Her fingertip veil of tulle illusion fell softly from a pearl trimmed tiara. She carried a bouquet of white carnations. As bridesmaid, Miss Helen Murphy wore blue nylon net over taffeta, with a shoulder-length veil and matching mitts and carried a nosegay of pink and white mums. Souris Hums

processing the harvest from salt water.

The draggers have had some slack times, but as a rule the fish plant workers have been pushed to keep abreast of the heavy landings. Meantime Griffin's Fisheries are making good progress in the construction of their new fish plant, what will be the largest in the province when completed.

Since work on the building commenced the plans were revised to make it larger than at first intended. The partially completed building is 205 feet long by sixty-odd feet wide. Situated high on the cliff near Souris break-water, it is ideally located for its intended purpose. It is expected that the building will be completed between Oct 1st and 15th although the plant will not go into full operation until next spring. The plant equipment will be the most modern made, and will include an ice-making machine. This machine will be installed on the top floor of the fairly high building, and facing the sea the chipped ice it manufactures will be funneled through pipes to the waiting draggers berthed below. The draggers use layers of ice in great quantities to preserve their catches while at sea.

Eastern Packers are also in possession of similiar ice-making facilities.

Yesterday two large diesel engines, which will power the ice-making machine in the Griffin plant, were in Souris ready for installation. One is a 60 horse power unit, and the other 120 horse power.

A Hive of Industry

There is very little if any unemployment in Souris according to the managament of both large companies. Besides the large Griffin building, ground is being broken for a new high school, a new Canadian Legion home is being completed also and several private residences. But the fishery industry is the main activity and it promises, say Souris business men to employ more people than ever in 1955 and the years to follow.
