HARVESTS MAMMOTH BEET - Elmer Hogan of Kirkcra, has harvested a mammoth beet weighing 8 1/2 lbs. and measuring 24 inches around, which he grew in his father's garden this summer. The specimen, which is of the variety known as "Detroit Dark Red" is on display at William Waddell's store at Crapaud, P.E.I.

IN MEMORIAM

In loving memory of my dear Husband,

WENDELL MacLEOD

who died in an accident one year ago November 20th.

I have lost my soul's companion, A life linked with my own; And day by day I miss him more, As I walk through life alone.

More and more each day I miss him; Friends may think the wound is healed, But they little know the sorrow Lies within my heart concealed.

But some sweet day we'll meet again, Beyond the toil and strife, And clasp each other's hand once more, In Heaven, that happy life.

Ever Missed and Loved by His Wife, Ria.

Strange But True

(Continued from Page 13)

don't believe it? Then listen to this: "An important rocket test will be carried out this summer by the society for rocket research. Five model mail rockets will be shot into space near Bremen, Germany, flying only a short distance for test purposes. The society will then combine the best qualities of

each model and build one large mail rocket to carry first class to the New World."

Nearly 40 years ago - April 14, 1912, the proud Titanic crashed an iceberg. The big luxury liner went down on her maiden voyage with a loss of 1,517 lives.

The North Atlantic shipping lanes are now comparatively safe from such disasters thanks to the patrolling service and to broadcasts which go out twice daily to vessels

that may be sailing in the area.

In the same place and manner as he accidentally killed his 3-year-old son three years ago, Rancher Arthur Matson, of Penngrove, California, caused the death of his second son.

In each accident the father was backing his truck in his farmyard when the boys fell under the wheels. Three persons have been given glands transplanted from premature babies to turn out hormones

for better health.

It is an amazing experiment in giving human beings "spare parts". Little pieces of glands were taken from the babies and put into stomach muscles of two men and a woman. The males got adrenal glands because their own had stopped making hormones. The female got a thyroid gland, after her own deceased one was removed.

Previous animal tests showed the new gland bits could be safely

transplanted and kept alive to make hormones. It is too early to predict just how effective the operation will be with humans. The experiments were disclosed in reports of research at Yale University Medical School.

Five hundred feet under the Ozark Mountains at Bella Vista, Ark., upwards of 2000 persons can "trip the light fantastic toe" at one time in the world's largest underground

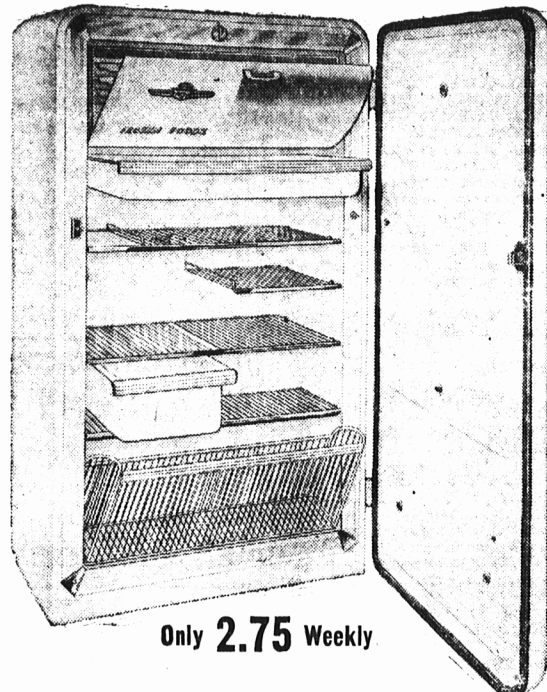

night club. Wonderland Cave is air-conditioned by nature. Just how the frequently served as a hide-out for the notorious outlaw, Jesse James.

The tallest one-room house on earth is inside of a tree just outside of Barberville, Calif. The room is 50 feet high with floor space 21 X 27 feet. Its walls built 4000 years ago.
