

The following four pages of the SUN are an idea conceived by Student Services and approved by the Student Union Executive. The subject material deals with the grads at UPEI from a particular high school. Extra copies of this week's paper are being distributed at the school in question in hopes of attracting students there to UPEI and of enhancing the image of the University, the Student Union, and the student newspaper.

## What's new about university ...

From the day you register until the moment you finish your semester exams, you will be amazed at how different high school and university are.

Although at university most full time students take 5 courses; each for 3 hours a week, and some courses have additional hours of lab work; you will find yourself wondering what to do with so much free time. You soon learn to overcome this problem. In high school you spend more hours in class than you do studying; in university you spend more time studying than you do in class. Besides studying you can bide your time socializing, playing sports, relaxing, shopping, watching the

Flintstones while you eat your lunch,...

If you think all the free time is a SHOCK wait until your first textbook shopping expedition at the bookstore! Books and supplies usually cost between \$100 and \$200. Used textbooks can be obtained at lower prices from other students. If you hope to sell yours, don't treat 'em like you did in high school.

More changes: You don't go to this school on a bus, you have to drag yourself to class; and you don't have class 8:00 to 3:00 Monday to Friday. Each person's schedule is different. You can schedule early classes to get it over with- but you may find you don't get much out of an 8:30 class. If you like to sleep in, you

can schedule your classes to start at 11:30, or later. Some people manage to have all their classes either on Monday, Wednesday, and Friday, or on Tuesday and Thursday. Most people have about 3 hours of classes per day. Initially you may be in classes where you don't know anyone (that's new to people from K-town where you usually know everybody in all your classes.) Through time, friendliness overcomes shyness, and you begin to know the person beside you, the one in front of you, the 2 clowns behind ...

Attendance is not compulsory. In a large class, profs don't know if you never go! They don't call the roll; they don't send you to the office if you're late. (You

can even chew gum in class to start at 11:30, or later. A prof won't call your mommy if you fail to hand in an assignment. The responsibilities of going to class and of studying are yours alone. There's nobody to nag you. Most people make a real effort to go to class and to keep up with their work. We are paying money to go to university, not because we have to go, but because we want to go. What you achieve at any university is what you make of it yourself. University is a valuable experience that can't be traded or sold.
