ABSOLUTE PURITY.

THE following analyses (made by the Domin-
ion Analyst) of three BAKING POWDERS
sold in this market should put a stop to the
unjust efforts of the Royal to mislead the public
as to its being the only pure Powder. These im-
partial tests show that other Powders are as pure
and wholesome:

W. SAUNDERS, Dom. Analyst, St. John, N. B.
reports:

Royal—Contains Alkaline Carbonates—a mixture
consisting mainly of Bicarbonate of Soda
and Cream of Tartar—adulterated with about
20 per cent. of Starch.

W. F. BEST, Dom. Analyst, St. John, N. B.
reports:

Pure Gold—Contains Cream of Tartar, Carbon-
ate of Soda—fresh and pure.

(Nov. 19, 1882—Not adulterated
same as usual.

April 7, 1883—Not adulterated
same as usual.

June 4, 1884—Fresh and pure;
same composition as usual.

MAYNARD BOWMAN, Dom. Analyst, Halifax,
N. S., reports:

WOODILL'S
WOODILL'S
WOODILL'S

WOODILL'S German Baking Powder has a
reputation for purity and wholesomeness now
nearly 30 years.

Apply to James H. Roddin, Solicitor, Charlottetown.

LETTERS TO THE EDITOR.

Kingston School.

MR. J. MACDUGALL, TEACHER.

SIR,—The semi-annual examination
of Kingston School (South Wiltshire)
was held last week in the Methodist Church,
which is within a short distance of the
school house. This was done because the
school room was too small for the occasion.
There were present sixty pupils and forty
visitors. After the examination an enter-
tainment, consisting of readings, singing,
recitations and dialogues, was given by the
pupils. Then several prizes were distributed
among the deserving pupils, after which
they were addressed by two gentlemen,
who spoke in very high terms of what they
had just witnessed. It was closed by sing-
ing "God save the Queen."
Yours &c.,
GEORGE CRUWYS,
Sec'y of Trustees.

June 28, 1886.

The "Dodger" Question.

SIR,—Mr. Richard Walsh has deemed it
proper to drag my name into the present
political contest, in connection with some
circular or "dodger," of which he says: "I
wish to say that the circular is genuine, and
was adopted in the Orange Hall, Charlottetown,
on the 15th of April last."

I have not taken any active part in the
present political campaign, and, therefore,
I think it does not savor of the gentlemen
for Mr. Walsh to bring my name into his
party's petty squabbles. When Mr.
Walsh assures the public that the circular
of which he speaks, was adopted by certain
parties, whose names he mentions in his
letter, in the Orange Hall, on the 15th of
April last, he is talking of a matter concern-
ing which he certainly cannot know any-
thing. I emphatically deny that any such
meeting took place. I am inclined to be-
lieve that some knavish wag has been
amusing himself with Mr. Walsh's gullibility.

I call upon Mr. Walsh for his proffered
proof.
Yours,
J. M. DUNCAN.

June 29th, 1886.

Baking Powder vs. Cream of Tartar.

It will not help the matter any if, to
avoid the impurities and poisons in the
cheap baking powders, the housekeeper
returns to the use of cream of tartar and
soda. The cream of tartar of the present
day as found on sale at the grocers, is quite
as impure as many of the baking powders.
Tests made by the public analysts have de-
veloped the most astonishing venality on
the part of cream of tartar manufacturers
and vendors. Twenty-seven samples, claimed
by dealers to be pure, were analyzed. They
were found to contain from three to ninety-
three per cent. of alum, lime, etc. Samples
of soda analyzed showed the same extent of
adulteration. Not only is it unsafe to use
such leavening agents in bread, biscuit or
cake, because of their deadly effects upon
the system, but they cannot be relied upon
to produce light food. The result of their
use will be heavy bread, yellow or bitter
biscuit and cake.

Most of the baking powders and bread
preparations of the market are made from
the very cream of tartar above described, or
from alum, which is poison, or from phos-
phates derived by disgusting processes from
the solution of old bones in sulphuric acid,
so that their use and the use of the adulter-
ated and impure cream of tartar are attend-
ed with the same dangerous or unsatisfactory
results.

The only way to overcome all difficulties
attendant upon the use of a leavening
agent would seem to be in the selection of
a baking powder of a thoroughly well-
established reputation, whose absolute
purity, wholesomeness, and effective power
as a leavening agent have been confirmed
beyond contradiction. The Royal Baking
Powder unquestionably meets the mark.
Indeed, it has been found to be the only
baking powder upon the market that is
free from lime, alum and phosphates, and
chemically pure. Prof. Mott, the United
States' Government chemist, has explained
the reason of this absolute purity. It
exists in the new methods of refining cream
of tartar, owned and employed exclusively
by the Royal Baking Powder Company, by
which only the chemically pure article
is produced. A portion of Prof. Mott's
report is worthy of reproduction in this
connection:

"The Royal Baking Powder is absolutely
pure, for I have so found it in many tests
made both for them and the U. S. Govern-
ment. I will go still further and state that
because of the facilities that Company have
for obtaining perfectly pure cream of tar-
ter, and for other reasons depending upon
the proper proportions of the same, and the
method of its preparation, the Royal
Baking Powder is undoubtedly the purest
and most reliable baking powder offered to
the public."
"HENRY A. MOTT, Ph. D.,
"U. S. Government Chemist.

Horsford's Acid Phosphate.

FOR OVERWORKED FEMALES.

Dr. J. P. Cowan, Ashland, O., says: "It
proves satisfactory as a nerve tonic; also in
dyspeptic conditions of the stomach, with
general debility, such as we find in overwork-
ed females, with nervous headache and its ac-
companiments."

RACES POSTPONED.—The races advertised to
take place at Upton Park on Dominion Day
are postponed until Thursday, July 15th,
when it is expected the best races ever seen on
the Island will take place, as a large number
of well-matched horses are in training.
June 21—12av

From Limb to Limb.

While playing in Lord & Henderson's
mill, Ottawa, on the morning of the 26th,
a boy named Godrol Larin, who had been
frequently forbidden to catch hold of a re-
volving shaft and swing himself slowly
around in a contrary direction, did so, al-
though directly warned by the foreman.
This shaft, which is about two inches in
diameter, was enclosed by a few planks
nailed on top of one another. The top
plank was split and possessed a sharp edge.
This rude fence was about four feet high.
The youth clambered over and curled him-
self round the shaft. His coat sleeve be-
came entangled in some way, and in an-
other moment he was being swung round
at a terrible rate in a contrary direction.
At each rotation his legs came down on the
sharp-edged plank with terrible force,
and after turning round a few times the left
leg was torn off below the knee. With such
violence was the limb severed that it was
thrown ten feet on to some planks. The
awful rotation still continued, and the next
round the other leg was torn off just above
the knee. This limb fell down a trap hole
into the river. The only spectator quickly
stopped the engines. When removed it was
found that the boy's body was dreadfully
crushed and the shoulder broken. He
died shortly afterwards in intense agony.

Scott's Emulsion of Pure Cod Liver Oil, with Hypophosphites

Is more reliable as an agent in the cure of
Consumption, Chronic Coughs and Emacia-
tion, than any remedy known to medical
science. It is so prepared that the rotteness
of these two most valuable specifics is largely
increased. It is also very palatable.

The average of earnings per head in the
United Kingdom is £35 4s., and exceeds
that in the United States (£27 4s.) and that
in Canada (£26 18s.). But it is actually ex-
ceeded by the average in Australia, which
reaches apparently the amount of £43 4s.
per head, and is the highest in the world.
Still the rate of earnings in the new coun-
tries founded by the Anglo-Saxon race ap-
proximates to that of the mother-land; but
the average rate of the Continent of Europe
is only £18 1s. In other words, the British
rate is more than double. France is the
only European country which at all ap-
proaches the United Kingdom in this re-
spect, and together with France might be
classed the little countries of Belgium, Hol-
land and Denmark.
