NEW YORK
NEW YORK (AP)—In a dramatic turnabout, the stock market Friday rallied for its biggest gain since the huge rebound of May 23—the session following "Black Monday."

The advance recovered somewhat more than 40 per cent of the losses taken in the week's previous session and regained an estimated \$8,000,000 in quoted value of stocks listed on the New York Stock Exchange, based on the rise in the Associated Press average.

The advance was accompanied by a sharp rise in the price of gold—up at the start, down sharply, and up again in a final rally.

The price of gold advanced 1/2 cent to \$35.10, the highest since the start of the year.

The AP 48-stock average advanced 5.50 to 214.16. Minnesota Mining was the most active stock, up 1 1/2 at 48 1/2 on 151,200 shares.

General Motors rose 1/2, Ford 3/4, American Motors and International Telephone 2 1/2.

Farm Policies of Cabinet
Owned By Co-Operatives

Sometimes you are promised that before the election we would return to this again. There is no sense in that. The different policies are proposed, if adopted, is the way of going for the future.

It is not the intention to offer any comment on the election campaign as the different policies and every effort will be made to avoid any appearance of stating or prejudging the result. In a very general way it would appear that what the Conservatives propose for agriculture is planned would result in improved income, more stability, and a more secure future for the farmer.
