

Canadian Wheat Growers Sees U. S. Soil Bank An Assistance

OTTAWA (CP)—Canadian wheat growers, as a result of the United States soil bank plan, may eventually find less American wheat competing with theirs for world markets.

The U.S. plan came into operation earlier this year and has already resulted in 10,700,000 acres of land being taken out of cultivation, of which 5,000,000 acres was and that had been sown to wheat.

Writing of the U.S. program in the current issue of the trade department's fortnightly publication "Foreign Trade," W. C. Hopper, agricultural counsellor at the Canadian Embassy in Washington, says:

"The hope is that, when the acreage reserve program is in full operation in 1957 and subsequent years, 15,000,000 to 20,000,000 acres of the eligible crops will be taken out of production.

"Of this total, 10,000,000 to 12,000,000 acres probably will represent land which formerly pro-

duced wheat. The present 35,000,000 acres of wheat harvested in the U.S. would, therefore, be reduced to 45,000,000 or 43,000,000 acres."

The soil bank plan has two parts, he explains—the acreage reserve program and the conservation reserve program.

The acreage reserve program provides \$750,000 a year for payment to producers who cut their acreage of wheat, corn, cotton, rice, peanuts and various types of tobacco to certain limits during this and the next three crop years.

These acres must then be left idle or a cover crop put on them. The farmer must practise erosion or weed control on the idle acres.

The conservation reserve plan, to be started this year, provides for \$450,000,000 a year to be paid farmers for long-term conservation work on their farms. This, over the years, is expected to encourage the shift of 20,000,000 to 25,000,000 acres of farmland into grass, trees or water storage.

Chief purpose of the U.S. soil bank plan, says Mr. Hopper, is to protect and increase American farm income.

If it cuts down the flow of American wheat into already-crowded world markets, the U.S. soil bank plan will also benefit Canadian farmers.

A GENERAL MOTORS VALUE Buick Super 6-Passenger 4-Door Riviera

Something New in Guided Muscle

...at a pip of a price!

TIME'S awasting—while you could be enjoying the fun and thrill of a new kind of power performance at the wheel of the best Buick yet.

And right now the value of your present car is at its peak. You could make a whale of a fine deal on a great-buy Buick with something really new in soaring might.

It's not just that Buick's new V8 is 322 cubic inches big. That it develops more torque and horsepower than even Buick has had before.

There's the new guided dynamite that makes the most of all this.

That's the latest version of Variable Pitch Dynaflo.* It's so "muscle" that it

delivers swift new acceleration with less than an inch of pedal travel—and saves gas in the doing.

And when the occasion demands, you can unleash the full power at your command on a shaved second's notice. Tromp down on the treadle and you switch the pitch. There's an instant safety-surge of power that leaves trouble fading away behind you.

But there's a lot more to Buick's new performance than the smooth, sheer might at your command — as you'll discover.

You just can't know today's driving at

its eyeopening best until you boss a new Buick.

And it's still only August. You still have months to be driving the most modern car on the road. You still can take advantage of this month's high value on your present car—to deal yourself in on the best buy you'll get in many a moon.

So why wait? Today is a great day to buy a Buick—the best Buick yet, by far. We're ready to open your eyes with the why and how. How about right now?

*New Advanced Variable Pitch Dynaflo is the only Dynaflo Buick builds today. It's standard on Roadmaster, Super and Century—optional at modest extra cost on the Special.

Enjoy 4-Season Comfort in your new Buick with genuine FRIGIDAIRE CONDITIONING.
