THE Monetary Times says:—Just is the fate which converts the American fishing schooner Highland Light, forfeited for violating the law, into a Canadian cruiser, henceforth to be known as the Vigilant. The metamorphosis was effected by the government becoming purchaser at the judicial sale. Sailing vessels have an advantage over steamers, as cruisers on the fishing coast, the smoke of the latter heralding their approach at a great distance, and giving the poachers a chance of escape, and small vessels are required to approach the coast and range the coves. No more suitable vessels for this purpose could well be got than American fishers, fitted out with special reference to the speed required to enable a poacher to escape; and the Vigilant, the Highland Light, is the first to enter the line.

In Reading, Pa., one night recently, a young man, with a child three or four years old, visited half a dozen or more saloons in the central part of the city until he became intoxicated. He said that his wife died last week, that he had no housekeeper, and he and the child now composed the family. Consequently when he went out to have a time he had to take the child along with him. Before this particular time had progressed far he was escorted home by a policeman.

HORSESHOEING.

HAVING secured the services of MR. WILLIAM TUCKER, a native of this Island, who has had nine years' experience as a Horse-shoer in the United States, I am prepared to supply a long-felt want in this line. Mr. Tucker has reduced horse-shoeing to a science, and is prepared to perform all classes of work in a common-sense and scientific manner. I need not inform the intelligent horseowner that the gait of the horse and condition of the feet must be understood to weight a horse properly and to successfully operate thereon. Numerous patrons already admit the merits of the work performed, and recommend his system of shoeing. Customers can always depend on prompt attention and entire satisfaction. W. J. FRASER.
