes: "The cardinal policy of Sir John Macdonald's Government has ever been to consolidate a grand Canadian nationality including within its borders all British North America, which should live in close alliance with the mother country and in friendship with all other countries, and to give such a forward impulse to this young nationality as would keep it in line of march with the most progressive nations."

The Toronto Mail says that "the Canadian farmer ought, by this time, to be selling less abroad than ever before, simply because he ought to be selling more at home to the tall chimneys. The figures show the exact contrary to be true."

Table with 2 columns: Commodity, Value. Includes Rye, Corn, Wheat, Flour, etc.

Total, \$11,181,756 \$3,101,770. In the articles above enumerated the home market of the Canadian farmer has certainly been enlarged to the extent of many million dollars.

Supreme Court.

The Michaelmas Term of the Supreme Court opened to-day, Mr. Justice Peters and Mr. Justice Hensley presiding. Angus Campbell, appellant vs. George Smith respondent, and Joseph Campbell appellant vs. George Smith respondent.

A press despatch says John Forsyth, of Rock and, Mass., informs the Democratic National Committee that he knows the author of the famous Murchison letter to be Chase Sumner, a lawyer and editor of Pomona, Cal. He moved there from Moncton, Canada, about four years ago.

Purity of the Ballot.

Col. M. S. Quay, chairman of the Republican National committee, has issued a circular addressed to the Republican State chairmen in the South, saying that at the final meeting of the National Executive Committee yesterday, \$50,000 was set apart to be paid in rewards which may lead to the arrest and conviction of persons conspiring to perpetrate frauds upon the ballot in different sections of the South.

Piles! Piles! Itching Piles!

LETTERS TO THE EDITOR.

"Varia" Criticised.

Str.—In conversation with a literary friend, the remark was made that "Varia" had missed the origin of "Mister," (et omne genus) by not giving the reason why those familiar terms took the forms that cling to them, which admits of the following explanation. If he had pointed his finger to the root of all of them (Magister) he need not have strayed away from what must be to any one familiar with lingual analysis the self-evident explanation.

"Twer good what Measter Collins spoke O' spite, to two poor spiteful vork. When woone toold tother o' the two, 'I be never the better vor zeen o' you."

The Subway.

Str.—As one who can fairly claim to have given more time and thought to the question of the nonfulfillment of the terms of Confederation than any other man in private life, I feel that I may be excused for commenting on your timely editorial of the 30th ult., anent uninterrupted communication and the subway scheme, and in doing so I will address myself more particularly to the statements made by the veteran Premier in his place in parliament.

First then, as regards the feasibility: Has not the subway scheme been pronounced feasible by the number of eminent men of science named within your editorial, and should this not suffice? Then, again, with regard to its durability, surely the scientific skill of this nineteenth century is able to determine as to the durability of the peculiar kind of metal proposed to be used.

Is any limit set to the cost at which this incomparable boon was to be obtained for us? The matter of cost is not even mentioned. Every fair-minded man will agree that the astute man who holds the helm and guides the ship of state in this broad Dominion, displayed a vast amount of prudence and state-craft in moving slowly to adopt the what must be termed some what novel subway scheme as a means of connecting us with the Mainland, and thereby fulfilling the terms of Confederation.

Yours respectfully, W. H. LORD. Eldon, Nov. 3rd, 1888.

A Good Investment for Small Savings.

Just fifteen years ago a resident of Kansas City purchased from the Equitable Life Assurance Society of New York, policy No. 83,188. His annual payments were \$345.45, and the total payments for 15 years amounted to \$5,181.75.

Disastrous Explosion.

LOCK HAVEN, Pa., Nov. 4. An explosion occurred last night, in Kettle Creek Coal Mining Company's mines 30 miles west of this city. The explosion occurred in the new drift in which 21 persons were at work. Fifteen dead bodies were carried out and four others badly injured. One has since died and others are likely to die. The cause of the explosion is unknown.

There is no more fruitful source of disease than vitiated blood. It involves every organ and function of the body, and if not immediately corrected by the use of Ayer's Sarsaparilla, sooner or later leads to fatal results. Beware of imitations.

PLASTER—"I never saw anything more complete than the way land plaster acts as an absorbent and preservative of manure. I use about two barrels of this plaster per winter, which costs me \$1.69 per barrel, and I would not be without it if it cost me \$5. Every night my man takes two or three quarts of it, and as he passes along scatters it in the gutters behind the cattle and the horses in the stables. So completely does it absorb everything, that if you go into the stables in the morning, you would scarcely know that there were any animals there, any more than you would in a parlor. The principle of this absorbent power of land plaster is, that it requires about 5,000 times its bulk of water to dissolve it." W. D. Hoard, at Ontario Dairyman's Convention.

The above mentioned Plaster (Ground Land Plaster) should be used in every Stable, especially in large ones where many animals are kept together. It purifies the air, thus promoting the health of the animals, while it

Greatly Increases the Value of the Manure.

by retaining the ammonia, the most valuable element in it. The heaps of manure in the field and farmyard often become white or fire-fanged by overheating; a sprinkling of Plaster over the heap will prevent this.

Price of the Plaster in Barrels of about 320 lbs. each, \$1.60 per Barrel, or \$1.50 in lots of Five Barrels or upwards.

We deliver free of charge to any part of the city or to railway or steamers.
