STANDARD

LIFE ASSURANCE CO.

At the 57th Annual General Meeting of
the Standard Life Assurance Company,
held at Edinburgh on Tuesday, the 24th of
April, 1883, the following results for the
year ended 15th November, 1883, were re-
ported:—

3,038 new proposals for life as-
surance were received for the year
for \$ 9,734,085 38

2,561 proposals were accepted,
assuring 7,239,048 13

The total existing assurances in
force at 15th November,
1882, amounted to 66,936,302 91

(Of which \$7,753,031.15 was
reassured with other offices)

The claims by death which
arose during the year amount-
ed, including bonus addi-
tions, to 2,462,226 59

The annual revenue amounted
to 4,267,546 00

The invested funds at same
date amounted to 29,503,416 00

Being an increase during the
year of 1,062,648 35

CALLS attention to "THE ELECTRO
MAGNETIC CORSET," exact pattern as
worn by the Princess of Wales, the health-
giving powers of which, especially in female
diseases, are very great. Can be had at
FRASER & REDDIN'S. To be worn as an
ordinary corset and lasting longer and fitting
superbly trimmed with Valenciennes lace.

Dec. 3, 1883.

PATENTS.

We continue to act as Solicitors for Patents
Caveats, Trade Marks, Copyrights, etc., of
the United States, and to obtain patents in
Canada, England, France, Germany, and all
other countries. Thirty-six years practice.
No charge for examination of models or
drawings. Advice by mail free.
Patents obtained through us are noticed in
the Scientific American, which has the largest
circulation, and is the most influential news-
paper of its kind published in the world. The
advantages of such a notice every patentee
understands.

This large and splendidly illustrated news-
paper is published weekly at \$3.20 a year
and is admitted to be the best paper devoted to
science, mechanics, inventions, engineering
works, and other departments of industrial
progress, published in any country. Single
copies by mail, 10 cents. Sold by all news-
dealers.
Address, Munn & Co., publishers of Scien-
tific American, 261 Broadway, New York.

FOUL PLAY.

By Charles Reade.

CHAPTER XXXIV.

On the morning that followed this mem-
orable night, our personages seemed to
change characters. Hazel sat down before
the relics of the hut—three or four strings
dangling, and a piece of network waving—
and eyed them with shame, regret and
humiliation. He was so absorbed in his
self-reproaches that he did not hear a light
footstep, and Helen Rolleston stood near
him a moment or two, and watched the
play of his countenance with a very in-
quisitive and kindly light in her own eyes.

'Never mind,' said she, soothingly.
Hazel started at the music.
'Never mind your house being blown to
atoms, and mine has stood?' said he, half
reproachfully.

'You took too much pains with mine.'
'I will take a great deal more with the
next.'

'I hope not. But I want you to come
and look at the Lavoc. It is terrible, and
yet so grand.'

And thus she drew him away from the
sight that caused him pain.

They entered the wood by a path Hazel
had cut from the sea-shore, and viewed the
devastation in Terrapin Wood. Prostrate
trees lay across one another in astonishing
numbers, and in the strangest positions;
and their glorious plumes swept the earth.

'Come,' said she, 'it is a bad thing for the
poor trees, but not for us. See, the place
is strewn with treasures. Here is a tree
full of fans all ready made. And what is
that? A horse's tail growing on a cocoon
tree! and a long one, too! that will make
ropes for a cabbage. Poor Mr. Wilk! Well,
for one thing, you need never saw nor
climb any more. See the advantage of a
hurricane.'

From the wood she took him to the shore
and there they found many birds lying
dead; and Hazel picked up several that he
had read of as good to eat. For certain
signs had convinced him his fair and deli-
cate companion was carnivora, and must be
nourished accordingly. Seeing him so em-
ployed, she asked him archly whether he
was beginning to see the comforts of a
hurricane.

'Not yet,' said he; 'the accounts is far
from even.'

'Then come to where the rock was blown
down.' She led the way gaily across the
sands to a point where an overhanging
crag had fallen, with two trees and a
quantity of earth and plants that grew
about it. But, when they got nearer, she
became suddenly grave, and stood still.

The mass had fallen upon a sheltered place,
where seals were hiding from the wind,
and had buried several; for two
or three limbs were sticking out, of
victims overwhelmed in the ruin; and a
magnificent sea-lion lay clear of the smaller
rubbish, but quite dead. The cause was
not far to seek; a ton of hard rock had
struck him, and then plowed up the sand
in a deep furrow, and now rested within a
yard or two of the animal, whose back it
had broken. Hazel went up to the creature
and looked at it; then he came to
Helen, she was standing aloof.

'Poor bugbear,' said he. 'Come away;
it is an ugly sight for you.'

'Oh, yes,' said Helen. Then, as they
returned: 'Does not that reconcile you to
the loss of a hut? We are not blown away
nor crushed.'

'That is true,' said Hazel; 'but suppose
your health should suffer from the ex-
posure to such fearful weather? So un-
lucky! so cruel! just as you were begin-
ning to get stronger.'

'I am all the better for it. Shall I tell
you? excitement is a good thing; not too
often, of course; but now and then; and,
when we are in the humor for it, it is meat
and drink, and medicine to us.'

'What? to a delicate young lady?'
'Ay, to a delicate young lady.' Last
night has done me a world of good. It has
shaken me out of myself. I am in better
health and spirits. Of course I am very
sorry the hut is blown down—because you
took so much trouble to build it; but, on
my own account, I really don't care a straw.

Find me some corner to nestle in at night,
and all day I mean to be about, and busy
as a bee, helping you, and—breakfast!
breakfast! Oh, how hungry I am.' And
this spirited girl led the way to the boat
with a briskness and a vigor that charmed
and astonished him.

Souvent femme varie.
This gracious behavior did not blind
Hazel to the serious character of the situa-
tion, and all breakfast time he was think-
ing and thinking, and often kept a morsel
in his mouth, and forgot to eat it for
several seconds, he was so anxious and
puzzled. At last he said:

'I know a large hollow tree with apertures.
If I were to close them all but one, and
keep that for the door? No, trees have be-
trayed me; I'll never trust another tree with
you. Stay; I know—I know—a cavern.'

He uttered the verb rather loudly, but the
substantive with a sudden feebleness of
intention that was amusing. His timidity
was superfluous; if he had said he knew 'a
bank whereon the wild thyme grown,' the
suggestion would have been well received
that morning.

'A cavern' cried Helen. 'It has always
been the dream of my life to live in a
cavern.'

Hazel brightened up. But the next
moment he clouded again. 'But I forgot.
It will not do; there is a spring running
through it; it comes down nearly perpen-
dicular through a channal it has bored, or
enlarged; and splashes on the floor.'

'How convenient!' said Helen; 'now I
shall have a bath in my room, instead of
having to go miles for it.' By-the-by, now
you have invented the shower-bath, please
discover soap. Not that one really wants
any in this island; for there is no dust, and

the very air seems purifying. But who can
shake off the prejudice of early education?
Hazel said:

'Now I'll laugh as much as you like, when
once this care is off my mind.'

He ran off to the cavern and found it
spacious and safe; and the roof of the cave
glistened with moisture. It looked a hope-
less case. But if Necessity is the mother
of Invention, surely Love is the father. He
mounted to the rock above, and found
the spot where the spring suddenly
descended into the earth with the loudest
gurgles he had ever heard—a gurgles of
discontent. Nothing was to be done there.
But he traced it upward a little way, and
found a place where it ran beside a deep
declivity.

'Aha, my friend,' said he.
'I got a spring, and with some hours'
hard work dug it a fresh channel, and
carried it away entirely from its course. He
returned to the cavern. Water was drip-
ping very fast; but on looking up he could
see the light of day twinkling at the top of
the spiral water-course he had robbed of its
supply. Then he conceived a truly original
idea: why not turn his empty water-course
into a chimney, and so give to one element
what he had taken from another? He had
no time to execute this just then, for the
tide was coming in, and he could not afford
to lose any one of those dead animals. So
he left the funnel to drip, that being a pro-
cess he had no means of expediting, and
moored the sea-lion to the very rock that
had killed him, and was proceeding to dig
out the seals, when a voice he never could
hear without a thrill summoned him to
dinner.

(To be continued.)

Some new lines by Tennyson appear in
Good Words. They have been inscribed on
the wall of Helen's Tower, near Belfast, a
building which was erected by the present
Earl of Dufferin as a tribute to his mother,
after whom the building was named. The
fourth line of the poem refers to another
poem, also inscribed on the wall of the
tower, which was written to Lord Dufferin
by his mother:—

Helen's Tower, here I stand,
Dominant o'er sea and land.
Son's love built me, and I hold
Mother's love engraved in gold.
Love is in and out of time;
I am mortal stone and lime.
Would my granite girls were strong
As either love, to last as long,
I should wear my crown entire
To and thro' the doomsday fire,
And be found of angel eyes
In earth's recurring Paradise.

James E. Chipman, of the Halifax cat the
ranch company, is home from the North-
west. He left Calgary on the 28th of De-
cember, but was detained three days at
Winnipeg and Quebec. The weather was
delightful at the foot of the Rockies, it
being one of the mildest winters known for
years. During the four weeks previous to
his leaving, the thermometer ranged from
35 to 50 above zero; and on one day in
December it was 76 above zero! The
weather was much colder at Chicago than
it was at Winnipeg when he passed through
those respective cities. Mr. Chipman looks
as if the Northwest thoroughly agreed with
his health.—*Hx. Herald*.

A London despatch of January 8th, says
Wallace Ross, the American sculler, is at
present in London. He is being lionized by
noble patrons of sporting matters, and will-
ingly put through a round of jollification,
which his better friends, in view of the task
he has before him, criticize as very im-
prudent. Ross, however, asserts that he
will take good care to abandon his fun be-
fore it injures him, and has arranged to
begin with Spencey, his trainer, regular
exercise at Putney, on the 1st of February.

The sculling match between Ross and
Bubar, which is to be for a stake of \$2,000,
will be rowed according to present arrange-
ments, on the 10th of March next.

An idea of how the chinook wind acts
may be gathered from the following from
the *Fort McLeod Gazette*:—'During the
first snow storm and cold snap, the snow far
up Belly River was very deep, and the river
was frozen solid. When the chinook came
it seemed to sweep it off in an instant; the
river broke up and the ice clogging, the water
overflowing the banks, carrying the ice with
it, and cutting the brush and timber as if
with an axe. The roaring of the water and
the crunching of the ice made a noise like
terrible thunder.'

The British royal coat-of-arms, with its
rampant lion and unicorn, has been a com-
mon feature of English advertising in type
and on sign-boards. A new order, which
has just gone into effect, imposes a fine of
\$100 for using the royal arms, or an imita-
tion of it, without the consent either of
royalty or the Government.

The so-called St. Elmo's fire was seen
recently on the masts and rigging of a ship
on the Lake of Geneva. This appearance
was followed in a few moments by a severe
snowstorm. Sailors always look upon
these lights as sure signs of a stormy
voyage.

The Jews are more numerous in Ham-
burg, Frankfurt, Amsterdam and Warsaw
than in any other European towns. Of all
European countries, Ireland has the least
number of Jews in it.

In Haulan, owned at Truro, the Nova
Scotians claim to have the fastest four-year-
old in Canada. As a three-year-old he
could go a quarter in thirty-seven seconds.

Fancy an electric light in Westminster
Abbey, but that is what the fane has come
to. Well may Ruskin declare that the
'dim, religious light' has fled.

GOLD and silver plating of every description
