Disappointment Is Felt Feed Grain Proposal Lost

For those who love elections the period from June 1962 to April 1963 should be one real lively one. For those who would like to see the real problems of the country handled with dispatch the dislocation which elections bring are not welcome.

We have no intention of discussing the issues, whate v er they may be, that will be put before the people in the forthcoming Federal election. However, we hope that attention will not be focused entirely on this extremely complex problem of nuclear arms with all its international implications. We suspect that a great many electors would appreciate being appealed to on the basis of their intelligence and would like to have all parties take an honest approach in their analysis of the situations whatever they may be.

Farm people in the East will be disappointed that there will not be an opportunity of bringing forward in parliament the new legislation covering feed grain. This legislation was being advertised as a major effort towards putting E a stern agriculture on a better b a sis. However the government has returned to power the legislation would probably be introduced. Should a new government be formed then it is difficult to predict.

CFA AND CABINET.

One of the really important events in the Federation year is the meeting with the cabinet in Ottawa. The event this year was scheduled for February 5th without any first hand reports on the meeting, it may be surmised that there was some difficulty in getting the honorable cabinet ministers to focus their attention on matters agricultural. With the storm signals up and every possibility that the government was headed for the rocks that evening the farmer representatives need not have been surprised if their request had certain frustrating qualities.

The brief presented is usually a lengthy document, but this year it was a masterpiece. The summer was pointed out with the reservation that farm income must be maintained.

DAIRY COMPO

By now dairy producers will be aware that the major farm organizations are recommending reduction in the fluid price to dairy farmers to sixty cents. To maintain the value of milk it is further recommended that the government undertake to support skim milk powder at twelve cents per pound. In short sixty cents butter and twelve cent powder will give the same return as sixty-four cent butter and powder without support. For those producers who are separating and selling cream it is recommended that a deficiency payment be made to them to keep their returns on the same basis as whole milk. The probability of an election early in April there will be time for the government to devise a dairy program before the dairy year which starts on May 1st.

DAIRY CONFERENCE.

The National Dairy Conference which is scheduled for February 21st-22nd will meet, due to the dissolution of parliament, in a somewhat different atmosphere than was originally expected. However, parliament or no parliament the dairy industry goes on together with its problems and the need for the Conference still exists.

ARDA

Through wide newspaper, radio, and television publicity ARDA is becoming almost a household word. However, we suspect great numbers of people have a minimum understanding of how the program is to function and what the possibilities are. Additional light will be shed on the matter by Farm Radio Forum on February 11th when the topic will be "ARDA And The Community." The radio program will take the form of a report from each province on what is going on and how the work is developing. Sunday afternoon on "Countrytime" there will be additional attention focused on ARDA. Thus through both TV and radio on Sunday and Monday an opportunity is provided for increasing knowledge on the business of ARDA.

PROSPECTS

On February 18th Farm Radio Forum will deal with the topic "Prospects For Farmers". An important part of the discussion, of course, will hinge on the Farm Forum Guide which we now have on hand and which contains a number of statements which are calculated to stir up some real hot arguments.

Sample quotations from the Guide.

The Farm Class System: "The top twenty- five per cent of farmers are equal to and probably better of than other sectors of the economy. The bottom twenty- five per cent are probably equal to those who are in urban areas and are frequently out of work and require social help of various kinds."

Adjustment: "Excellent for farmers with sufficient capital and superior management ability. Bleak for the farmer not possessing sufficient capital and business ability. There will be a progressive disparity of living standards between the farmers in the bottom third of the income bracket and the rest of the economy."

Costs of Living: "Even with the declining number of farmers, there will still be difficulty in maintaining a high income as long as the present tendency of passing almost all of the benefits of improved technology on to the consumer continues."

AN ECONOMIST'S SUMMARY "Specialization will be a key organizational factor for most types of farms.

A greater part of the farm labor force will come from sources other than the farm family.

NEW YORK

NEW YORK (AP)—Strength in motors, inspired by Chrysler's plans for a stock split, was not enough to prevent the stock market from an uneven decline Thursday. Trading was fairly active.

Wall Street was also off guard by announcement of plans for Chrysler's 2-for-1 split and dividend increase.

Chrysler rose 3⅞ to 86¼ on 170,800 shares as second most active stock. All of the other auto shares advanced. Rails also went ahead.

Many blue chips throughout the list, however, took sharp losses. American Telephone dropped 1¾, Goodyear 1¼, Union Carbide and du Pont 1¼ each.

The Dow Jones industrial average fell 3.43 to 679.09.

Not only Chrysler's split and dividend plans but the annual earnings of $7.24 a share came as a pleasant surprise even to those who looked for a good report.

HALT TRADING

Trading was halted just before the news was announced so as to avoid turbulent conditions on the floor of the exchange. The stock was up ⅞ in advance of the news. It touched a 1962-63 high of 87⅛ before settling below its best.

The Associated Press average of 60 stocks dipped .1 to 257.1.

Of 1,290 issues traded, 573 declined and 456 advanced.

Volume was 4,240,000 shares compared with 4,340,000 Wednesday.

Ten of the most active stocks advanced and six declined.

American Motors, aided by glowing predictions for results this quarter, was among the active, rising 2¼ to 21 on 175,500 shares.

International Nickel led Canadian issues with a drop of 2½. Walker Gooderham was off ⅜ and Hudson Bay Mining, Canadian Pacific and Aluminum Ltd. fell fractions. Sugars gained ¾ and McIntyre Porcupine was up ⅝, bucking the trend.

Prices were mixed on the American Stock Exchange. Volume was 1,060,000 shares compared with 1,230,000 Wednesday. Shawinigan advanced ⅛ and Brazilian Traction was down 1/8 among Canadian issues, most of which were unchanged.

The stock jumped three points to 94, while General Motors gained a point to 68¾ and Ford of Canada leaped 12 to 184.

Atlas Steel continued to attract block buyers, showing four special-size transactions in its volume of 31,000 shares. Atlas gained ¼ to 37¼.

Shawinigan also traded four block transactions, closing at 29⅜, up ⅛, on a turnover of 31,000 shares.

Distillers - Seagrams gained 1⅞. Abitibi and Consumers' Gas ⅜ each, Canada Cement ½ and Bell Telephone ¼.

Algoma Steel, Interprovincial Pipe Line, Steel Company of Canada and Consolidated Paper all dipped ¼ in the day's range.

On the exchange index, industrials rose .42 to 593.13 and western oils .01 at 114.96. Golds were down .24 and base metals .46 at 198.76. Closing volume was 3,409,000 shares compared with 4,518,000 Wednesday.

International Nickel weakened base metals with a drop of 2¼ to 67. Falconbridge fell ⅝, while Denison gained ⅛ and Consolidated Mining and Smelting 1/8.

Deer Horn, again most active of the speculatives, gave up more than Wednesday's gain, falling six cents to 65 cents.

In western oils, Dome and Home A each dipped ¼. Great Plains Development rose ¼.
