# THE DAILY EXAMINER

THE LEADING DAILY NEWSPAPER OF P. E. ISLAND,

Is issued every afternoon, from the office of THE EXAMINER PUBLISHING COMPANY, in the London House Building, Queen Street.

RATES OF SUBSCRIPTION.
(IN ADVANCE)

ONE YEAR.....$4.00
SIX MONTHS.....2.00
THREE MONTHS.....1.00
ONE MONTH.....0.35

Sent post paid to any part of Canada or the United States.

ADVERTISING RATES.

For small advertisements which are ordered for only one or two weeks the charge is 5 cents per inch for the first insertion, and 2½ cents for each continuation. Rate cards are furnished on application at the office. Special contract prices at a reduced rate are quoted for advertisements four inches in size or larger, which are to run for three months or longer.

No special notices inserted unless paid for at the rate of 10 cents per line, and under no circumstances will such paid notices appear in the local column.

Special discounts made on all advertisements connected with Church Fairs, Bazaars, Picnics, etc. No notices will be inserted with the same unless the regular rate of 10 cents per line is paid.

That THE EXAMINER is considered by our Merchants and Manufacturers to be the leading newspaper in P. E. Island, and consequently the most valuable advertising medium through which to make their announcements public, is abundantly proved by the fact that in order to accommodate our advertisers we have been compelled to enlarge the paper to its present size.

THE DAILY EXAMINER is for sale by the following agents:—

R. H. Mason, Post Office, Charlottetown
J. McIntyre Malpeque Road, "
C. Paul, Lower Spring Park Road, "
W. M. Coffin, Grafton Street, "
S. Grey, cor. Water and Prince St. "
D. Chappell, Prince Street, "
Lamar Store, Queen Street, "
Geo. Carter & Co., Queen Street, "
S. Gray, News Stall, P. E. I. Railway, and on the trains.
M. & T. J. Walsh, Eclectic Bookstore, Summerside.
Harry McFarlane, Souris.
Hon. P. Gordon, Georgetown.
D. A. Egan, Mt. Stewart.
G. M. Clarke, Alberton.
Chas. A. Gillis, Orwell Cove.

## The Weekly Examiner

is issued every Friday morning from the publishers' office. It is made up of matter which has appeared in the Daily editions, and is a first-class weekly newspaper—interesting and full of the latest news.

The subscription for THE WEEKLY EXAMINER, post paid to any part of Canada or the United States, is one dollar per year.

Advertising rates on the same scale as given above for THE DAILY EXAMINER.

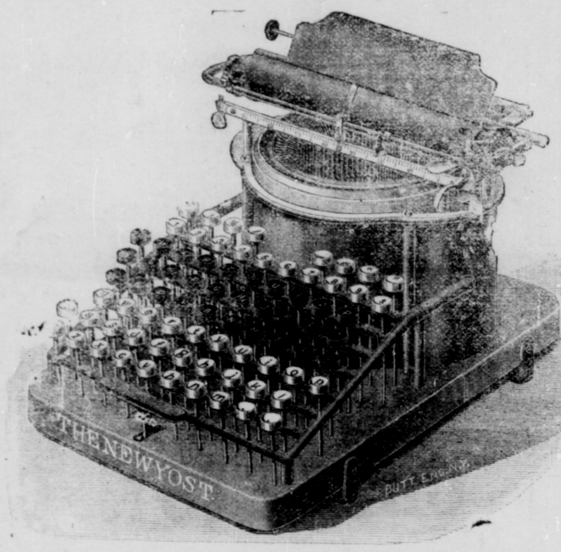
# The Yost Typewriter.



THE NEW YOST

the only Perfect Writing Machine. The Ribbon, the Shift Key and other antiquated devices discarded.

NEW MACHINE,
NEW MANAGEMENT
NEW PRINCIPLES,
NEW PATENTS,
NEW MEN,
NEW LIFE,
NEW BRAINS,
NEW METHODS,
NEW CAPITAL,
The LATEST and BEST.

WHAT MUST GO:—Bad alignment, illegible work, foul ink ribbons, bothersome shift keys, double scales, etc., are no longer to be tolerated or pardoned. The NEW YOST has abolished them, and no other can retain them and live.

THE NEW YOST combines the life-long experience of the inventor, G. W. N. Yost, who invented the "Remington" in 1873, the "Caligraph" in 1880, and the "Yost" in 1889; the latest and best improvements have been added during 1892, making the New Yost an ideal, perfect typewriter. The New Yost prints direct from steel type; its work is never blurred, but is clern cut and beautiful. The alighment is absolutely perfect and permanent. The paper is an ideal success, the best ever applied to a typewriter. The line spacing absolutely perfect.

Send for Illustrated Catalogue to IRA CORNWALL, General Agent for the Maritime Provinces, 134 Prince William St., St. John. or to

Ask for our Catalogues and Circulars.

H. A. A. BRAULT,
oct26 Director.

## SEVEN GREAT WONDERS AT COREA.

**Among Them is a Hovering Stone and an Indestructible Forest.**

A Chinese paper describes the seven wonders which Corea, like unto other Oriental countries, possesses, and which played a conspicuous role in antiquity. The Corean "wonders" consist, first, of a hot mineral spring near Kin Shantao, which is capable of curing sickness and diseases of all sorts. The second wonder is the two wells, one at each end of the peninsula, which have the peculiar characteristic that when one is full the other is empty. The water of the one is intensely bitter, that of the other has a pleasant and sweet taste. The third wonder is a cold cave from which there issues constantly an ice-cold wind, with such force that a strong man is not able to stand up against it. A pine forest which cannot be eradicated constitutes the fourth wonder.

No matter what injury may be done to the roots the young trees spring up again like the phœnix from its ashes. The most remarkable, however, is the fifth wonder—the famous hovering stone—which stands, or rather appears to stand, in front of a palace erected to its honor. This is a massive rectangular block, free on all sides. Two men standing, one on each end, can draw a cord underneath the stone, from side to side, without encountering any obstacle. The sixth wonder is a hot stone which has been lying from time immemorial on the summit of a hill, and evolving a glowing heat. The seventh Corean wonder is a sweating Buddha. This is guarded in a great temple, in whose court for thirty yards on all sides not a single blade of grass grows. No tree, no flower will flourish on the sacred spot, and even wild creatures are careful not to profane it.

## SUPERIOR VITALITY OF INSECTS.

**Eggs Often Uninjured Even After Subjection to Intense Cold.**

The eggs of insects have greater powers of vitality than any others. A case was published of an egg producing an insect eighty years after it must have been laid, and the scientist responsible for this statement thinks the power of vivification may endure in these eggs for an indefinite period. Many eggs of insects are exposed to the air without any covering, and many are sheltered too slightly to be secure from the frost. This, however, they are able to resist, remaining unfrozen, though exposed to the severest cold, or, still more surprising, are uninjured by its intensest action, recovering their vitality even after having been frozen into lumps of ice. On exposing several silk-worm eggs for five hours to a freezing mixture which made Fahrenheit's thermometer fall to 38° below zero Spollanzi found that they were not frozen nor their fertility in the slightest degree impaired. Others were exposed to a degree of 56° below zero without being injured. The quality of the eggs of the snails is, perhaps, even more marvelous. These eggs, desiccated in a furnace until they are scarcely visible, will always remain their original bulk when damped, and the young will be brought forth as though the eggs had never been in any way interfered with. Neither heat nor cold seems to have any injurious effect upon their vitality, for they have been frozen into ice for any length of time and when the ice is melted will be found to be wholly uninjured.—Baltimore American.

**The Cost of Carelessness.**

Familiarity with danger seems to breed, if not a contempt for it, an utter carelessness. We have seen, says the Chattanooga Tradesman, the "Mohawk Dutchman," the celebrated expert with a band scroll saw, rub the ball of his thumb in dirty grease and then cut the grease off with the rapidly running saw as clean as could be done with soap and water. We have seen a man put his finger under a powerful trip hammer in motion just to show how well he could manage the machine. Many other foolish things are done just to "show off." But most of the accidents happen through a carelessness resulting from familiarity. As long as an operator is afraid of his machine he is not apt to get hurt. Many human minds are so constituted that they cannot bear a sustained effort in one direction; that is, cannot be always on the alert in regard to a certain contingency. A train despatcher or switch tender may hold a place for years without ever making a mistake, and at last make a terrible one, from some cause he could not explain. The only way to lessen the number of casualties—they cannot be avoided entirely—is to take all precautions. This is required of the owners if they wish to escape costly damage suits, but when all possible precautions have been taken, one can then only trust to luck.

**Wine Caused the Loss of the Victoria.**

It is now stated on good authority that the fearful disaster which befell the warship Victoria, resulting in the instant destruction of hundreds of lives, is another of the long list of calamities which may be set down to the credit of strong drink. It is said that the fatal order which resulted in the collision with the Camperdown was given in a fit of recklessness superinduced by too much wine drinking. On no other ground, it is said, can it be explained why a man ordinarily so cool, discreet and skilful as Admiral Tryon, should have given an order which the commonest sailors knew could only result in disaster. It is charitable to believe that Admiral Tryon was not in a condition of mind to realize what he was about when he said that "six cables length" instead of eight should be the distance between the ships in that manœuvre. That two cables of difference meant a swift and awful death to hundreds of brave men, including the admiral himself. It was wine that did it and not Admiral Tryon.—Christian at Work.

**A Woman Beheaded.**

A woman was beheaded in Berlin Monday—the first woman to suffer the death penalty there since Berlin was made a kaiserstadt. At 8 o'clock in the morning two warders led her into the courtyard, where the headsman's block had been placed. Half dead with fear the woman was placed beside the block and there supported while the prosecutor read to her the sentence of death. The prisoner was told to kneel, but she apparently did not hear, and the warders gently but firmly forced her down until her head rested on the block. The next instant there was a gleaming flash of steel, and the head of the woman dropped into the basket placed to receive it, the executioner exclaiming: "The sentence of the law has been executed. May God have mercy on the poor sinner."

**To Dispel Colds.**

Headaches and fevers, to cleanse the system effectually, yet gently, when costive or bilious, or when the blood is impure or sluggish, to permanently cure habitual constipation, to awaken the kidneys and liver to a healthy activity, without irritating or weakening them, use Syrup of Figs.

HUNDREDS of ladies in ill health have been or are being restored to health and trength by the use of Hawker's Tonic. t has become the great and popular amily remedy. .....

## TRUE LOVE IN GREENLAND.

**How Marriage and Courtship Are Brought About in the Far North.**

Since the Danish ministers have gained the confidence of the natives of Greenland, marriages in the far North are celebrated by the representatives of the church. In a recent issue of one of the Danish papers one of the missionaries gives the following account of the way courtship and marriage are brought about:

The man who calls on the missionary and says, "I wish to take unto myself a wife."

"Whom?" asks the missionary.

The man gives her name.

"Have you spoken with her?"

As a rule the answer is in the negative, and the missionary asks the reason.

"Because," comes the reply, "it is so difficult. You must speak to her."

The missionary then calls the young woman to him and says: "I think it is time that you marry."

"But," she replies, "I do not wish to marry."

"That is pity," adds the missionary, "as I have a husband for you."

"Who is he?" asks the maiden.

The missionary names the candidate for her lover.

"But he is not worth anything. I will not have him."

"However," suggests the missionary, "he is a good fellow and attends well to his house. He throws a good harpoon, and he loves you."

The Greenland beauty listens attentively, but again declares that she will not accept the man as her husband.

"Very well," goes on the missionary. "I do not wish to force you. I shall easily find another wife for so good a fellow."

The missionary then remains silent as though he looked upon the incident as closed. But in a few minutes she whispers, "But if you wish it——"

"No," answers the pastor, "only if you wish it. I do not wish to overpersuade you."

"Pastor," she then breaks out, "I fear he is not worthy."

"But did he not kill two whales last summer while the others killed none? Will you not take him now?"

"Yes, yes; I will."

"God bless you both," answers the pastor, and joins the two in marriage.—N. Y. Tribune.

## WORK OF A MIGHTY BLAST.

**Nearly 200,000 Tons of Rock Loosened by a Single Explosion.**

For many years a huge mass of rock technically known as a "dike," a legacy from previous workers, has frowned over one of the Great Dinerwic quarries, the property of Mr. Assehton Smith, and has been a growing menace to safety of the men employed in the galleries below, which, in a series of terraces, rise almost from the edge of the lake far up the steep breast of the mountain. The Hon. W. W. Vivian, who manages the quarries for Mr. Assehton Smith, decided to remove the dike, and during the last three months preparations for its declaration have been in active progress.

From three longitudinal tunnels in the solid rock ten chambers, each 11 feet by 4 feet, were made and charged with gelatine dynamite. Each bag of this explosive was placed in position by Mr. Vivian himself. Everything having been satisfactorily arranged. Mrs. Assehton Smith was requested to fire the twenty minutes' time fuse leading to the mass of some two and a half tons of gelatine dynamite safely packed in the entrails of the rock, a request to which she readily acceded. The hour was fixed for 1 o'clock on Saturday, and shortly before the time thousands of people from Llanberis and adjacent villages—Bangor, Carnarvon and other towns—took up advantageous positions in the neighborhood.

Punctually at the appointed time Mrs. Assehton Smith fired the time fuse, and at 1.02 o'clock the earth for a mile round was shaken as if by an earthquake. At the next instant the face of the tremendous dike, which towered gloomily upward, and on either side of which the rain-covered rock glistened in a passing burst of sunshine, began to quiver ominously, and the loose earth in its crevices clattered down its smooth face like an avalanche. Next, from different parts of the rock came sputtering bursts of smoke and then enormous blocks detached themselves from the mountainous mass of rock, toppled slowly forward, and finally crushed into the abyss below with deafening uproar, which, mingling with the thunders of the exploding dynamite, now freed from its rocky prison, reverberated grandly among the mountains and towered ruggedly into the cloud-darkened sky. Again and again was the downfall of the huge masses of rock repeated till 180,000 tons lay like "tumbled fragments of the hills" far below. A dense white smoke, the deadly afterdamp, clung for a while around the scene of the explosion, and, when cleared away, in the place of the dike there was a great gap, in which glistened here and there pinnacles of splintered rocks.—London Telegraph.

**About Opals.**

The prejudice against opals appears to be disappearing. Anyhow, they are popular. There are several varieties of opal, and therefore several degrees of merit. The precious, or noble, or oriental opal, is the supreme. This has all the colors, and when these colors are broken into spangles, it is then called the harlequin opal. Then comes the fire opal, or girasol, with hyacinth red and yellow reflection—the former comes from Hungary, the latter from Mexico. The common, or semi opals, are non-opalescent. The hydrophane, or oculus mundi, is non-transparent, but becomes so by immersion in water or any transparent fluid. The cacha-long is nearly opaque and of a bluish white color. The hyalite is colorless, pellucid and white. The opal jasper, or wood opal, is the petrifaction of wood, opalescent, but without the coloring which makes the "noble" gem so precious.—Buffalo Express.

**"Go Lickee Wife."**

British husbands, when their dinner parties turn out failures, are apt to grumble at their wives for the cook's misdeameanors, but they abstain from the practical style of rebuking practiced by the celestials. Recently the Chinese professor at a university gave a national banquet to fellow professors and was much put out because the cookery was not to his taste. After a time he got up, bowed solemnly, said, "Go lickee wife," and departed, returning presently, smiling as blandly as usual, after having administered judicious chatisement to his better half.

Dr. Chalmers, Veterinary Surgeon, M. R. C. V. S., says: "I used Dr. Manning's German Remedy for neuralgia. It cured me on first application. I have never used anything to equal it. Have made other uses of it and find it excellent.

THOMAS CHILLMERS, P. V. M. S. R. V. S., ..... Truro, N. S., April 9, 1892.

For sick headace, sour stomach, loathing of food, dyspepsia or billiousness, take Hawker's Liver Pills. They will cure you. Recommended by leading physicians as a most reliable medicine. .....

Physicians endorse them, and Physicians make them.

M. D. Waldo, Mo.

I am pleased to recommend

**Skoda's Discovery**

and Skoda's other remedies, as I know them to be articles of true merit, and the physicians who compound them, to be men of integrity and ability. Skoda's Discovery is unlike any other proprietary medicine—it cures disease by removing the poison, and at the same time SUPPLIES GOOD BLOOD to wasted parts. No other remedy has performed so many wonderful cures or relieved so much suffering.

Skoda's Little Tablets cure constipation, sick headache and dyspepsia. 25 cts.

MEDICAL ADVICE FREE.

SKODA DISCOVERY CO., LTD., WOLFVILLE, N. S.
