We Dont. Claim

To be able to suit all who are suffering with their eyes, but we know of a good many people who have suffered incessant headache, pain in the eyes, etc, who attribute their relief to the wearing of properly fitted glasses. We are here to help you if possible.

G. H. TAYLOR

Jeweler and Optician. North Side Queen Square.

IS THE ATMOSPHERE DYING?

French Scientists Contend That the Earth Will Become a Second Moon.

The latest startling information from the scientists is that our atmosphere is leaving us. That is bad. We can't get along without more or less atmosphere long at a time. Shutting off the supply of atmosphere is what causes so many to end their days abruptly on the scaffold and by drowning.

But the plague about these scientific chaps is that whenever they make a statement they undertake to prove it, and so render us more uncomfortable. Two French scientists, Besancon and Hermite, have been conducting a series of experiments to prove that the earth is slowly but surely losing its atmospheric envelope, just as the moon has done. The only consolation to be derived from their report is that there will be enough air to go around for a few million years, anyway, so that no one need lose any sleep for fear that his wind will be shut off before morning.

These scientists have been experimenting at a great height above the earth's surface, using a balloon or airship known as an aerophile.

It is conical in shape. It is almost sharp pointed at one end, while the other is formed of a steel cap which fits over an aperture through which the gas passes from the retort into the receiver when the balloon is in process of being filled.

Below the reservoir hangs a double platform, which looks not unlike the old fashioned hanging bookcase. In the front of the top section of the platform is an instrument which registers the speed which the aerophile is making, while just back of it is a device called the meteorograph, which registers the changes in the atmosphere. A dial registers the highest point attained, while another mechanism records the intermediate altitudes.

In the rear of the platform and attached to both sections is an automatic camera that takes accurate photographs of atmospheric scenes and conditions at different heights from the earth. There is also an apparatus that imprisons specimens of air at different altitudes. Its reservoirs, when the aerophile leaves the earth, are airtight and exhausted. Therefore when a reservoir is opened at a desired height there is nothing to mix with the specimen of air that rushes into it.

The latest in this series of experiments with the aerophile was made a few days ago and resulted most successfully. The aerophile rose with extraordinary rapidity to an immense height, fully 10,000 meters. The highest temperature recorded was 60 degrees.

The balloon remained in the air two hours and traveled a distance of 102 kilometers. All the recording apparatus worked successfully, and, while the results have not been definitely announced in all particulars, they in the minds of many scientists establish the fact that the inventors have contended for—that the balloon will throw startling light on the question of atmospheric disappearance.

The aerophile, as the balloon has been named, is sometimes sent aloft merely arranged so that at a certain period of time the gas valve will be partially opened, the gas escape and the monster settle to the earth. At other times it is like the captive balloon sent aloft at the end of a great pile of rope and pulled down whenever the experimenters desire. It is, however, only when the invention is permitted to soar to great height that there is a possibility of securing the results which the scientists hope for.

The importance of the facts learned from experiment with the balloon, scientists say, can hardly be overestimated. They indicate, it is thought, the conditions which will prevail at the end of the world. The atmosphere mingles continually with the water and the rocks, and by this action continually diminishes its density. Thus its gauzy envelope which surrounds us is brought closer and reduced, and one day, say the scientists, it will without doubt disappear completely, as it has already done from the moon.

It should be stated that the apparatus which the balloon contains for securing specimens of the rarefied air at great heights is the idea of M. Cailletet. This has proved the most successful feature, for it has worked to a charm, and the results of the analyses of the air it contains will from time to time indicate precisely the exact changes that have taken place in the atmosphere.—St. Louis Post-Dispatch.

Sovereign Cocoa Wine is pleasant to take, is certain and gratifying in its effect in cases of loss of sleep, and enervation.

Wax Candles for Jubilee illumination purposes for sale at Beer & Gott's. 140 31.

PUBLIC NOTICE.

Public Notice is hereby given that application will be made to the Parliament of Canada at the next session thereof, for an Act to incorporate The Dominion Building and Loan Association of the City of Toronto, in the Province of Ontario, a Building Society already incorporated under chapter 189 of the Revised Statutes of Ontario 1887, for the purpose of enabling the said Association to carry on business anywhere in the Dominion of Canada, with all the powers of a Loan Company and Building Society.

Dated at the City of Toronto aforesaid, this 1st day of February, A. D. 1897. M. A. DONNEL & BOLAND, Toronto Street, Toronto, Solicitors for the said Applicants dylaw31lmay31

EXACT COPY OF WRAPPER.

Castoria is put up in one-size bottles only. It is not sold in bulk. Don't allow anyone to sell you anything else on the plea or promise that it is "just as good" and "will answer every purpose." See that you get C-A-S-T-O-R-I-A.

The fac-simile signature of CHARLES H. HUTCHESON is on every wrapper.

It Costs Nothing

to have your eyes examined. It is very injurious to to persist in doing without glasses when you feel the need of them. We can refer to many of our patrons who have been greatly helped by properly fitted glasses.

G F HUTCHESON, Jeweler & Optician  
QUEEN STREET.

Free Corn! Free Corn

Farmers you will have corn free of duty now, but you still require implements to sow and clean it with.

QUEEN CORN PLANTER AND PERFECTION WEEDER

Our Planter sows from 18 to 50 lbs. per acre, with an arm bell to tell when the seed is running short. A man can sow with one horse about 8 acres per day.

OUR PERFECTION WEEDER cleans 3 drills at once and thoroughly takes the weeds out of corn, potatoe or turnip patch; it is the best weeder yet made for root crops. Perfect working guaranteed.

Your inspection of these machines is desired as they are something entirely new.

FINLAYSON & MCKINNON
