KNOWLEDGE

Brings comfort and improvement and tends to personal enjoyment when rightly used. The man, who lives less than others and enjoys life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embodied in the remedy, Syrup of Figs.

Its excellence is due to its presenting in the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect laxative, effectually cleansing the system, ridding it of colds, headaches and fevers and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession, because it acts on the Kidneys, Liver and Bowels without weakening them and it is perfectly free from every objectionable substance.

Syrup of Figs is for sale by all druggists in 75c. bottles, but it is manufactured by the California Fig Syrup Co. only, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered.

For sale by W. H. Watson, druggist Charlottetown.

PROSPECTS OF THE MARKETS.

New York advices state that the decrease of corn in the States will be offset by the increase in wheat. It is expected that the advance in the price of corn will be fully thirty per cent, and oats, though low at first, may be a fairly high price late in the season or next spring. The opinion gains ground that the aggregate supply of wheat from all sources will be the largest in the world's history. The blessing of a cheap loaf is therefore assured, and grain-generally, will probably rule low.

No regular price has yet been offered for oats in the local market. Practically there have been no sales, no offerings and no sales. There is still a considerable quantity of last year's crop in the hands of dealers; and for the occasional load of new oats brought in, irregular prices have been given.

In this connection we have again to point out the necessity that exists for "cleaner grain." We grow a superior quality of oats, but careless farmers and careless buyers have greatly lowered its character in the British and French markets. It has been suggested that an inspector ought to be appointed for each of our principal shipping ports, and that not a bushel should be shipped without inspection. But this plan seems to be impracticable in view of the thousands of dollars we have seen and felt the advantage of carefulness in respect to cheese: it would pay to be equally careful in the production and preparation of everything else that we have to sell.

This remark applies to eggs, particularly, at this juncture. Many of our farmers had been holding their eggs in anticipation of a favorable change in the United States tariff. The result is that a large quantity have gone forward to Boston in bad condition, and P. E. Island eggs are in bad odor and altogether had repate in that market. The consequence is a considerably lower price than might be obtained at this juncture if none but good eggs had been sold. The ruling price for good fresh laid eggs in Charlottetown, to-day, is ten cents per dozen.

We are glad to note that the pork market in the Upper Provinces is reported "active" and that there is a great and recently been a rise in the price of cheese.

MR. WILLIAM REYNOLDS, INTERNATIONAL SUPT. OF S. S. ORGANIZATION.

Mr. Reynolds, who is shortly expected on this Island, is from Peoria, Illinois, where for many years he had an honorable business career and gave largely of his time and means to the Lord's work. During the American civil war he stood shoulder to shoulder in the Christian Commission with the noble workers, B. F. Jacobs and Dwight L. Moody. As the war was closing, Moody said, "What shall we set about next?" Mr. Jacobs replied, "Let's go into Sunday School work."

These Soldiers of the Cross canvassed that great State of Illinois, advocating more and better Sunday School work. A portion remarkable for its indifference was allotted to Mr. Reynolds. In this cause he paid the three met at Springfield, the political capital early one morning. They entered a church by a side door, and proceeded to hold a prayer meeting. The pastor heard them, and coming quietly saw three men on their knees in the pulpit with their hands on the open Bible. When they rose, he said, "Brethren I don't know who you are, but in the name of God, I welcome you." That committee of four quickly made plans, and the three were soon found distributing handbills through the streets. A series of meetings were held, and a Sunday revival has followed which has made Illinois a Sunday School light-house to the continent.

Mr. Reynolds was a superintendent for twenty-seven years, and his wife has been a little mission school and tended its growth till it became the strong and benevolent Calvary Presbyterian Church in Peoria. Those who are of value to their own church are the greatest to the church universal. He was chosen president of the international from 1887 to 1890. At the urgent request of men from many denominations, he gave up his business, and travels from the Gulf of Mexico to Alaska, from Florida to the Gulf of St. Lawrence, organizing and strengthening Sunday School work everywhere. He has twice been to New Brunswick and Nova Scotia, and no one is more welcome.

Let Christians pray that he may come to us as a Barnabas, full of the Holy Ghost, and serving the Grace of God may encourage us to further work.

LONDON, Sept. 5.—The trades union congress at Norwich to-day passed a resolution censuring Sir William Harcourt, chancellor of the exchequer, for the failure of the government to carry out the clause of the Newcastle programme relating to the payment of members of the house of commons. The vote of censure carried, 141 to 103. A resolution favoring federation of trades union councils was carried. The parliamentary committee was instructed to begin an agitation to the end of getting the mines act amended to forbid employment under ground for more than six hours.

HOW A CHILD SHOULD SIT.

In sitting, the child must be provided with a comfortable chair, adapted to his size and height, writes Elizabeth Scovil in a very valuable article on "The Physical Culture of Children" in the September Ladies' Home Journal. He should be made to sit well back in it, and not on the edge when he has to occupy it for any length of time. The back should, if possible, give support to the spine of the back as well as the shoulders. In working at a desk it should be of such a height that he can easily see his work when sitting erect by bending his head, instead of inclining the body at the hip joint. The upright position helps to expand the chest and keep the shoulders in their place. Its use soon becomes habitual if it is insisted upon.

In walking the head should not be brought down too far. A part of the weight of the body belongs upon the toes, and when a due proportion is thrown there it gives an elasticity to the gait which is lost when it is not properly distributed. Walking with the heels raised from the ground is a good exercise although a fatiguing one. Hoping on each foot alternately is another. Dancing is a valuable accomplishment for children. The consciousness of being able to dance well gives ease and self-possession to many a young man and woman who would otherwise be bashful and awkward. Little people usually delight in the rhythmic motion, and if it is not combined with late hours it does them nothing but good.

REMARKABLE CYCLING.

The recent twenty-four hours cycling race for the Cucca Cup, England, resulted in a decisive victory for F. W. Shorland, of the North Road Club. Shorland having been successful in 1892 and 1893, thus securing the cup, which is valued at 100 guineas, outright. So great was the excitement aroused by the contest, that when the race started at eight o'clock on Friday evening about 100 miles and all world's records from the thirtieth hour to the finish of the race. His total was 460 miles, 1,296 yards. At the conclusion of the race the crowd swarmed all over the track, and so great was the desire to get near and congratulate the winner, that it required the services of a number of police constables to escort him safely to his dressing tent. Shorland's only rest was one of nine minutes, when he had been riding about twelve hours.

TROUBLES THAT NEVER COME.

Some one has said, "I have been surrounded by troubles all my life long, but there is a curious thing about them—none of them ever happened!" quotes Mrs. Van Koert Schuyler in an earnest appeal to women on "Living Beyond Their Strength" in the September Ladies' Home Journal.

I once heard of a lady who wrote down in order the particular fears and anxieties which were harassing her, inclosed the paper and sealed it, hoping by this kind of mechanical contrivance to be enabled in some sort to dismiss the subject from her mind. The paper was put away and forgotten. Several months later it came to light when she found that not one of the fears therein set down had been realized, and the difficulties had all been smoothed away before she came to the time for their solution.

Chd. Sept. 5.—Schr. Daniel Roberts Wallace, bal.

A dispatch from Little Rock, Ark., says the largest and most dangerous gang of counterfeiters ever organized in that country has been broken up by United States secret service detectives.

To Messrs PUTNEY EMULSION COMPANY, Halifax, N. S. MONTREAL, Jan. 16th.

Last summer my little girl was weak, delicate and nervous, and did not rest well at night. I gave her less than two bottles of your EMULSION, according to directions, and soon after she began to take it, she improved very fast in strength, slept well at night and lost much of that nervousness with which she had been troubled, and gained in flesh as well as strength, and has never been so well as since she took a course of your EMULSION.

Yours truly, C. A. HUMPHREY, Head Master Royal Arthur School.

Consumption—Low Condition Wonderful Results From Taking Hood's Sarsaparilla.

Miss Hannah Wyatt Toronto, Ont. "Four years ago while in the old country (England), my daughter Hannah was sent away from the hospital, in a very low condition with consumption of the lungs and bowels, and weak action of the heart. The trip across the water to this country seemed to make her feel better for a while. Then she began to get worse, and for 14 weeks she was unable to get out of bed. She grew worse for five months and lost the use of her limbs and lower part of body and if she sat up in bed had to be propped up with pillows. Physicians

Said She Was Past All Help and wanted me to send her the "Home for Invalids." But I said as long as I could hold my hand up she should not go. We then began
