Following intermission, John Evans conducted the Alpha Y's Men's Chorus as they sang "Loch Lomond" and "Annie Laurie" with Miss Margaret Rhynes, senior Island Champion dancing the Highland Fling between the song numbers. Strike Turns Millionaires' Playground Into Ghost Town

By NOEL HUDSON NASSAU, Bahamas (Reuters) This deserted millionaires' playground is becoming a ghost town. With the general strike in its 15th day and talks deadlocked, the city wears an air of mourning.

Hotels are shuttered, bars and restaurants boarded up. Deserted are the palm-fringed golden beaches and winding streets, usually crowded with money-free tourists, most of them Americans and Canadians.

Businessmen and tour companies are gravely worried. The tourist trade normally provides more than 95 per cent of the island's revenue and the strike is estimated to be costing \$112,000 a day.

What started with a transport dispute over the lucrative airport traffic has reduced the tourist population — usually about 3,000 at this height of the season — to about 70, with more cancellations coming in every day.

POLITICAL UNREST The general strike is seen as an erupting symptom of political unrest.

The Negro population in this dollar-rich British chain of some 700 islands outnumber the white population by about 10 to 1 yet property restrictions prevent many from voting.

In the 29-member House of Assembly, only eight are Negroes. The islands have been a crown colony since 1787.

Gloomy travel agents see little hope of salvaging the "season." It was learned that a launching was only minutes away Saturday evening at the time that Russia's Sputnik II came sailing over this part of Florida.

Persons on the beaches plainly observed the Soviet satellite in two sweeps.

The repeated delays have made it obvious that the Vanguard program is considerably behind its announced schedule.

President Eisenhower had announced that Vanguard rockets would attempt to launch three small satellites in December and the first fully instrumented 21-inch sphere in March.

There were no launchings in December. It is increasingly doubtful that there will be a Vanguard success this month.

ROCKET FIRING Is Postponed

CAPE CANAVERAL, Fla. (AP) The U.S. Navy Sunday night called off for a few days at least another attempt to launch its Vanguard satellite vehicle.

It acted after a frustrating period of weather and mechanical difficulties extending over much of the last week.

Another launching may be attempted within a few days.

An informed source said launching preparations were suspended "to allow time for correction of mechanical faults which have developed during the weekend."

These preparations were known several times to have almost reached the firing stage.
