NEW BLUENOSE SEEN ASSURED

LUNenburg, N.S. (CP) — Capt. Angus Walters said Wednesday night arrangements for a new Blue Nose racing schooner will be completed shortly for a cross-Canada fund-raising campaign to rebuild the famous Nova Scotia racing schooner Blue Nose.

Capt. Walters said a meeting of the Schooner Builders' Association will be held in Lunenburg on April 10 to discuss the campaign.

He said he was certain the ship would be built "even if I have to build it myself."

FRONTIZI IS TRUSTED

BUENOS AIRES — Argentine annual forces selected the year-old Frontiz regime, after rebuffing military pressure for 11 tense days, was finally conceding defeat.

Combat troops armed with machine-guns maintained control of Government House, Frontizi, who hours before rejected the military chiefs' personally delivered ultimatum to resign.

The minister who has urged repeatedly that Island farmers be assured of a fair price for their produce.

PREMIER'S PLEA FOR MORE HOME GRAIN

The need of more grain production in the province was urged anew to the provincial legislature yesterday when Premier Walter Shaw said "I look with great concern at the growing shortage of animal feeds."

The comment came as the house was studying the report of the standing committee of agriculture.

U.S. SENATOR HAS PROTEST

WASHINGTON (CP) — Senator Kenneth B. Keating, New York Republican, said Wednesday he hopes the U.S. government will protest strongly against Canada's new sale of wheat to Communist China.

"It is inconceivable to me why Canada persists in pursuing such a course," the member of the Senate internal security subcommittee said in an interview.

"There is no doubt in my mind that if it came to a real vote, Canada would stand with us. But history has shown that the transaction, built up a potential enemy, eventually you are not able to appease it."

U.S. Russia Sidestep Canadian Space Proposal

By MORIS IAL
GENEVA (Reuters) — The United States and Russia sidestepped Wednesday the issue of space priorities for discussing disarmament, but were united in sidestepping a Canadian proposal for immediate consideration of a peace guarantee for space.

The United States and Russia did not figure either in a four-point priority plan proposed by the Soviet Union on a three-point counter-proposal by the U.S.

Only Italy and Sweden supported Canada's proposal, British Foreign Secretary Home welcomed the Russian plan, but did not comment on the proposal Wednesday.

Green of Affairs Minister Rossiter said the conference to give his proposal immediate attention and thus save the world from the "most far-reaching and dangerous" orbiting of nuclear weapons in space.

REJECTS PROPOSAL
Soviet spokesmen said the Canadian proposal was not a measure which could be implemented immediately and would do nothing to the formulation of a treaty on general and complete disarmament.

American delegate Arthur Dean said there would have to be adequate support and control for Canada's proposal to keep space projects limited to peaceful purposes.

Supplemental Items Get House Scrutiny

OTTAWA (CP) — Opposition members in the Commons expressed the view Wednesday that the Eastern Dairy producer has replaced the Western Grain farmer as Canada's major agricultural problem.

Solutions offered to combat the mounting dairy surplus included: Regulation of margarine production and sales; a search for uses other than butter and cheese for surplus milk; and a nationwide distribution program to schools.

The plight of Canada's dairy industry dominated debate as the Commons launched study of the 122,771 votes of additional spending items for the fiscal year ending Saturday.

Arnold Peters (CF-Timiskaming) suggested the dairy industry now is in the position of the steel industry and would still be occupying half the Commons time.

"Emergency measures should be taken to safeguard the dairy industry in Eastern Canada," said Samuel Boulanger, member for Drummond-Arthabaska.

Mr. Peters, who represents a northern Ontario farming area, said the New Democratic Party if it came to power at the next federal election would appoint an agriculture minister from the east.

W. H. McMillan (L-Welland) adopted the view that since the dairy surplus originated in a surplus production of fluid milk, attempts should be made to find other uses for the milk.

"Emergency measures should be taken to safeguard the dairy industry in Eastern Canada," said Samuel Boulanger, member for Drummond-Arthabaska.

June Election Support Growth

OTTAWA (CP) — There is a growing feeling in Ottawa that the federal general election expected this year may be called for June 11 or 18.

Usually well-informed circles, who previously banked on an autumn vote, now consider it an almost even choice between June and October. They hold the view that the final decision has not yet been made.

Governing factors are expected to be the final decision to develop over the next few days, the mood of the country and the composition of the House of Commons.

Three Bodies Recovered From Ruins Of Flooded Hotel

ST. JOHN'S, Nfld. (CP) — Three bodies were recovered Wednesday from the smoking ruins of a hotel at Harbor Grace, Nfld., 25 miles northwest of St. John's.

Dead in the fire that raged through the wooden building Tuesday night were a 65-year-old man, a 65-year-old woman, and a 25-year-old man.

All were permanent boarders of the 24-room Fire's Hotel. The bodies were in the building when the fire started, although the hotel was booked to overflow with hockey players and fans in Harbor Grace to watch the Newfoundland Senior Hockey League finals between Corner Brook Royals and Conception Bay Wolves.

Officials said about 130 people had registered at the hotel, owned by Mr. and Mrs. Alonzo Pike, but only about 25 were present when the fire started, shortly before the end of the hockey game.

Twenty persons were injured, including Mrs. Alonzo Pike, 62, a local fish plant employee, fractured several ribs.

U.S. Conducts Nuclear Test

WASHINGTON (AP) — The United States conducted another underground nuclear test Wednesday at its Nevada testing site. This is the 23rd announced test since the U.S. resumed testing in 1951.

The Atomic Energy Commission said the detonation was of low yield, the term it uses for explosive power less than 30,000 tons of TNT.

House Hears Drop Proposal For Stockyards Here

The discussion developed when the report of the standing committee on agriculture was being considered. Keith Harrington, PC-3rd Prince, is committee chairman.

Premier Shaw said an Ontario feedlot manager had told him they would take all the good feeder cattle they could get in this province. The price, the premier had been told, was 22 cents per pound.

House Sittings Scheduled Today

According to today's schedule for the Legislature, Lieutenant Governor F.W. Hyndman will receive the address in reply to the Speech from the Throne in the Confederation Chamber at 2:30 p.m.

Business will then be resumed after and there is an evening sitting scheduled for 8 p.m.

Liberal Renews Assault On Bill

"The time will come when we shall have Government by British democracy is founded on the right of the legislature, the elected representatives of the people, to vote supply, but this bill takes away that right. It puts in the hands of three members of the government, an

interlocking Industrial Corporation Act amendment.

New Wheat Sale Is Made To China

OTTAWA (CP) — A new wheat sale to Red China involving just over 20,000 bushels worth \$75,000,000 was announced Wednesday by Agriculture Minister Alvin Hamilton. It is the biggest of the six grain deals completed to date with China.

Mr. Hamilton gives a long, desk thumping welcome back to the Commons after a two-month illness, said the latest contract boasts to 108,000 bushels of the amount of wheat sold to Red China under a long-term credit agreement that is ultimately to reach 166,700,000 bushels of wheat and 46,700,000 bushels of barley.

Canada has so far sold 26,100,000 bushels of barley in addition, China purchased 31,700,000 bushels of wheat and 11,700,000 bushels of barley on a cash basis last spring.

Payment terms for the latest purchase are identical to five previous contracts—25 per cent cash and the balance on 270 days' credit with interest.

The transaction, Mr. Hamilton said, is built up a completed within the \$100,000,000 credit guarantee made by the

Blasts Damage Texaco Plant

CAMPBELLTON, N.B. (CP) — Three stored explosives exploded by a fire ripped through the bulk storage plant of Texaco of Canada Limited Wednesday, causing damage estimated to be about \$75,000.

Manager J. W. Mallett is in hospital with severe burns to his face and arms and chest. He was the only occupant of the building.

WATER SURVEY CHEVRIER TO BURTION

A report was read by Mr. Chevrier from Dr. Burton Howarth, who conducted a partial sur-

vey of the village for water contamination. The report indicated that of 110 drinking water supplies examined, 22 were contaminated; of 107 water in sewer systems inspected, 49 were faulty. It was noted that 49 per cent of the population of the village were drinking contaminated water from wells that were of faulty construction.

Also inspected were 123 sewer disposal systems of which 46 were found to be unsatisfactory. Ten outdoor toilets were found to be unsatisfactory. It was noted that 18 persons in two dwellings were carrying water in open buckets.

IDEAL SOLUTION

The ideal solution recommended in the report was the construction of a complete sewer and drinking water system.

The commissioners report stated that there were three reasons for recommending the installation of a sewerage system. These, Mr. Chevrier said, are:

1. To protect the health of the population.

2. To protect the environment.

3. To protect the property of the population.

WANTS IT DEFINITE

Mr. McQuaid wanted to know definitely if the recommendation meant that prisoners were to be freed through the kitchen and not

by outside services. He pointed out that his improvements had earned money for his 1962-63 estimates for jail improvements and wanted to know what the committee meant by its recommendations.

The committee member, Stewart Ross (L-4th Queens) said the prisoners in the Prince County Jail wanted to return to the old system.

"I think it should be in the report that the prisoners recommended the change," Mr. McQuaid said.

"Oh God, I tried, I tried, but I couldn't move that woman from the window, I couldn't fig-

ure out what was holding her back," said Mr. Parsons.

He said she "still alive" when he reached her from a ladder. "I tried to get my arms around her waist and tip her out of the window when I discovered that someone else had been inside the room."

"I think this is ridiculous," said Dr. Herbert McNeill, minister of Public Safety.

the village with Laurie A. Colles of Laurie A. Colles and Associates consulting engineers. Mr. Colles was attending a meeting of the village rate-

Sherwood Residents Vote To Install Sewage System

The ratemakers of the Village of Sherwood decided by a vote of 16 to 40 to go ahead with the installation of a sanitary sewerage disposal system in the village.

The special meeting was presided over by George Cheverie, chairman of the village commissioners, who read a report of the commission on investigation done in regard to the matter.

He outlined a number of recommendations, which were accepted by the meeting. Laurie A. Colles of Laurie A. Colles and Associates, explained in detail how the proposed system would work and what areas it would serve.

COMMITTEE REPORTS TABLED

Reports of the committees on the proposed sewerage disposal system and the proposed water supply system were tabled.

Jail Kitchens Proposed Leads To Lively Debate

By DON MACLEOD
Guardian Staff Writer
Although inmates of the province's county jails are fed through a outside catering system, the Legislature's select standing committee on public buildings has recommended that jail kitchens facilities in the Prince and Queens County jails be modernized.

The standing committee's report was read in the Legislature yesterday and today by the House in committee.

Attorney-General Melvin McQuaid pointed out that it would be ridiculous to modernize the kitchens in the jails if prisoners

are to be fed by a catering system. "I have no objection," he said, "providing a change-over is made so that the kitchens will be used as outside catering facilities."

"I imagine," said Opposition Leader A.W. Matheson, "that the committee members imagine are to be fed from the kitchen."

"That thought was in the back of my mind," said committee chairman Frank Myers (PC-1st Queens).

Mr. McQuaid wanted to know definitely if the recommendation meant that prisoners were to be freed through the kitchen and not

by outside services. He pointed out that his improvements had earned money for his 1962-63 estimates for jail improvements and wanted to know what the committee meant by its recommendations.

The committee member, Stewart Ross (L-4th Queens) said the prisoners in the Prince County Jail wanted to return to the old system.
