### THE ISLAND LEADS THE WAY

**HAROLD E. HOSFORD** Gen. Mgr. **MR. FRANCIS MacQUARRIE** Summerside

**ISLAND PROPANE GAS LTD.** was one of the very first distributors of propane gas in the Atlantic Provinces. Over 10 years ago the company of Stanley, Shaw and Pearson, Charlottetown, first brought bottled gas to the Island to introduce this modern way of cooking and heating to the Maritimers. There was a tremendous demand for this product and the expansion led to the changing of the name to Island Propane Gas Ltd. in 1952, and the setting up of a separate company to sell and service the many propane users.

For the next three years the company's expansion continued and in the Spring of 1955 it was found necessary to establish a bottling plant in New Annan to better supply the many customers and the network of dealers which by now covered the Island from end to end. Islanders can be proud of the fact that this cylinder filling plant is one of the most modern in North America. Also in the Spring of 1955 a Modern Retail Store was opened in Summerside to render better service to that end of the Island and also to provide a place to display the many fine lines of the latest in Hot Water Heaters, Ranges, Brooders and even Lights. This Store is capably managed by Mr. Francis MacQuarrie of Summerside.

To cope with the need for expanded facilities in Charlottetown Island Propane Gas Ltd. recently moved to more spacious quarters on Grafton Street, where the most modern way to cook and heat can be demonstrated to new customers on the latest equipment in pleasant surroundings. The Company's offices are also at this store at 58 Grafton Street, Charlottetown, P. E. I.

Harold E. Hosford, 51 Greenfield Ave., Charlottetown is the General Manager of Island Propane Gas Ltd. Mr. Hosford is proud of the fact that Island Propane Gas Ltd. gives employment to fifteen employees in all.

Harold Hosford on being questioned about the tremendous growth of this Company replied it was due primarily to the ready public acceptance of this product which makes water heating and cooking fast, efficient and economical.
