Have Nothing to Live For.

Sometimes men and women feel this way. A wave of despondency creeps up and up till it reaches the heart. They become languid and listless. Life appears grey and desolate. What such people want is not merely a tonic. They want to be built up. They want a stimulus which will give them courage and put new hope in them. Such a stimulus is found in Wilson's Invalid Port Wine. This is incomparably the best tonic at present offered to the public. Have you been disappointed In using Fibre Chamois? Always Cut Across the Goods For the Following Reasons: In a skirt, for instance, the fine creases or wrinkles that run lengthwise of the goods should always run around, never up or down. They will thus act as so many little wires, giving splendid support and stiffness. The drag and strain will also be across the grain, which is much tougher that way. No. 10, the LIGHT WEIGHT, used in this way will be found ample support for all skirts and sleeves, and the weight will not be felt. A few inches of the No. 30 around the hem may be necessary in a street skirt. No. 20, the MEDIUM, is best for giving body, and warmth in coats, capes, etc. No. 30, the HEAVY, should only be used either single or double, in collars, belts, lapels, etc. To keep all in place and bring the strain equally on lining and interlining Tack Securely to the Lining. The name and number is on every card to protect you. Now read again carefully and remember it or cut it out. Then you have not cut it Properly, Have used the wrong weight or have been induced to try the "just as good" imitations. jan25-624624
