MR. GORMAN REVIEWS PROGRESS IN ISLAND FISHERIES INDUSTRY

The total income from the fisheries of Prince Edward Island during 1952 was 2.9 million dollars and of this two million came from lobsters. This fact was revealed by Mr. Eugene Gorman of the Fisheries Loan Board at a meeting of the Souris Board of Trade held Wednesday evening. He felt that something should be done to bring other fish prducts more into line with this luxury item.

He explained that the elements for success in any industry could be divided into four categories: 1, You have to have the raw materials; 2, You have to have the capital to develop it; 3, You have to have the "Know How" and 4, You have to have a market.

Speaking on these points individually, Mr. Gorman went on to show that the Island with 1,100 miles of shore line, having the Labrador Current and the St. Lawrence drainage emptying into the surrounding waters, puts the Island in perhaps the most favored fishing grounds of the world. He said that every spring there are about 3 1-2 million seals feeding on the fish surrounding our shores but still there is a good catch.

Mr. Gorman made comparisons which showed that in 1880 the Island took 2.9 million lbs of cod and haddock from the sea and in 1953 the amount taken had only increased to three million lbs. He also stated that in 1880 there were 18.35 million lbs. of mackerel fished here while in 1953 only 1.39 million were taken in. It was his opinion that there is no chance of depleting the supply of fish even with much greater development of the industry.

DRAGGER FISHING

The speaker told his audience something of dragger fishing, which he was happy to say, in spite of inexperienced operators had made splendid progress since it began a few years ago. He referred to these men as pioneers as far as the Island dragger fishing is concerned. It was a matter of pleasure to note that no outside help was needed, "only Island fishermen were involved," he said.

Mr. Gorman made note of the changes which are taking place in regard to processing. "No longer" he said, was a tight roof and a few tables sufficient equipment to process fish. Mony plants have 175,000 worth of machinary including stainless steal tables, esculators, as well as powerful refrigerators worth $10,000 each. He also stated that there was a tremendous amount of technical knowledge involved in the processing of frozen fish. The Americans were processing a considerable amount of "fish sticks" which are precooked fish in frozen form. He pointed out that the demand from this source had removed vast stocks of Island fish from the market.

In speaking of the market, Mr. Gorman observed that 71% of the earth's surface is water and only 29% land and that an acre of sea, in comparitive food value, is four times more productive than an acre of land. Yet, only ½ lb of fish is consumed in comparison to 100 lbs. of land products. "In other words," he said, "we are getting only one days supply of calories from the sea while 364 day's supply comes from the land.

With the population of the world expected to triple itself and with one third of the world going hungry, Mr. Gorman felt that the fishing industry was confronted with a tremendous challenge. "If we are to meet this challenge," he said, "we must use our only storehouse. . .the sea."

FISH PROCESSING METHODS

The speaker explained why so much effort is being made to process fish by the frozen method. A great deal of the reason was because of a change in the eating habits. "Fifty years ago with the population largely composed of immigrant stock, we needed and preferred a diet high in protein concentrate, but the children of today with all the fresh vegetables and fruit juices available to them do not require this high protein diet.

He went on to show that with the advent of refrigeration, there was no need for using salt as a preservative and many housewives who are working women cannot take the time to cook salt fish. To illustrate the trend towards frozen fish processing, Mr. Gorman showed that in 1908 there were 6½ million lbs of salt haddock exported while in 1940 there was only 13,00 lbs. . .but there were 36½ lbs of frozen fish moved. Other varieties were in comparison to the haddock.

Summarizing Mr. Gorman said that any industry that had the three points illustrated should not have to look far for capital. Before closing his remarks he paid tribute to the members of the Fisheries Research Board whom he described as "Unsung heroes." He said, "when we get into trouble they give us the answer."

The speaker concluded by expressing confidence in the future of the industry and was hopeful that this, an Island industry could be controlled by Island capital.

In P. C. Hospital After Accident

—Rev. Russell R. Webb of Waterford, N B., is a patient in the Prince County Hospital suffering a fractured leg following a highway accident on the paved highway at Woodstock Wednesday afternoon when his car was in collision with an automobile driven by Mr. Stanley Linkletter of Summerside. Dr. L. G. Dewar attended Mr. Webb at the scene of the accident. Mrs. Linkletter was treated for facial bruises at the Western Hospital at Alberton. Mr. Linkletter was not injured. Both vehicles involved were heavily damaged.

C.A's To Confer In Charlottetown Next Week

It has been announced simultaneously by Mrs. Erma P. Morrison, C.A., and Mr. John Hyslop, C.A., presidents of the Institutes of Chartered Accountants of Prince Edward Island and Newfoundland respectively that the 1954 regional conference of Atlantic Institutes of chartered accountants will be held in Charlottetown from October 21st to October 23rd. This conference is being sponsored jointly by the institutes of Newfoundland and Prince Edward Island.

The conference has been fortunate in obtaining as guest speakers Mr. J. Grant Glassco, F.C.A., president of the Canadian Institute of Chartered Accountants and Dr. J. Harvey Perry, executive director of the Canadian Tax Foundation.

The opening meeting is planned for Thursday, October 21, at which time a joint meeting will be held with the Charlottetown Board of Trade and at which Dr. Perry will be the guest speaker. Friday and Saturday will be devoted to the discussion of technical and professional problems. Foremost on the agenda will be discussions which it is hoped will lead to greater uniformity within the institutes of chartered accountants of the four Atlantic Provinces.

It is expected that representative delegations from each of the four Atlantic Institutes will be present and that with both Dr. Perry's and Mr. Glassco's presence much will be accomplished from both organizational and technical points of view.—S.

S'side Y's Men Discuss Boy Scouts, Cubs

—The regular weekly meeting of the Summerside Y's Men's Club, held last evening, featured a lengthy and detailed discussion on the Boy Scout and Wolf Cub Troops and packs which are sponsored in Summerside by the Y's Men. A report by Y's Murray Willet for the Boy Scout group committee stated that at the meeting of these committees with the executive of the club last week, some 15 Y's men had themselves volunteered to act as troop and pack leaders this year. This was deemed adequate for the present, but a pressing need, both for trained leaders and proper facilities was pointed out.

At the present time the Y's Men's Club is the sole sponsor of the Boy Scout movement in Summerside, operating some seven troops and packs. The position of the club in this respect is unique insofar that in most other communities the sponsorship and operation of Boy Scouts and Wolf Packs is under several different organizations.

A recommendation that part of the sponsorship of Scouts and Cubs be turned over to other organizations in the town was deferred for one month until the result of the new leadership could be observed.

Y's Ross MacKenzie told the club that a special speaker from Paraguay, South America, was available if the majority of the members could attend a noon dinner meeting on Monday, November 1st. As a majority signified their willingness, it was decided to hold this meeting, providing that the Y's Mennets could cater to them at such a time. Y's Charles Linkletter announced that Y's Ross MacKenzie had been appointed regional world outlook director and would turn his present position of program chairman over to Y's George Meikle.

Following the business of the club a program of world outlook conducted by the chairman of the meeting, Y's Dan Matheson, was held during which two films "Eyes Of Canada" and "Defense Of Peace" were shown. Song leader for the evening was Y's George Meikle. Guests present included Keith Pickard of Summerside and Norman Eldrich. The attendance average at the meeting was 93.6 per cent.

—S.

Personals

—Mr. and Mrs. H. B. MacLeod returned to their home in Burlington on October 8, after a holiday at Somersworth, N. H., and Saugus, Mass.

—Mrs. Frank Simpson, Hamilton, is spending a few days with her daughter, Mrs. W. J. Profitt, Long River and Mr. Profitt.

—Mr. Carl Pickering, Charlottetown, was the Thanksgiving week end guest of his cousin, Mr. Dale Pickering, Darnley.

—The many friends of Mr. Theo Ling, Kensington will be pleased to learn that he is now making a good recovery from his recent illness.

—The many friends of Mrs. J.A. Meek regret her illness at her home at French River, and wish her an early improvement in health.

—Mr. Malcolm MacSwain and daughter, Joyce, of Charlottetown, were guests on October 10 of Mr. and Mrs. Preston Campbell, Irishtown.

—Mr. and Mrs. Robert Cotton and daughter, Norma Mae and Mrs. Cottons sister, Miss Joyce Williams, were guests on October 10 of Mr. and Mrs. LeRoy Campbell, Irishtown.

—The many friends of Mrs. Keith Mayne, who has been ill at her home at Summerfield, will be glad to learn that she is feeling much better and wish her an early and complete recovery.

—The many friends of Mrs. W. J. Proffitt, will be pleased to know that her condition is considerably improved, following her illness at her home at Long River, and wish her a rapid and complete recovery.

Mayor Promises School Auditorium For S'side

—Assurance was given by Mayor Wedge at the regular meeting of the Summerside Town Council last evening that a new auditorium will be provided in Summerside before the re-opening of school next fall.

Plans for its construction will be made after the new year, and construction will begin early next spring.

The matter of additional class rooms will be taken up again with the School Board, he said, and if extra rooms are needed something will have to be done to provide them.

Mayor Wedge made these comments following the reading of letters from the Home and School Association, the Y's Men's Club, and the Community Concert Association expressing the views of their members in regard to the school situation and the need for an auditorium.

A resolution based on advice received from the Town Recorder in regard to an application from the Electric Light Department employees requesting union recognition, advised the employees that their request could not be granted because it would, according to the Town Recorder, be contrary to the Summerside Incorporation Act.

Following the suggestion of Councillor MacDougall for improvement around the Abattoir, Councillor Clark asked if consideration had ever been given to moving the Abattoir to some other location which would make it distant from the residential section of the town.

This suggestion was favorably received by the councillors and it was decided to delay any expenditure at the present site until some study could be made regarding a possible change of location.

Permission was given by the Council to the Canadian National Railways for the closing of an entrance leading from East Street to the Town Lane. This entrance is the property of the C.N.R.

Because Hallowe'en falls on Sunday, a resolution was approved requesting service clubs to hold the annual Hallowe'en festivities on Monday so that no Hallowe'en activities will be held on any night other than Monday.

Permission was given for the Sea Cadets to hold a tag day on Saturday, October 23rd, and a similar privilege was granted the I.O.D.E. for Friday and Saturday, November 12th and 13th. Consent was also given the Boy Scouts to hold their annual apple day on Saturday, October 30th.

WATER FLUORIDATION

Councillor Clark, reporting for the committee appointed to investigate the cost and possibility of fluoridation of water for the Town of Summerside, said that Mr. Bob Donnelly, provincial sanitary engineer; Dr. B. J. O'Meara, of the Dental Department, Public Health and Welfare; and Mr. A. L. MacDonald of the engineering firm of Wallis and Tierney in Halifax, had visited the town for the purpose of ascertaining the mechanical equipment that would be required and the cost involved. Councillor Clark said that when this information is available a public meeting will be held to explain the purpose and advantages of adding fluorine to the water as a preventative measure in the reduction of dental cavities.

In his report as chairman of the water and sewerage committee, Councillor Clark said that the work of providing the extensions on Arcona and Victoria Road have been completed.

Some back filling remains to be done on Water Street East, while on Water Street West unexpected difficulties were encountered due to low lying ground which necessitates a change of the line of extension which will be provided by running it in from Notre Dame Street. He raised the matter of closer co-operation between the Water and Sewerage Department and the Electric Light Department in checking with the building inspector or the town office to ascertain that building permits have been issued before making any connections.

Councillor MacDougall, chairman of the police and fire committees, said that his attention had been called to the matter of fire hose having been taken from the Fire Hall, and used without the knowledge or permission of the Fire Chief. He said also that the Chief should be notified regarding any hydrants that are out of order, and of any shut-off of the water supply to any part of the town. The department also called attention to fire hazards in the town and referred specifically to the tile plant on Harvard St. and the Chinese laundry on Granville St.

There seemed to be some uncertainty among the council on whether the Fire Department or the Water and Sewerage Department were responsible for checking the condition of the fire hydrants, and Councillor Clark said he had heard that at one time the Fire Department used to check a certain number of hydrants during each practice night. As a means of keeping a closer check on what work is being done he suggested that the work of all departments should eminate from the Town Hall rather than through department employees, so that the Town Clerk and the Councillors would have closer touch with what is being done.

Referring back to the Fire Department Mayor Wedge said that a check should be made of all hydrants, and he inquired who was responsible for looking after the fire equipment, stating that he understood the pumper truck had run out of gas while on a call in connection with a fire at the east end of Summerside.

TEXT OF LETTER

Following is the text of the letter received from the Town Recorder Ernest H. Strong, Q.C.:

"As requested by your letter of October 4th in respect to the employees of the Electric Light Department of the Town of Summerside, it would appear to me that as employees of your town they would be subject to Sec. 63 of the Summerside Incorporation Act 1903 as amended by Section 10 of 23 Geo. V. Chapter 31, being an act passed in the year 1933 as an amendment to your incorporation act as follows:

The said council of the said town as soon as convenient after every annual election shall appoint from time to time two auditors and two assessors, etc., and it shall be lawful for the said council to appoint from time to time as the occasion may arise a fit and proper person not being a member of the council to be clerk of the said town and also appoint a chief of police etc., also to appoint surveyors of roads, pound keepers, wharfingers, fence viewers and such other officers as they may deem necessary according to the true interest and meaning of this act who shall hold office during pleasure and define the duties of such offices and their respective terms of office and at their pleasure remove or displace any of the said officers and appoint others in their stead and may impose penalties for the non-performance of such duties or misdoings of such officers, year by stated salary or otherwise and shall appoint or allow in any year by stated salary or otherwise to the clerk or other officer so appointed as aforesaid, such allowance or other compensation for their service as the said council may think fit, etc.

This section was upheld by the Supreme Court of our Province in the case of Alonzo Larkin vs Town of Summerside which was a decision on appeal from a jury verdict giving Larkin damages for wrongful dismissal when the judgment obtained by him was set aside by the Appeal Court of the Province of P.E.I.

On reference to the Trade Union Act I do not find any special section that would be taken to repeal Section 63 (as amended) of the Summerside Incorporation Act.

It would be unfair to other employees of the town in other departments than the Electric Light Department to have employees of the Electric Light Department put on a more favored basis than provided by the Summerside Incorporation Act.

Beg also to bring to your attention the situation that may arise if such a trade union through its affiliated organizations outside the Province of P. E. I. saw fit to dictate to the town through the employees of the Electric Light Department or to dictate to some company or organization within or without this Province in respect to a matter which did not directly effect your employees as for instance if a general or local strike was called by a union headquarters it would have the effect of doing away with the powers reposed in your council under its incorporation act, which provisions have been made for the general benefit of the citizens of the Town of Summerside over which the council has wide powers (much different from a private mercantile or manufacturing company) in other words the Town Council is a governing body.

Especially the above is applicable in respect to your Electric Light Department which not only functions for the benefit of the citizens of your town, but a large number of persons, partnerships, corporations, military establishments, churches, etc. outside the limits of your town which are served by this department in peace and in war, whose consent would have to be obtained.

From the above it would appear inadvisable and impractical for your 'Town Council' to adhere to such a request and it would be contrary to the Incorporation Act." Ernest H. Strong, Recorder of the Town of Summerside.

POLICE REPORT

In his report as chairman of the police committee, Councillor MacDougall reported that the police have rounded up the youths responsible for the vandalism and destruction at the Summerside Raceway, and that they will be dealt with in Juvenile Court. He suggested that the management of the rink should take better care to protect the property in view of the town's investment in this fine stadium.

Referring to more recent acts of vandalism concerning windows smashed at Holmans and the old post office, he said "if the press had known the people involved they probably wouldn't have made such publicity about it."

Acknowledgement was received from Mr. J. Watson MacNaught, M.P., of a letter received from the Town Council regarding the reduction of personnel at the R.C.A.F. Station. Mr. MacNaught said he has been working on this matter for some time, and that the resolution from the town was most helpful.

Referring to correspondence received regarding a new auditorium and additional school facilities, Mayor Wedge said the citizens did not realize how much the auditorium was used as a cultural center until they were without it following its conversion to make more classrooms available at the school.

He said the Council had previously indicated their willingness to construct a new auditorium, but pointed out that when the conversion of the old auditorium was begun the Council and the School Board did not agree on the number of classrooms needed, and the matter was left so long that it would have meant onstruction work being done during the fall and winter months.

TEXT OF RESOLUTIOUN

The resolution approved by the Council in regard to the electric light employees request for union recognition was as follows: Whereas employees of the Town of Summerside Electric Light Department have made application to become members of local union number 1432 of the International Brotherhood of Electrical Workers, and whereas the said union has requested the said town to recognize said union as bargaining agent for the said employees, and whereas the Town Recorder—upon request from the Summerside Town Council — has advised by letter dated October 8th, 1954, addressed to the Mayor and Councillors of the Town of Summerside, that to adhere to the request of the said union would be contrary to the Incorporation Act of the town, therefore be it resolved that the report of the Town Recorder be received and filed, and that the said local union number 1432 of the International Brotherhood of Electrical Workers be advised of the findings and recommendations of the said Town Recorder.

New Legion Home At Kensington

—A modern Legion home, on Victoria Street in Kensington that will serve as a meeting place for all type of community affairs, is expected to be ready for occupancy some time in November.

The large building, which is 131 feet long and 24 feet wide, was formerly an R.C.A.F. wireless station barracks at Tignish and was hauled to Kensington by trailers in four sections, and placed on a concrete foundation. Incidentally, all of the cement for the 7-foot high 9-inch thick foundation, was poured by Legion members in the evenings after work.

The building is in excellent condition, with a hardwood floor throughout, an insulated ceiling, and plumbing and heating accessories which are still intact. The Legion home will be hot water heated by an oil furnace which is to be installed shortly. When completed the building will contain an office, cloakroom, lounge, 2 toilets, kitchen and auditorium. It is planned to increase the size of the auditorium by widening later on. The basement, which runs the full length of the building, is 7 feet high and it is hoped to install bowling alleys here in the future.

Mr. W. L. Miller, secretary of the Kensington Branch of the Canadian Legion is supervising the project and much of the work is being done through the voluntary efforts of Legion members. Mr. Miller stated that although the building is primarily a Legion home for veteran members, it will be available at all times to organizations in and around Kensington for functions of various types.

Mr. Ernest Taylor of Freetown is president of the Kensington Branch of the Legion, which sponsors local Boy Scout and Cub groups, and membership totals 76.

Survey Damage By Hurricane In Haiti's Areas

By BEN FUNK

GUANTANAMO BAY, Cuba (AP) The tip of the southwest Haitian peninsula, where hurricane Hazel struck Tuesday with 115-mile-an-hour fury, is littered with the wreckage of scattered villages, but the bigger towns went through the storm in unexpectedly good shape.

To a group of reporters who flew over the stricken area, the city of Aux Cayes, with a population of 30,000, appeared to have escaped with only minor damage.

Almost all the flimsy wooden buildings of Jeremie were unroofed or damaged to some extent by Hazel's mighty blasts, but first reports that said this town of 11,000 as "washed into the sea" were untrue.

By far the greatest destruction was to the small villages along the far western tip of the mountainous finger of land which points out from the peninsula toward Cuba and Jamaica.

The small coastal towns of Dammarie and Anse D'Hainnault, and several villages in the same area were wiped out, either by the hurricane winds or the flood gushing down from the high mountains of the interior.

Off this devastated area, the United States aircraft carrier Saipan sent helicopters buzzing up and down the coast, dropping food and medical supplies and picking up injured storm victims.

TENDERS

Tenders will be received by the undersigned up to October 30th, 1954 for the sale of the Kensington Town Hall, to be moved off lot. Highest or any tender not necessarily accepted.

C. M. Kennedy,
Town Clerk.
