

OUR OWN COUNTRY, a descriptive and illustrated portfolio on America, is without doubt, the very best portfolio series that has yet come to hand. No need to advertise its superior attractiveness. A sample copy, which may be seen either at this office or at R. H. Mason's news stand, will convince anyone of the first-class order of Our Own Country. The series consists of 20 parts, but no one need purchase more than one part if they do not like the work. Each sample copy has a coupon attached on first page. The price is ten cents per part.

LOCAL AND OTHER ITEMS.

MASTERS A SPECIALTY.—Beer Bros. S. O. E. B. S.—Special R. R. meeting to-night.

THE WATKINS CART WAS OUT this morning.

POLICE COURT.—This morning one drunk, Daniel McNevin, was fined \$2 or 10 days.

FOR DRILL.—No. 1 Company, Garrison Artillery, will meet for drill this evening at 8 o'clock.

LOBSTERS.—One boat at Bull Creek factory, Lot 46, took in 1100 lobsters yesterday. Small catches are being taken daily at several other factories in the eastern parts of the Island.

FOR HALIFAX.—The steamer Fastnet, Captain Churchill, left on return to Halifax, via Summerside, about half past three this morning. She had a good general cargo and one passenger—Mr. H. C. Creighton.

CIVIC.—The regular monthly meeting of the City Council will be held on Monday evening next. At this meeting the estimates for the current year will be submitted and other important business transacted.

THE CABLE REPAIRED.—The telephone cable damaged a few days ago, was repaired yesterday by Mr. A. E. Morrison, of the Anglo-American Telegraph Company, and the line between Charlottetown and Belfast is again in working order.

COLD STORAGE.—We learn that the premises on Water Street formerly occupied by the Merchants Bank of P. E. Island, will be used this season for the cold storage of cheese awaiting the market. Mr. W. L. McLaren will be in charge.

FIRE.—The alarm this morning about a quarter of 8 o'clock was for a fire in Mr. John Bulger's premises, Water Street. The fire was on the roof, which was considerably damaged. It is supposed to have been caused by a spark from the chimney.

DEVELOPER'S FOR MAY.—The May number of Donahoe's Magazine has been written. As usual, it is replete with well-illustrated and interesting miscellany. The leading article entitled "Is popular government to fall in America?" is attracting great attention, and is well worthy of careful perusal.

LEG BROKEN.—We regret to hear that Ruel Clark, the 15 year old son of Mr. S. C. Clarke, Mount Stewart, had his left leg broken yesterday about four inches above the knee. It appears that a horse which young Clark was driving ran away, and the wheel of the cart passed over the lad's leg, causing the break.

LIVE STOCK SHIPMENTS.—The Summerside Farmer says: Some live stock was part of the cargo of the Northumberland on Tuesday. Mr. Chas. A. McNutt, of Kensington, shipped to the Leannans, of Halifax, 5 live hogs and 23 sheep, and Mr. E. Tranter took away three horses for St. George, N. B. On the previous morning Mr. J. H. Henry sent away a fine horse to Moncton, and Mr. John McCook took five for Yarmouth, N. S. On Wednesday morning Messrs. J. & A. McDonald shipped 23 fat cattle and 6 sheep for the St. John Market.

CHEESE MAKERS HERE.—Four cheese makers, Messrs. W. L. McLaren, J. R. Moore, J. Burgess and Albert Raby, arrived here last evening from Ottawa to enter upon the season's work. Messrs. Moore and Burgess have been in charge of Ontario creameries during the past winter, and are to manage the dairy stations at New Perth and Dunk River for the coming summer, while Mr. Raby takes charge of the Kensington station. The gentlemen who are to take charge of the other stations are expected in a few days. The factories will probably begin work about 1st June.

MEETING OF PRESBYTERY.—At the meeting of Presbytery held at Summerside a day or two ago, the following changes in the commissionaries to the General Assembly were made: Rev. J. K. Fraser vice Rev. W. P. Archibald, resigned, Mr. Alexander Mackinnon vice Hon. D. Laird, accepted the representation of a Presbytery in the Northwest. Arrangements were made for the ordination of Mr. J. F. McCurdy at Hampton church, May 22d, at 6.30 p. m. The resignation of Rev. G. B. Macleod, of Charlottetown, was accepted, and Rev. T. F. Fullerton was appointed to exchange with Mr. Macleod, May 15th, and cite the congregation to appear for their interests at Hampton, May 22nd.

A STRANGE DISEASE.—We hear with regret that Mr. Lemuel Hyde, of West River, recently lost seven valuable cows, worth about \$200. The disease was contracted with some strange disease, and speedily succumbed. The Summerside Farmer says: In some parts of Beloeque a disease has broken out among the cattle. Mr. Eben Clark's herd was the first to be affected and two have died, but the others are believed to be getting well. Some other herds are believed to be suffering from the same disease. It was surmised by some that the disease was contagious, but there is, Mr. J. J. Gourlie, V. S., informs us, absolutely no truth in such a rumor. Mr. Gourlie examined part of the lung of the first animal that died, and according to the symptoms told him by Mr. Clark, thinks the disease may be anthrax. A similar disease is prevalent among the cattle in some parts of New Brunswick, and several valuable animals have perished. The Telegraph says it is likely the disease is cow-pox.

WOOL CREPON.—We are showing twelve colorings in this fashionable new Dress Material.

SHOWER-SPOT LAWNS—a very beautiful novelty for Blossoms, etc. Price 20 cents per yard.

OUR new stock is now complete with a very attractive variety of dresses.

BEER BROS.

Weather Bulletin.

Tuesday, May 10, 10 a. m.

Westerly to northerly winds; fine, stationary or a little lower temperature.

PERSONAL. Mr. W. L. McLaren has returned from Ottawa to take charge of the cheese depot in this city. Mr. Perry, Liberal M. P., of P. E. Island, was at the Commercial yesterday and let on his return to Ottawa.—Moncton Times. Dr. and Mrs. Prowse, of Edinburgh, Scotland, arrived here last evening, and are registered at the Hotel Davies. Dr. Prowse is a son of Senator Prowse, of Murray Harbor. Mr. R. M. Dunn, advance agent of Bristol's Educated Horse, is here making arrangements for the appearance of the show in Charlottetown. He is registered at the Queen Hotel. The arrivals at the Queen Hotel yesterday included: Rev. D. R. McLeod, Orwell, Mrs. F. M. M. Beatrice, Upton; Beatrice M. Beatrice, do; W. M. Beatrice, do; W. H. Rolfe, North Ruston; J. R. Moore, Ottawa; J. Burgess, do; W. L. McLaren, New Perth; J. A. Moore, Pownall. There is a party registered at the Hotel Davies yesterday: A. C. Halcom, Hanstport; James Johnston, St. John; A. E. Lambert, Toronto; John Steele, Summerside; LeBoutellier, Montreal; T. W. Mill-ton, do; R. F. Merlin, Halifax; W. B. Reynolds, do; E. W. Hendershot, St. John; F. M. Murray, Montreal; Henry C. Peacock, Bayfield, N. B. This forenoon there were registered: A. J. Finch, Toronto; E. Ross, Quebec. The eightieth birthday of Patrick Donahoe, founder and present owner of the Boston Pilot and Donahoe's Magazine, was celebrated at the Tremont House, Boston, on Tuesday evening. The celebration took the form of a reception and banquet. It is said to have been one of the most notable gatherings of men prominent in politics, business and professions, which has in the old Tremont House in many years. The New York Times' London cable says: Mr. Gladstone's brief visit to London to make a speech eulogising the memory of his physician has been generally treated by the press. He spoke seated in a chair, a thing which London never saw him do before, and though his voice was heard all over the hall, the old light seemed gone out of his face. It was pallid and almost expressionless. He was approached with a suggestion to add time to include a short visit to the House of Commons, but declined almost testily. Reports are current of his having declared never to open his mouth on a political subject again.

NEWS NOTES.

Soft coal has advanced in Chicago from \$2.75 to \$4 per ton.

The great coal strike in Pittsburgh continues with 150,000 men now idle.

Gold continues to be exported from New York. Last week \$5,520,000.00 were exported.

The World's Exhibition at Antwerp is now open and will continue open until November.

A remarkable nugget has been taken out of the Snuggler Mine at Aspen, Col. It weighs 7,700 pounds and contains silver to the value of \$27,000. It is the largest silver nugget ever known and is almost pure.

The Canadian Gazette says, "Canadian horses find such favor in this country that a large export is expected this year. The Glasgow Tramway Company has sent two buyers out to Canada to purchase 4,000, and the horses are being forwarded in batches."

Lord Roseberry's contemplated visit to Birmingham to fight Mr. Chamberlain, like the charge of the Light Brigade, will be magnificent, but it will not be war. The Chamberlain influence in the Birmingham district is one of the most remarkable things in the British political situation.

The pedigree of Thomas A. Edison, the electrician, is largely Canadian. Among the New York loyalists who settled in and near Digby, Nova Scotia, at the close of the Revolutionary war were several of Dutch and some of German extraction. Among these loyalists was John Edison. His name appears first on the Digby records a few years later than those of Samuel and Moses Edison appear. It is believed though there is no positive evidence, that Samuel and Moses were the sons of John. Samuel was the grandfather of the inventor. He, like many Nova Scotians, was attracted by the fertile lands of Upper Canada, and moved there about 1811. His son Samuel jr., went to Ohio, and there the inventor was born.

No other medicine has equalled Hood's Sarsaparilla in the relief it gives in severe cases of dyspepsia, sick headache, etc.

HARRIS & STEWART, LONDON HOUSE.

Charlottetown, May 3, 1894—Jy

ENGLISH LAW REFORM. The London Times, in an article on the death of three Judges—Sir J. James Stephen, Lord Hannan and Lord Bowen—speaks of the necessity of progress in law as well as in other things. It quotes Burke's remark that the practice of the law, though a science which does more to quicken and invigorate the understanding than all the other kinds of learning put together, does not always, except in the highest order of intellects, open and liberalizing the mind, and is even apt to give a tinge to think the substance of business not to be much more important than the forms in which it is conducted. Lord Bowen, however, knew that law "lives and thrives only by well-timed changes; that it gets out of touch with the national life if it is not constantly taking up new elements and throwing off old; and that, instead of being a living organism, it quickly becomes a heap of dry bones unless it is ceaselessly undergoing the changes which living things pass through." The Times is of opinion that it is useless to grovel over current criticisms of the administration of the law. Business men speak disparagingly of the procedure in civil courts as out of date and too dear at the price. "It is impossible that with this temper prevailing among the public, changes should not come. The question is whether they are to be carried out in the face of an appalling resistance, or to be conducted under the guidance of wise, open-minded experts." It is pointed out that modern Judges are exposed to keener criticism than their predecessors, and that some of the old landmarks of the law are being revised, such as the procedure for contempt of court. There are perils ahead, and the Times thinks they cannot be counterbalanced more effectually than by the presence on the bench of such men as Stephen, Hannan and Bowen. "A few such judges as these are better securities for continued respect for the administration of justice than a host of mystic and unscrupulous, any amount of Javelin-wielding, or other circus pomp of Assizes."

SCIENTIFIC SLAUGHTERING.

Very few people have any idea what rigid economy is practised at the great slaughtering plants. Scientific men are constantly engaged in their brains to devise valuable chemical properties as new compounds in materials heretofore wanted or imperfectly utilized, says the Drovers' Journal.

The cross roads butcher who kills a few animals a week, throwing away a large part of the offal, must make a large profit on the meat sold, but modern utilization of by-products makes it to the slaughterer who does business on a large scale could much better afford to sell the meat without profit than to waste what the old-fashioned still butcher could not utilize.

The packing business as at present carried on utilizes a great number of products which were formerly allowed to go to waste. For instance, the stomach of hogs, instead of being sent to the rendering tanks, are now used for the manufacture of pepsin. Pig's feet, cattle's feet, and sheep's and the pit's of hogs, are used for the manufacture of gelatin. The giblets of the cattle are used for making glue. The other parts of the offal from cattle are utilized for the manufacture of oleo-lein, which is a constituent of butterine, and for stearine. Large quantities of the best of the offal are also used for the manufacture of what is known as "neutral," also a constituent of butterine. The intestines are used for sausage casings; the bladders are used to pack partly in the undigested food in the cattle stomachs is pressed and used for fuel; the long ends of the tails of cattle are sold to mattress makers, the horns and hoofs are carefully preserved and sold to the manufacturers of combs, buttons, etc. Many of the large white hooftags go to China, where they are made into jewelry. All of the blood is carefully preserved, coagulated by cooking with steam, then pressed and dried, and used for fertilizer manufacturers. All of the scrap from rendering operations is carefully preserved and dried and sold for fertilizers. Bones are dried and either ground into bone meal or used for the manufacture of bone charcoal, which is afterwards utilized for refining sugar and in some other refining processes.

Nearly every body needs a good medicine. The impurities which have accumulated in the blood during the cold 4 months must be expelled, or when the mild days come, and the effect of bracing air is lost, the body is liable to be overcome by debility or some serious disease. The remarkable success achieved by Hood's Sarsaparilla, and the many words of praise it has received, make it worthy your confidence. We ask you to give this medicine a trial. We are sure it will do you good. Read the testimonials published in behalf of Hood's Sarsaparilla, all from reliable, grateful people. They tell the story.

During the past three or four weeks, according to private despatches, important negotiations have been held in Paris between the Standard Oil interests and representatives of Russian oil companies, resulting in a division of the entire world's market between these two great distributing and producing agents. Territorial division was made, the exact limits of which cannot here be given, but it is said to consist of a line drawn north and south through Europe in a somewhat irregular course. The Standard is to have a monopoly in its part of the British, French, and most of the western portion of Europe, including part of the German empire. The Russian trust will probably be unopposed by competition east of this dividing line and make their own market for the vast territory of Asia.

The spring catch of herring at Bale Verte is reported to have been so large, that the nets could not be raised.

Parkside, 9280, Race Record 2:23 3/4, will be at the Hotel Royal's Races on 9th-10th 11th of May inst.
