THE DAILY EXAMINER.

JUNE 26, 1880.

The Army Worm.

This dreaded pest has reached Pictou County, Nova Scotia. The *Pictou Standard* says "a myriad of the worms are now feeding in the woods at the Middle River near Granton. On Saturday last they were first observed in great quantity on the railroad of the Intercolonial Coal Company, which the army covered for upwards of half a mile. So numerous were the worms that the wheels of the locomotives would not grasp the rails until sand was liberally strewn over them. Yesterday the railroad was still occupied, and the woods on either side were alive with the swarms feeding on the leaves; indeed, on every green object at hand. A mile of country over which the worms have passed, a week ago fair and green, is now an unsightly blackened waste. The worm spares nothing; all is meat that it discovers. The worms now in this county undoubtedly the real army worm, are about an inch in length, of green or sometimes black color, and partly covered with hair. They move slowly and in compact order in places so thick that the ground is totally hidden. Countless millions of them are in the army now at Middle River. Where they come from is a mystery not yet solved, but it is reported that a blackened path stretching many miles into the forest marks their progress. We hope our farmers will take measures to deal with this dreaded enemy, if further progress by the invading army be made. The railroad where many of the worms now are, gives a hint that may prove useful. Where coal is on the road bed, there millions of dead worms lie, the coal seemingly proving fatal to them. If the present or other armies attack cultivated lands, possibly a coal dust barrier might be the proper one."

While sympathizing with our neighbors across the Strait, we sincerely hope the worms will not take it into their heads to swim over to this Province.

Discounting.

"During the years of inflation there is no doubt that the tendency in banking institutions was to encourage speculative commerce. Honest, hardworking men, doing a small business, or a comparatively small business, were nobodies compared with the speculators, whose chief capital lay in their "cheek," and who, from the fact that they drove fast horses and gave large dinner parties, appeared to have claims to the most extravagant lines of discount. If the result of the years of inflation shall be to induce a more conservative tendency in banks, and a greater disposition on their part to encourage honest industry rather than speculative flights of fancy, it will have a most important bearing upon the future commercial prosperity of the country."

We clip the above from the *Montreal Gazette*. The paragraph is worthy of attention here as well as in Montreal.

Cost of Living.

THE *St. John Sun* says:—"Here are the comparative figures of the cost of many of the necessities of life in St. John in the month of June, 1878 and 1880, taken from wholesale lists kept by one of our leading houses. (The quotation of flour is the average for the months of April and May in each year.)

	1878.	1880.
Barbadoes Molasses	39c	38c
No 1 Scotch Sugar	84	81
" 2 "	81	8
Granulated Sugar	94	104
Cornmeal	36c	35c
Tobacco	36	34
Cornmeal	2.85	3.10
Oatmeal	5.00	5.00
Flour (best superior extra)	6.50	6.50
Butter	18c 15 & 16	
Eggs	10	10
Mess Pork	14.25	14.25
Fish (the same in each year)		

Flour fell in June of each year, the fall commencing somewhat earlier in June of '78 than in the present month. Granulated Sugar has advanced within the last three or four days, in sympathy with the advance in England and the States. It will be seen that molasses, Scotch sugar, tea, tobacco, and butter, are less than in '78, while flour, oatmeal, eggs, fish and pork are the same. Cornmeal is the only article in this list that has advanced, and the increase in it is only 15 cents.

Reassuring Testimony.

THE *Montreal Gazette* says:—"The recent bank meetings have given an opportunity to those who may be supposed to have the best possible means of information in relation to the commerce of the country, of expressing their opinion as to the commercial prospects of the Dominion. We are glad to find that there is a remarkable concurrence of opinion as to the improvement in trade, and as to the prospects of the continuance of that improvement."

A scarcity of salmon is reported by anglers on Restigouche and Metapedia rivers, New Brunswick.

The Methodist Conference.

The Conference now in session in Montreal is the seventh annual session of the New Brunswick and Prince Edward Island Conference of the Methodist Church of Canada. This Conference, the *St. John Sun* says, was inaugurated at Charlottetown, P. E. I., July 3rd, 1874, the first President being the Rev. Henry Pope, D. D. The sessions have been held as follows:—At Charlottetown in '74, St. John in '75, St. Stephen in '76, Fredericton in '77, Sackville in '78, and Charlottetown in '79. The successive Presidents were: Rev. Dr. Pope, Rev. D. D. Currie, Rev. Robert Duncan, Rev. John Prince, Rev. Joseph Hart and Rev. H. McKeown. The Secretaries, in order of succession, were: Revs. D. D. Currie, Robert Duncan, Howard Sprague (3 years), C. H. Paisely and F. W. Harrison.

Washington Letter.

BUSINESS PROSPERITY.—THE NATIONAL CONVENTIONS.—NEW POLICY TOWARDS MEXICO, ETC.

WASHINGTON, D. C., June 21, 1880.

The President has gone West; and Secretary Sherman South, each for a short time. The President will make a tour of the Pacific States this summer, and all the members of the Cabinet will be absent for a time.

Secretary Sherman, before going away, expressed great satisfaction with the financial situation, and with business prospects throughout the country. Probably he is the best informed man in the Union on all subjects connected with our material interests.

Washingtonians feel special interest in National Conventions, of course, as most of them are in some way immediately concerned in Government proceedings. Chicago caused more commotion here than elsewhere, and Cincinnati promises to eclipse even that. The withdrawal of Messrs. Seymour and Tilden brings General Hancock and others, well known in Washington, to the front. The preference here, I think, is for Hancock, both because of personal liking for the man, and because he is regarded as "available."

Captain Howgate's vessel, the *Gulvaire*, which leaves to-day to establish a colony in the northern regions for Polar explorations, goes entirely under private auspices. The Government does not recognize the vessel or the project. One naval officer will go on the vessel, having received leave of absence.

That municipal corruption is not always the result of suffrage seems to be shown by the recent finding of over thirty indictments in connection with our District of Columbia affairs. As is known there is no voting here. The form of government is as much a pure despotism as any in Asia. Several officials were found to be in a collision with outside parties, and a great lack of executive care was shown.

The change in this administration's manner of dealing with Mexico is strikingly shown by late events. On Saturday prompt orders will be given to prevent a raid upon Mexican Territory, and it has just been decided not to permit our troops to follow Indians across the border. Three years ago the administration adopted such a course towards Mexico that only the helpless condition of that country prevented a war. The change is at once creditable to the United States and gratifying to both countries.

There was a report here this morning that correspondence had passed between delegates from different Southern States with a view to united support of General Hancock. The leader of the Hancock, the leader of the Hancock "boom" in this city denies any knowledge of such correspondence.

A small piece of white stave of a barrel five inches by three, was picked up at Cow Bay on the 21st inst. On the outer side was legibly written in pencil the following:
Atlanta going down, April 12th, 1880.
No hope. Send this to Mrs. Mary White, Piers, Sussex.
(Signed) JAMES WHITE.

Young Carnell, who found it, took the piece of wood to Admiral Sir Leopold McClintock. It has every appearance of being genuine.

MACKEREL.—The seines and nets at Prospect were struck and filled on Saturday night by a very large school of mackerel. Experienced fishers say that they never knew so many to come in at once. Some of the seines were carried away by the sheer weight of the fish. The American schooner "Orient," of Gloucester, which arrived yesterday, stepped a hundred barrels of mackerel with a purse seine on Saturday, off this harbor.—*Hz. Chronicle*.

FREIGHTS.—Intelligence was received yesterday that oil freights in New York had advanced 6d. and grain freights 3d. A telegram was received here from Montreal yesterday morning offering £6 for a 5,000 qr. bark from Montreal to Cork for orders.—*St. John Sun*.

Mr. William Bryden, formerly editor and proprietor of the *Liverpool, N. S. "Advertiser,"* who recently went out to Arizona with his family, writes that he is thoroughly disgusted with that country, and will immediately return to his native country.
