THE EASTERN GUARDIAN

AGENTS:—MONTAGUE: Harold F. Landry, Mrs. Byron Stewart, Mrs. Bruce MacPhee, Miss Joyce Wigginton, Miss Joan Johnston. AGENT GEORGETOWN: Waldon Lavers.

The Guardian may be bought at the following places in Montague: Blue Dome Restaurant, and Guardian Office; in Georgetown: The Post Office; in Souris: The Snack Bar and H. Richards & Son.

ST. ANDREW'S CHURCH — The evening service in St. Andrew's Presbyterian Church, Montague, which was very largely attended, was conducted by the pastor, Rev. F.N. Young. Special music under the direction of Mr. J.E. Dunning included the anthem "Soft Floating On The Air" (Fred B. Root). The Scripture lesson was from Paul's letter to the Romans chapter seven. Rev. Mr. Young spoke a very inspiring sermon, choosing his text from Paul's letter to the Romans chapter seven verse nineteen. In these words, "For the good that I would, I do not, but the evil which I would not I do".

"WE LIVE in uncertain times — but the time is never uncertain with a Lorie watch—The ideal Christmas gift from V. R. Pepler, The Jeweller, Montague.

C.G.I.T. Rally At Montague

Montague Trinity United Church C.G.I.T. girls were hostesses to the C.G.I.T. groups of other communities on Saturday in their new hall. The rally proved to be a huge success with a large number of members attending totalling 53 girls and leaders.

Georgetown and Vicinity

Mr. Oswald H. Collins of New Perth was a business visitor to Georgetown on Saturday.

Mr. and Mrs. Stanley Walker and daughters Elaine and Dianne motored to Georgetown on Saturday, where they visited relatives.

Mr. Clarence Stewart, who is employed at Falconwood Hospital in Charlottetown was a recent visitor to his home here.

Friends of Mr. Ashley Allen are sorry to hear that he is indisposed at his home in Georgetown and all hope that his health will improve rapidly.

Mrs. Lemuel MacCormick and daughter Aldine were visitors to Charlottetown on Saturday.

Miss Mabel Stewart, nurse-in-training at Falconwood Hospital was a recent guest at the home of her parents, Mr. and Mrs. A. H. Stewart.

Mr. James Hayter, First World War veteran, is ill at his home and his many friends and acquaintances are wishing him a complete and speedy recovery.

Mr. Elmer Jeffery who is employed with the Maritime Electric Company in the City, spent the weekend at his home in Georgetown.

Capt. J. B. Scully, Canadian Army, stationed at Atlantic Command Headquarters in Halifax, N.S. spent the weekend at his home in Georgetown.

The ladies of Holy Trinity Church held a pantry sale and sale of fancy-work at the store of Mr. Harry Yorston on Saturday afternoon, which was well patronized and resulted in a substantial financial return to the ladies for their efforts.

A truck owned by a Cardigan firm, loaded with potatoes dropped through the Dominion Government Railway Wharf on Friday, on the clay top of the wharf, just north of the east ramp leading into the potato shed. It is thought that the recent storm washed away a portion of the old wall, which runs north and south along the wharf, some distance in from the east side. The truck was later hauled out, after having its load removed, and the damage which was not extensive, was estimated, no doubt, for future settlement by the Dominion Government Department of Public Works.

Mr. Douglas MacLaren, Provincial representative for Bergmann Construction Company, visited Georgetown last week, where he contacted Mr. A. E. Jenkins, local representative for Bergmanns. Mr. MacLaren made arrangements for the cleaning up of the pit-wood storage yard, located on the west side of the town. The truck racks at present on the site will be blocked up off the ground and the yard put in preparedness for future use. We are reliably informed that contracts are being finalized for pit props and pulp wood and that the Company expects to load three freighters each year at this port.

Workers last week removed the stacks from the roof of the Canadian National Railway Roundhouse. In the days of the steam engine, those large stacks carried off the smoke and gas from the engine. Due to the lateness of the season, it is not expected that any move will be made to dismantle this building and replace it with a more modern and suitable one. It is anticipated that plans for its replacement will be carried out next year. Located, practically on the main street of the town, it is hoped that a new building, if and when erected, will improve the C.N.R. holdings here, which to say the least could be made to show a much more presentable appearance than at present.

After the registration at 10 A.M., the members were divided in discussion panel groups during which several questions of importance were brought forth the meeting. Worship service followed, led by the C.G.I.T. of Murray River. Lunch was then served at noon.

The afternoon session got under way at 2 P.M. with a series of games during which the girls became acquainted with one another. Another discussion group was formed during which several thought-provoking questions were raised to be discussed.

At 3 P.M. a short demonstration on handicraft, consisting of shell and felt work, was given by Miss Mae Robinson, and Miss Brehaut of Charlottetown and Mrs. J. Douglas of York. The young girls also worked at these materials and found it most interesting.

Following a short worship period late in the afternoon, led by Miss Marquette Brehaut, a delicious supper was served by the ladies of the United Church.

Other leaders taking part in the rally included Mrs. (Dr.) A.D. MacKenzie, Montague; Mrs. R.A. MacLeod, St. Peter's; Mrs. MacPherson, Murray Harbour; and Mrs. Ferguson.

ARCHIVES

(Continued from Page 1)

would proceed very blindly if it neglected the many political and administrative precedents and practices which develop through the years. Prince Edward Island has been very lax in this respect, for a student of our political and constitutional past has virtually nothing available in this Province by way of valuable government documents.

No Good History

"Nor have government officials easy access to the experiences of their predecessors. The results are only too obvious. For example, there is no good history of Prince Edward Island; there are very few studies of Prince Edward Island's public men; virtually no research has been done on Prince Edward Island's economic development. This lack is deplorable in this modern era and the remedies must include the establishment of an archives.

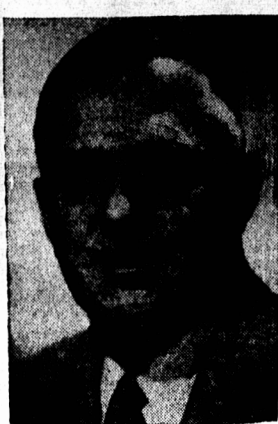

"It is significant that, although we have neglected our records, some of us have been keeping them for us. Copies of Prince Edward Island Government documents are in the Public Archives of Canada in Ottawa and a great deal of time and effort has been spent in collecting and cataloging them. The result is a magnificent collection of Prince Edward Island material of which they, and not we, are proud. Why shouldn't we have copies of all these documents in our own archives where they would be available to our government officials and our historians? It would not cost too much to have this done and the expenses would be more than met by the resulting benefits.

Early Leaders Unknown

"With respect to private papers, it might be well for us to ask: "What do we know of our former leaders?" The answer is virtually nothing. Our early leaders are unknown to us, and even our Fathers of Confederation are but names. In modern times successive governors, judges, and ministers of the crown resign or pass away and their deeds remain unrecorded and unknown. It is a deplorable fact that there are no biographies of Prince Edward Island's public men. In this respect we are far, far behind the other provinces, and the results have been very noticeable in our system of government.

"The retention of our old newspapers is also very important. They are probably the best running commentaries of contemporary life, and they would be valuable to us for study and reference. "My suggestion is a well constructed archives into which all old government documents should be placed for safe-keeping, newspapers filed or micro-filmed, and private papers and other records preserved. If we need examples of how well this can be done we need only look at government archives elsewhere: the Public Archives of Canada, the Provincial Archives of Nova Scotia, and the British Columbia Archives, all of which are excellent institutions. More-

Elected Yesterday At Bank Of Montreal Meeting

MONTREAL, Dec. 4 — Shareholders at the Bank of Montreal's 133rd annual meeting today elected Louis L. Lang (left), prominent Ontario industrialist, a vice-president, and named the Hon. Clarence Wallace, C.B.E., Lieutenant-Governor of British Columbia, to the board's board of directors.

Mr. Lang, who succeeds Mal-Jen, the Hon. S. C. Mowburn, P.C. (C.), C.M.G., as a vice-president, is president of the Lang Tanning Co., Ltd., in Kitchener, Ont., and of the Mutual Life Assurance Company of Canada. He also holds positions on the directorate of a number of other companies.

General Mowburn, who will continue on the bank's board as a director, is also associated with a number of corporations as a member of the directorate.

The new B of M director, Mr. Wallace, who is president of the Burrard Dry Dock Co. Ltd., Vancouver, is well-known in Canadian ship-building circles, particularly on the west coast. A veteran of the first world war, he is honorary president of the Navy League of Canada and a director of the R.C.A.F. Benevolent Fund. He succeeds William G. Murrin, who has retired from the bank's board of directors.

over, universities and colleges in the other provinces have been working even harder than the governments to retain valuable records. One need only examine the Bennett and Bonar Law papers in the library of the University of New Brunswick to see what a stimulus such facilities provide.

"I should emphasize that our valuable material will not be collected or donated unless we have a good place to put it. Moreover, the longer we delay, the harder it will be for us to make a start.

Museum Defined

"The first point we must make with respect to a museum is to define it. A museum is not merely a dusty place for old brass kettles, stuffed owls, and pictures of deceased royalty. It is not a freak show; it is an educational institution. I make this point because the popular conception of a museum is usually distorted. The provincial museums should house a collection of historic objects designed to preserve our appreciation of the cultural and scientific phenomena of the Province.

"There are three processes necessary in a good museum: collection, research and education. Material must be found and donated and it must be properly classified and arranged by a well trained person. Nothing is worse than the results of an untrained amateur curator, proud of a miscellaneous but useless collection of junk. The collection must be done by someone who knows what he is doing.

"Collecting the material is just an initial process. Considerable research must be done if it is to be of practical value. Geological specimens, illustrative material concerning our economic resources and industries, and historic relics should be examined by experts, and the results, which are often extremely valuable, should be made available to scholars and government officials.

"The need for this might well be emphasized by asking the question: "What good research has been done on Prince Edward Island in the past?" The answer is virtually nothing, and our loss in terms of money and progress has been simply tremendous over the years. Again, someone else has been doing it for us, and scientists elsewhere have from time to time produced studies on various aspects of Prince Edward Island's industries and resources. These, however, have been virtually ignored in this Province.

Educational Factor

"The third function of a museum is education. Material should be properly displayed in appropriate show cases so that visitors and study groups may have access to it. Exhibitions of this material could be sent to schools throughout the Province. Lecture series and study groups could be held at the museum for student and adult education groups. A science display room, featuring the technical apparatus and methods involved in every day scientific process (e.g. the telephone and electric power) would be very useful to educational groups.

"I would suggest that a well equipped Provincial Museum should include specimens concerning our leading industries, such as agriculture and fishing. Our Indian folklore should be thoroughly explored.

NEW INSTANT COFFEE SAVES AS MUCH AS 40¢ A POUND!

85-Year-Old Coffee Firm Perfects Product with Superb Flavor

The news about coffee today is good! First, there's a remarkable new "instant" coffee which it took "real coffee people" to make. Chase & Sanborn scientists worked until they had produced a soluble coffee with the rich, robust goodness and true-coffee flavor of the famed Chase & Sanborn name.

Second — and important — this new "instant" saves you as much as 40 cents a pound over the price of regular coffee!

So now you can make magnificent coffee right in the cup — just adding hot water. No messy coffee pot. No grounds.

You'll never know how good instant coffee can be until you try

The only "instant" backed by 85 years of coffee experience

partment could be included where lectures on music appreciation, small recitals, and record programs may be heard.

"In all these faculties, museum, archives, library and art centre—the staffs should co-operate with federal agencies and Museum and with provincial agencies, where such as the public archives, and museums of the other provinces. An effective exchange of material among these groups would be an important step in expanding cultural activities. Moreover, this provincial organization should serve a valuable function by co-operating with local groups in the Province in making the facilities available in every part of the Island.

Experience Required

"It is extremely important to bear in mind that the project requires close study, careful administration by a good board of directors, and above all an expert historian and archivist at its head. Nothing is more damaging to a cultural centre than to have it organized by enthusiastic amateurs who have not been trained in history and who have no experience with archives. It will pay in the long run to secure a good historian at the beginning.

"The project will involve expenditure of considerable money, but it will be a very substantial return, not only in cultural aspects, but also in the research and dissemination of information concerning our government and our economic resources.

"I should point out that we at Prince of Wales College have been very enthusiastic about this question. In our brief before the Massey Commission a year ago, we suggested that the centre be located on the campus at Prince of Wales College. It could then make

use of existing facilities at the College and the College would benefit by its resources.

"The whole project, I believe, will be a stimulus to our young people, encouraging them to study and appreciate the traditions of this Province; it would be valuable to the Provincial Government in providing a means for the retention of public records; and it would be of immense value to our citizens generally."

SMOKE NUISANCE

PRINCE ALBERT, Sask. (CP) — Housewives in the west end complain that smoke from the oil-burning city power plant is making wash-day a headache. The Utilities Board is considering the problem.

REVOLT LEADER CAPTURED — Pedro Albizu Campos, Harvard-educated leader of the abortive Puerto Rican revolt, gestures as he talks to reporters after his capture in San Juan. He was forced out of his home with tear gas.

BUSY CUPID

CHURCHILL, Man. — (CP) — The matrimony rate is high among nursing sisters at Fort Churchill's military hospital. Two nurses became engaged in the same week recently, while six or seven left the hospital to be married in the last year.

only defence against an atomic bomb is dispersal from large centres to country areas, said William Farnen, South Porcupine fire chief, in an address recently. He attended the fire school at Toronto where civil defence was a major topic.

BIG FUND

The trust fund administered by the Federal Indian Affairs branch amounts to more than \$19,000,000.

Aluminum serves breakfast in bed!

HOSPITALS select equipment with unusual care. That's why aluminum utensils are used in hospital kitchens everywhere. Health authorities recommend aluminum because it meets every need of hygienic food preparation. Enjoy this food protection in your home, too. No other metal is more "food-friendly" than aluminum.

Note to the Housewife! Whenever you see aluminum on the outside of a food or drink, there's an "inside story" of purity well-protected. Aluminum utensils clean easily. To remove natural deposit left by foods and water, use steel wool with soap and water.

ALUMINUM COMPANY OF CANADA, LTD.

... Aluminum is friendly to food!
