Nursery Club Holds Meeting

The Nursery Club of the King's County Hospital, Montague, held their first fall meeting on Wednesday, October 21st, at the home of Mrs. Carl Stewart, with the president, Miss Florrie Beaton, presiding. Eight members answered the roll call. Minutes of the last regular meeting, which was held on April 27th, were read and approved.

It was decided to have the club's first year end on December 31st to coincide with that of the King's County Hospital and other organizations in connection therewith.

It was the intention of the Nursery Club to hold square dancing classes for the pupils of the Montague Memorial High School, but as it would now be impossible to complete the two months course before Christmas, it was thought advisable to leave this matter over until early in the spring.

With a kind co-operation of Mr. B. F. Yeo, the club will sponsor a show early in November, and plans were made to solicit the ladies of the community for candy to be sold at this time.

Mrs. Carl Stewart was authorized to purchase materials in order that sewing may be commenced at the next meeting, which is to be held at the home of Miss Florrie Beaton. Mrs. Horace Fraser and Mrs. Leon Johnston were appointed on the lunch committee.

At the close of the meeting lunch was served by the hostess, assisted by Miss Florrie Beaton and Miss Adah MacGregor.

Personals

Mr. and Mrs. Ethan Stewart and daughter, Sandra, Montague, are spending a few days visiting friends in Stellarton and Halifax, N. S.

Mr. T. J. Kichham, M.P. for King's, was a visitor to Montague yesterday in connection with the Federal building.

MacLure-Cook Wedding

A very pretty wedding was solemnized at the Presbyterian manse, Montague, Thursday afternoon, at four o'clock, when Ada Allen, eldest daughter of Mr. and Mrs. Robert Cook, Wood Islands, became the bride of Mr. B. C. MacLure, Montague. Rev. F. N. Young, officiated.

The bride looked charming in a street-length dress of navy tulle with light blue accessories. She was attended by her sister, Miss Nanette Cook, who wore a street-length dress of fuchsia tulle with black accessories. Mr. Richard MacLean, Montague, was best man.

Following the ceremony, a reception for the immediate relatives was held at the home of the bride's parents. The bride's table was centered with a three-tiered wedding cake which was beautifully decorated, and topped with a miniature bride and groom. The toast to the bride was proposed by Mr. Gilbert Clements and responded to by the groom.

Later in the evening the happy young couple left on a honeymoon trip through the Maritimes. On their return they will reside in Montague where the groom is employed with Poole & Thompson, Ltd. The bride is a popular employee of the Island Telephone Co. in Montague.

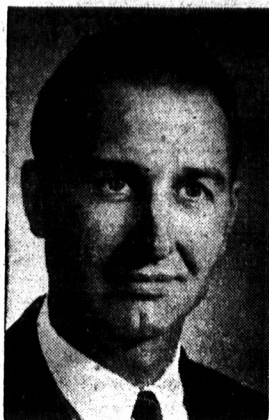

The Week At S.D.U.

Continued from page 5

The score read S.D.U. 5, P.W.C. 5 at half time. In the second half the Saints led the game, but by virtue of Bud Lawlor's penalty kick. The P.W.C. team, always the opportunists, recovered a fumble in centre field and one of their fast backfield men ran across the S.D.U. line for a try which was converted. This left the score 10 to 7 with P.W.C. in the lead. With time running out the S.D.U. team heeled the ball perfectly and advanced it to the P.W.C. 25 yard line where Jackie Macdonald was fed the ball from a play started by Max Callaghan. Jackie raced the 25 yards and placed the ball between the P.W.C. goal posts. Lawlor tried the convert and came close to clinching the game, but nobody cared too much when his kick failed. Our team played a lovely game and had tied it up in very spectacular fashion. We hope this is displayed by our second team on Wednesday will be an inspiration for our first team, which plays Dalhousie University at S. D. U. today.

A man who plays a big role on the campus, and whom we have failed to mention in our previous writings is the football manager, Andrew Macdonald. Andy has been busy since college began, buying cleats, sweaters, etc. for the players and we think he deserves special mention for the efficiency he has shown in carrying out his managerial job.

The Intramural Football League, under the coaching of Fr. Allan Macdonald, is rapidly reaching the end of its schedule. There are four teams in the Senior Intramural League, namely: Seniors, Sophomores, Freshmen and High School. At present the High School team has been unbeaten and is leading the league with 9 points. In the Junior Intramural League there are three teams, namely: Hurons, Iroquois, Blackfeet. The Hurons are leading in this league with 10 points. We must not fail to mention Jimmy Johnston who capably assists Fr. Allan Macdonald in the management of the Junior Intramural League. Jimmy devotes much of his time in helping to instruct new students in the fundamentals of football and deserves great credit for his efforts. Remember: The virtue lies in

Find Accidental Drowning Was Cause of Death

That James Boyce Martin (of Grandview) came to his death by accidental drowning at Fullerton's Marsh in Queen's County, P. E. I. between the first and eighteenth day of October 1953 was the verdict reached by the Coroner's Jury after hearing evidence submitted at their meeting in City Hall last evening.

The report submitted to the Coroner, Dr. C. A. Coady, added "We would further recommend that a railing be placed on the Fullerton's Marsh bridge at an early date."

Evidence submitted by Dr. Harold Shaw indicated that the body was submerged for a considerable period of time. A microscopic examination of the tissue of a head injury suggested that the same had occurred after death. Judging from the quantity of alcohol found in the blood he would say that in the average person he would be intoxicated. "Death was due to drowning in the absence of any indication of other cause," the witness concluded.

A written statement from Mrs. James Boyce Martin, widow of the deceased was accepted in evidence due to the condition of her health. The statement said that the deceased had been drinking at 6 p. m. on Oct. 1 and at 9:15 p. m. when seen at the store she could see no change in his manner. He said he was going to the dance anyway to hear the music. The witness was in the store in darkness at 12:30 a. m. when the deceased entered, lit a match and picked up something which she believed to be matches. Witness remained at the store until dance was over and found the deceased sitting in the car asleep at the wheel. She succeeded in walking him and he got out of car, but re-entered the back seat. This was the last she saw of him.

Frank Hamm-Everett, MacDougall and William Crane gave evidence regarding the search for the body which was followed up by evidence from Constables McNairn and Griffith of the R.C.M.P. Fullerton's Marsh bridge and the subsequent efforts made to trace the body were followed by an extensive search of the Marsh by R.C.M.P. in an endeavour to locate the missing man.

On concluding the hearing of evidence, the jurors retired and brought in the above verdict. The jurors were William Spence, Gordon Crane, (foreman), Weston George MacLeod, James Alexander Beaton, George Arnold, Burhoe, George Aberdeen Smith, Arthur Laughlin MacPherson and Samuel Alexander MacLeod.

Mr. J. P. Nicholson appeared for the Crown.

Chrysler Corp. Buys Company

DETROIT, (AP)—Chrysler Corp. announced Friday it has agreed to purchase the Briggs Manufacturing Co., a major auto body supplier, for \$35,000,000. Briggs normally employs about 35,000 workers.

The purchase plan includes all principal Briggs plants, machinery and equipment, but does not include the Beauty Wear division of Briggs, which makes plumbing fixtures. Briggs makes most Chrysler bodies and also supplies Packard.

Montague Federal Building Re-sited

Information has been received that Mr. T. J. Kichham, Federal member for King's County, and Mayor B. H. Yeo of Montague, were successful in arranging a meeting with Hon. Robert H. Winters, Minister of Public Works, Ottawa, at the Charlottetown Hotel Thursday evening, October 22, and a most satisfactory arrangement was worked out as to re-siting the new Federal building.

The new plans require that the building be set back 23 feet from the sidewalk with a rear entrance from the newly paved street running parallel to Main Street for mail couriers, etc. It is understood that the front may be landscaped, and should prove most attractive. The building was placed originally 11 feet from the sidewalk.

It is also understood that additional land has been purchased from Mr. V. R. Pepler, Montague, and Mr. H. E. MacLaren, Charlottetown, to permit space for mail couriers and vehicles of the officials in the various departments in the new building.

A telegram has been received from the Assistant Minister of Public Works, Ottawa, which confirms the new arrangement, and this is greatly appreciated by the citizens of the entire town. The Mayor and Town Council wish to extend their thanks to the Hon. Robert H. Winters, Minister of Public Works, and others who were instrumental in having the wishes of the citizens of Montague consummated in this particular instance.

NEWSY NOTES

By J. A. Clark, D.S.

FIRE

Fire is one of the greatest blessings the human race has known. Fire has also caused great destruction to human life and property; man has not yet learned how to fully control it. Fire was known in prehistoric times. The vast majority of mankind had possession of fire and had acquired the art of making it as far back as any record exists.

Volcanoes have belched forth fire and lava and trees have been set afire by lightning before man existed on the earth. Primitive man was so awed by fire that he worshipped it. It was used in the temples of the Parsis of India as a symbol of purity. Fire has always been regarded as the great purifying element.

The word fire comes from the Greek "pyr" fire. It was essentially the ignition of flammable vapour. The original method, believed to be over 4,000 years old and still practiced, was by simple friction of rubbing together two pieces of wood. These formed a "stick-and-groove" when a blunt-pointed stick was run along a groove in another stick lying on the ground.

In this way the Tahitians can produce fire in a few seconds. Captain Cook described native Australians who produced fire as follows: "They take two pieces of soft, dry wood; one is a stick about 8 or 9 inches long, the other piece is flat. The stick they shape into an obtuse point at one end, and pressing it upon the other, turn it nimbly holding it between both hands."

The Egyptians, 1500 B.C., invented the bow drill, which speeded up the twirling and the production of fire. Eskimos struck iron-pyrites against flint and thus ignited dry Arctic heather.

The use of flint and steel to make fire probably came into use soon after the beginning of the iron age, which is thought to have occurred about 1350 B.C. By placing iron in a fire, the Bessemer converter was developed in 1855 A.D. and made possible the economical mass production of steel. Fire has produced the key to the vast industrial expansion that has followed. Low-priced steel and the machine age have given the world modern transportation systems.

power and communication. Fire today is used somewhere in the production of almost every essential manufactured material.

TYPES OF FIRE

Oxygen and acetylene when properly blended and ignited create an intensely hot flame that is used for cutting metals and for welding them. The quality of steel

FOREST FIRES

Forest fires have caused enormous losses to the timber lands of North America. The States and Provinces have their fire laws, forest rangers and fire fighting organizations, but carelessness and indifference to the danger of uncontrolled fires have done immeasurable damage not only to the forests but to the soil and wild life.

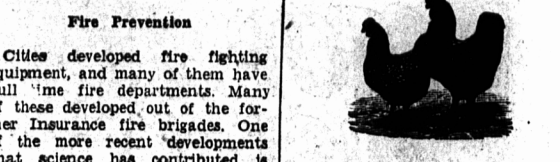

Conflagrations

The earlier cities on this continent were largely constructed of wood. They grew up without planning for fire protection, and great conflagrations occurred. In 1871 the great fire occurred that destroyed 3 1/3 square miles of Chicago. New York City had three great conflagrations during the 19th century. San Francisco had a terrible conflagration following the great earthquake. Many other cities, including several in Canada, have suffered from widespread fires.

Following the great fire in London, England, in the 17th century, there was such a general public outcry for some form of protection for property that an enterprising builder formed a crude system of fire insurance which met with success. The early fire insurance companies, to overcome their heavy losses, organized their own fire brigades to protect the property they insured.

When an alarm sounded at all available brigades assembled at the fire. In time while the brigade of the company that had insured the property fought the blaze, the other brigades stayed to watch. Large conflagrations bankrupted many insurance companies. This led to outright refusal to insure in certain areas, and the insurance
