

REPORT MADE PUBLIC

Rear-Admiral Landymore Claims Poor Clarification

By DAVE MCINTOSH
OTTAWA (CP) — Rear-Admiral William Landymore told the Commons defence committee June 23 that morale in Maritime Command was bad because the defence department had not clarified what it meant by a unified defence force.

MR. LANDYMORE

He said the morale was reflected in re-enlistment rates and the attitude of officers to their careers.

Admiral Landymore said the non-secret part of his testimony was censored by Mr. Hellyer's staff before he gave it to the committee.

Mr. Hellyer has said the admiral had dealt with personnel files which were a matter for defence headquarters, not the maritime commander.

He said the "bad" morale was reflected in re-enlistment rates and the attitude of officers to their careers.

definition of unification and to indicate to the officers and men exactly what the force is going to look like, what kind of careers people are going to have in it.

"After all, service people are career people and their career means more to them, perhaps, than the money and other things."

Admiral Landymore said in reply to John Matheson, Liberal MP for Leeds, that there is great reluctance in the navy about unification.

He told Rear-Admiral Smith Conservative MP for Simcoe-North, that the navy must recruit 2,600 men in the next year to keep its present ships in operation but that it expects to get only half that number.

"Any transition to a single identity for all three services would be difficult."

"There is no one in the navy very enamored of knak uniforms, believe me," the admiral said.

said. Sailors were proud of their uniform because it set them aside as sailors and indicated their professional connection with the sea.

Committee chairman David Gross, Liberal MP for Victoria, B.C., and a former naval captain, said at the end of Admiral Landymore's testimony: "We would like to wish you, in all sincerity, the very best of good fortune and continued success and I know that we would all hope, in this committee, that in some way we can be of assistance to you in your task."

On the subject of anti-submarine warfare, Admiral Landymore said that last year more than 800 Russian fishing vessels were deployed in the western Atlantic and more than 200 in the eastern Pacific. All told, these ships carried more than 20,000 men.

"I find no reason to be complacent about their presence," he said.

The Soviet fishing fleet was organized like the Soviet navy and was centrally controlled from Russia. It was reasonable to assume the fishermen were naval reservists.

Russia now had some 35 nuclear and about 400 diesel-driven submarines.

Britain is co-chairman of the 1954 Geneva conference on Indochina.

Poland is a member of the International Control Commission for Viet Nam, Laos and Cambodia, Canada and India are the other members.

The sources said Poland alleged that U.S. violation of the Geneva agreements is seen in the American bombings of the demilitarized zone between South and North Viet Nam and the American raids near the North Vietnamese centres of Hanoi and Haiphong.

Armed Forces Meeting To Discuss Unification

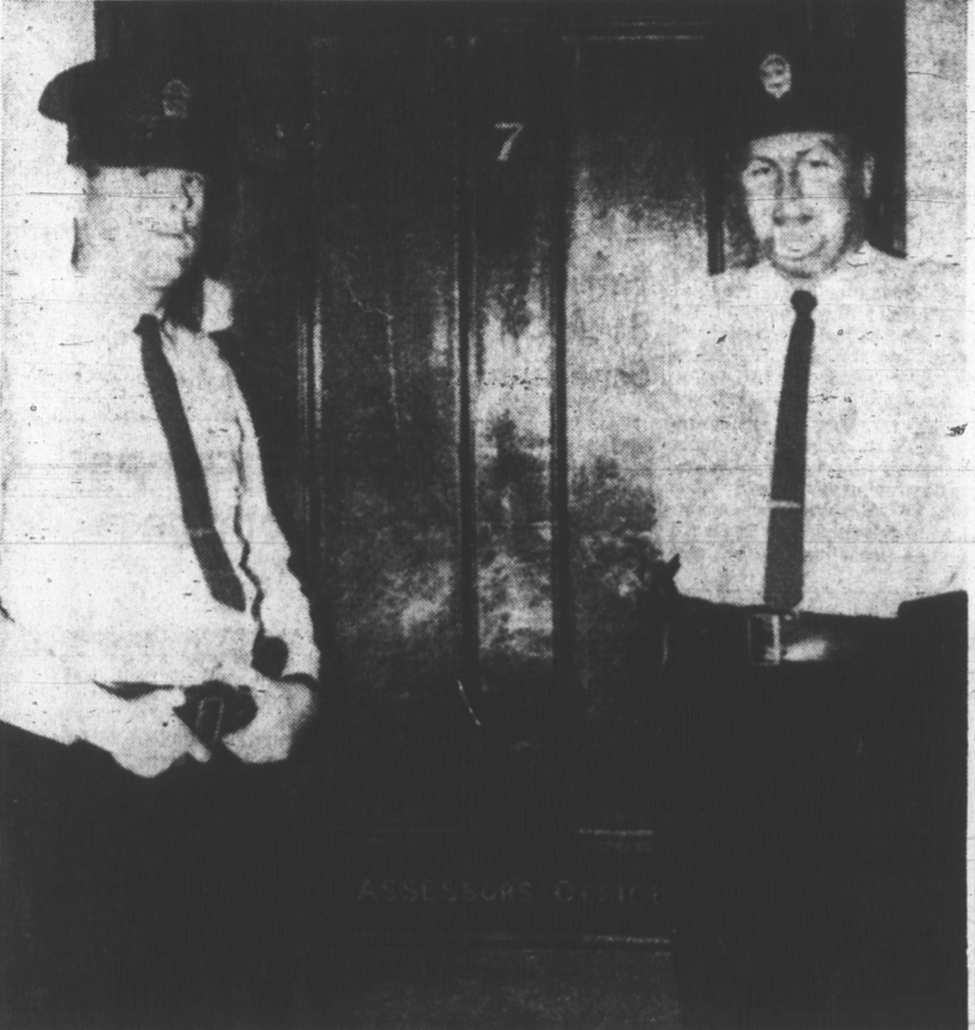

Poland Makes Allegations Against U.S.

LONDON (Reuters) — Poland called on Britain Tuesday to condemn what it claims is a systematic violation by the United States of the 1954 Geneva agreements on Indochina, well-informed British sources said.

Poland is a member of the International Control Commission for Viet Nam, Laos and Cambodia, Canada and India are the other members.

The sources said Poland alleged that U.S. violation of the Geneva agreements is seen in the American bombings of the demilitarized zone between South and North Viet Nam and the American raids near the North Vietnamese centres of Hanoi and Haiphong.

Britain is co-chairman of the 1954 Geneva conference on Indochina.

Two Moncton policemen, Const. E. Smith (left) and Glen Estabrooks, stand guard outside the door of the city's assessment office on orders from Mayor Leonard C. Jones, Jr. The policemen have orders to prohibit anyone from removing the city's assessment records. The provincial government has asked for the records but the city is not allowing anyone to take the records. (CP Wirephoto, see story on page 3.)

GUARD ASSESSMENT RECORDS INCLUDING WHEAT

Five Records In The Books With Annual Crop Closing

WINNIPEG (CP) — Five records, including an all-important one for wheat exports, went into the books as Canada closed out the 1965-66 crop year at the height of the Prairie grain boom.

Preliminary year-end figures, released Tuesday by the Board of Grain Commissioners, confirmed what had been obvious as the furious pace of grain movements continued to the year-ending date of July 31.

In the crop year starting Aug. 1, 1965, these were the records: —Wheat exports of 346,000,000 bushels compared with 336,200,000 in the previous big year of 1963-64.

—Country elevator shipments of 801,400,000 bushels of the six principal grains (wheat, oats, barley, rye, flax and rapeseed) compared with 779,500,000 in 1963-64.

—Direct overseas clearances from the Lakehead of 25,900,000 bushels all grains, against 21,600,000 in 1964-65.

—Overseas clearances from Pacific coast ports of 234,700,000 bushels all grains, compared with 225,800,000 in 1963-64.

—Wheat exports from Churchill, Man., of 25,100,000 bushels against 22,100,000 in 1964-65.

Falling short of previous high marks were total farm deliveries of all grains to licensed elevators (763,300,000 bushels against 851,200,000 in 1952-53); total movement of all grains except rapeseed through the licensed elevator system to domestic channels of 208,300,000 bushels (224,100,000 in 1963-64); and total Lakehead vessel shipments of 478,800,000 bushels all grains (490,200,000 in 1944-45).

Lack of a bathing suit proves no barrier to Alexandra Curtis' desire to take a dip in the surf with her daddy, actor Tony Curtis. The two-year-old blonde, whose mother is actress Christine Kaufman, was visiting him at Malibu where he is making a movie, "Don't Make Waves," when she decided she wanted to go in the water. Two Civilians Are Attending

OTTAWA (CP) — At least 14 take place before 1970 though the enabling legislation may be passed by Parliament long before that.

One of the complaints of dismissed Rear-Admiral William Landymore was that he had no direct access to the chief of defence staff to discuss the problems of his Maritime Command.

Gen. Allard's armed forces council is an obvious attempt to overcome this difficulty, officials said.

"One maintained that this access was always available. But he conceded that perhaps the channel had not been used to full advantage."

Rear-Admiral Landymore, fired for his public opposition to unification, said he was referred to subordinates of the chief of defence staff to discuss separate problems and that there was no one to whom he could go for discussion of overall policy in his command.

For example, Rear-Admiral Landymore said, he would be referred to the comptroller-general on a financial problem, to the chief of technical services on a ship repair problem, to the personnel chief on a manpower problem.

Missing Body Is Recovered

The body of William K. Faithful, 18, of Hazelbrook, was discovered in the Hillsboro River about three o'clock yesterday afternoon. The body was reportedly spotted from a pleasure boat, the occupants of which reported it to city police.

Faithful was drowned while swimming at the Hillsboro Bridge last Tuesday during his noon lunch hour. He was working with a firm that is painting the bridge. Divers searched for the body at that time and the area was dragged, but without result.

The youth was the son of Mr. and Mrs. William Faithful of Hazelbrook.

Sylvia MacAulay Represents P.E.I.

Prince Edward Island will have a really good contestant in the National Potato Queen contest. She's Sylvia MacAulay of Campbell's Cove, a girl who won the reserve world seed potato championship in 1964 and has many other achievements to her credit.

Sylvia will be in Wolfville next Monday when the Queen will be chosen to reign over the National Potato Industry Conference from August 15 to 18.

The attractive young lady is sponsored by the P.E.I. Potato Marketing Board. She will be accompanied by Margaret MacMillan, board secretary, Board President R. L. Burge, St.

Pearson Addresses Lawyers

MONTREAL (CP) — Prime Minister Pearson made a strong plea Tuesday night for stronger backing from all nations for the creation of stable international law.

Speaking to 3,000 lawyers at the annual convention of the American Bar Association, Mr. Pearson said the only security the world can get against nuclear annihilation is "collective security based on collective action and on collective international law."

"We should be doing every effort to achieve this objective but we remain more concerned with other matters that seem to be more important than mere survival."

The prime minister said the world community should seek "a law for all humanity, based on justice and an accepted standard of behaviour."

Winning potato honors is old hat for the MacAulay family. The father, Syd MacAulay, won the world seed potato championship at the Royal Winter Fair in 1955, and Sylvia's sister, Anne, won the world seed title in 1962.

Sylvia was chosen as the Island's contestant in the national Potato Queen competition by a panel of judges consisting of Mr. Burge, Morris Caseley, Kensington and S. C. Wright, deputy minister of agriculture.

CABINET MEETING

2 Prosecutors Are Appointed

The Executive Council has appointed as Queens County J.P. Nicholson, Charlottetown, Hon. J. Elmer Blanchard, Charlottetown, minister of labor, Lester and Alex B. Campbell, Summerside, attorney general.

The announcement was made by Premier Campbell following a meeting of the Cabinet last night.

Mr. Nicholson has been appointed Crown prosecutor for Queens County to fill the vacancy created by the resignation of Alan Scates. Mr. Nicholson formerly held the position of Queens County prosecutor from 1949-1959.

Mr. Scates' resignation was effective as of July 11 but he had continued to act as Crown prosecutor until his successor was named.

It was also announced that Gordon Tweedy, Charlottetown lawyer, has been appointed Crown prosecutor for Kings County, a position prior to this filled by Deputy Attorney General J. Arthur McGuigan, QC.

MR. NICHOLSON

Premier Campbell stated no changes have been made in the status of George R. McMahon who has been Prince County prosecutor since 1959.

Canada's Elaine Tanner Takes Sixth Gold Medal

By JACK SULLIVAN
Canadian Press Sports Editor
KINGSTON, Jamaica (CP) — Irrepressible Elaine Tanner, the 15-year-old swimming sensation from Vancouver, won Canada's sixth gold medal of the British Empire Games with a world record performance in the women's 220-yard butterfly Tuesday night.

In a stirring finish with teammate Marilyn Corson of Parramatta, Ont., Miss Tanner pulled away on the last length of the pool to win the championship in two minutes, 29.9 seconds, two seconds under the mark set a year ago by Susan Pitt of the United States.

The swimming gold was the fourth of the games for Canada, all but one of them in women's events.

In the first two swimming finals of four scheduled Tuesday night, Canada picked up a gold and two silver medals, making it four golds, five silvers and two bronzes for the swimmers alone.

Peter Reynolds, the 16-year-old Australian boy wonder, won the men's 220-yard backstroke and set his second individual world record of the games.

Ralph Hutton of Ocean Falls, B.C., was second for the silver, his third of the games.

LEAD FROM START — Miss Tanner, an impish brunette nicknamed Mighty Mouse by her teammates, led the butterfly from the start. Miss Corson, 16, tried hard to catch her on the third length but in the stretch it was no contest.

Miss Corson in 2:34.8 finished two-tenths of a second ahead of England's Anne Barner, who got the third-place bronze.

Reynolds was clocked in 2:32.0, chopping 1.5 seconds off his own world mark set last year. Hutton equalled the old mark of 2:13.5. The bronze went to Karl Byron of Australia.

With the Canadian track and field contingent having a day off, the gunners and fencers also picked up medals for Canada.

Spacecraft Launching Is Delayed

CAPE KENNEDY, Fla. (AP) — Noisy radio data involving a fuel-measuring system Tuesday forced a one-day postponement of an attempt to launch a Lunar Orbiter spacecraft toward a orbit about the moon to photograph the hidden backside and nine potential astronaut landing areas.

The countdown on the Atlas-Agena booster rocket progressed smoothly down to just seven minutes before the planned liftoff Tuesday afternoon. Then the blockhouse received some unintelligible radio signals from a system in the rocket that measures the amount of fuel and liquid oxygen in the Atlas tanks.

World Experts Urging Action

GENEVA (AP) — A committee of world narcotics experts Tuesday urged immediate international action to curb the use of LSD 25, the hallucinatory drug which can subject victims to terrifying visions.

Experts convened by the United Nations narcotics commission strongly recommended that all countries take urgent steps to prevent abuse of the drug. They also called for measures to put the drug under international control.

The experts failed to reach immediate agreement on precise recommendations to make to the narcotics commission which next meets in December. This is owing to technical difficulties over the legal definition of LSD because of the singular effect it produces.

In the speech, Mihajlov, 31, also declared that Communism's idea of the class struggle could lead to the destruction of society.

U.S. President Sees No Change For The Worse

WASHINGTON (AP) — President Johnson said Tuesday he sees no change for the worse in the Vietnamese war.

He also told a news conference he sees no sign the United States is "going to pot" in wage-price inflation.

In other countries, Johnson said, price increases for consumers have been anywhere from 200 to 500 per cent, but in the U.S. they amounted to eight per cent since 1960.

"Johnson said his administration will urge labor and management to be as restrained as possible on wage and price increases.

"If it gets to the point where they are not restrained and it appears that other measures are essential, of course, we (the administration) will recommend them."

HAS NOTHING BETTER — So far, he said, the government has come up with nothing better than its present guidelines aimed at holding pay increases to around 3.2 per cent. Asked how he appraises the military situation in Viet Nam, Johnson said:

"I don't see any change for the worse at all. Our plane losses are under those that we have estimated. Our helicopter losses are under those estimated."

Sometimes losses are heavier than expected, sometimes much smaller, with weather, good or bad luck, and a lot of other factors involved.
