A CROWNING GLORY.

FASHION'S CAPRICE ALLOWS INDIVIDUALITY IN COIFFURES.

The Hair Needs Much Care—Secrets of the Toilet That Will Add Greatly to the Attractiveness of the Well-Groomed Woman.

The fashion in coiffures is yours to command.

The fashion in hair itself leaves you no choice.

For a very long time the fluffy coiffure has held the fort, and whether milady was a Titianesque beauty made by nature, or a chemical blonde, she passed muster so long as she raveled and

MINERVA PART AND PRINCESS OF WALES TWIST.

frizzled her tresses until she looked like a giddy girl in a gale.

There is no longer any style that must be followed under pain of expulsion from the circlet of fashion's votaries, if one ventures to ignore it. Fashion has been slowly coming to her senses these thousands of years, and she is arriving now at the point of lunacy, where she says the gods forgot to make some of you beautiful, there do up your hair to make yourselves look as well as you can.

If it suits your face to wear a Bath bun under your bonnet, do so. If the Cleveland pompadour, or the Brown-Potter tangle or the Rejane ringlets suit you best, copy them. If none of these are in sympathy with the shape of your head and the tilt of your features (viewed from all points of the compass), try the style so much in vogue now that combines the Princess of Wales twist and the Minerva part, especially if you have some tiny diamond studded shell combs to set aslant in your temple locks.

But!

While you may wear your hair straight or waved, high or low, flat or at right angles to the crown of your head, you must have it silky and glossy and smooth and moist to look upon.

Your head must look as well groomed as it is the fashion for your body to look.

The secret?

Do not wash your hair oftener than once a month, unless some emergency arises to make the exception necessary. Do wash your hair combs and brushes once a week in hot water and ammonia. If you think it isn't necessary look at those you used this morning under a microscope.

Before washing the hair break an egg into a cup and stir it well, but do not beat it. Rub it thoroughly into the roots of the hair all over the head. Wash it out with warm soft water and good soap; rinse the hair in clear water thoroughly, wipe with a towel and fan dry.

When dry rub into the roots of the hair, not upon the hair itself, a little clean, pure olive oil. If the hair is naturally oily, apply the olive oil once a month after the shampooing. If naturally dry, apply the oil once a week. Brush the hair night and morning for fifteen minutes with a soft, clean brush.

This is the sole treatment advised by one of the foremost dermatologists in this country, one whose advice is eagerly sought abroad. For the advice given in his office in office hours he charges $10.

Toilet Accessories.

There are many things necessary nowadays for the up-to-date toilet table. One of the requisites, which fortunately, can be procured without expense or trouble is a jar of salt—common table salt and it is a panacea for many ills. A little of it dissolved in warm water is sure to remove the slight inflammation from eyelids reddened by a long drive in the wind. If used for a gargle it will allay any slight irritation in the throat; a little should occasionally be put in the water in which one's teeth are brushed, as it helps to harden the gums.

Tincture of camphor or tincture of myrrh, dropped into water, is an excellent wash for the mouth and throat when the breath is not sweet. When the latter is used the proper proportions are ten drops of myrrh to a glass of water.

Powdered alum is another important adjunct; a little should be thrown into the water in which you bathe your hands before putting on gloves for a crowded reception or ball, when there might be a tendency to perspire too freely.

It is said that a few drops of sulphuric acid in the bath water is also a preventive of the too free perspiration of either hands or feet.

A equal mixture of lemon juice and glycerine is another "aid to beauty," necessary to the toilet table—it whitens as well as softens the hands.

Fashions in Engagement Rings.

For engagement rings the solitaire diamond is almost invariably used. Some lovers prefer to use the birth stones of their fiancee, garnets for January, amethysts for February, bloodstones for March, diamonds for April, emeralds for May, agate for June, rubies for July, sardonyx for August, sapphires for September, opals for October, topaz for November, turquoise for December. Where more than one stone is used the stones are arranged in a special design. Another fashion, one borrowed from the Germans, is to use a plain band of gold in which the initials and date of the engagement are engraved, space being left for the date of the marriage, at which time the newer date is added and the ring used as the wedding ring.—Ladies' Home Journal.

WANTED TO DIE.

(From Harper's Young People.)

Many years ago, according to one of the yarns of the sea told by mariners who claimed to have been present, a British ship having on board a large consignment of Spanish dollars for a house in Rio Janeiro was wrecked on the Brazilian coast. Hoping to save some of his precious cargo the Captain ordered some of the casks containing the gold brought on deck, but the vessel was so badly wrecked by the continuous pounding on the rocks that it was soon found necessary to take to the boats without any of the treasure. As the last boat was about to leave the ill-fated craft, one of the officers, to make sure that no one was left on board, went back to make a last tour of the ship. To his surprise, sitting beside one of the casks with a hatchet in his hand, he found one of the sailors.

"Hurry up!" cried the officer. "We came within an ace of going off without you."

"I'm not going," replied the sailor, giving the cask a hearty whack with the hatchet, bursting it open and laughing with delight as the coin poured out around him. "I've always wanted to die rich. I've been poor all my life, and this is my first and last chance. Go ahead. I'll stay here with my fortune."

Argue as he might, the officer could not persuade the fellow to leave the gold with which he played as a child with marbles, and he finally had to leave him to his fate.

LACTATED FOOD A SCIENTIFIC PREPARATION.

Lactated food is the only scientific prepared food in the world. When cooked it is entirely free from starch. Young infants cannot digest starchy substances.

Lactated food posseses the highest per centage of any artificial food of the true nutritive principle of wheat, barley and oats—the three perfect cereals.

Sugar of milk being the basis of Lactated Food, the effect of the food in young infants is indentical with mother's milk.

Lactated Food is easily assimilated; it is a perfect corrective of stomach and bowels, and the most perfect strengthener and vitalizer for babies who are weak, puny, sleepless, cross and fretful.

THE KENT CASE.

A Visit to the Works of the British North American Note Company.

OTTAWA, April 8—A visit paid yesterday to the work of the British North American Bank Note Printing Company in whose employment is Mr. G. H. Kent, the reyort of whose recovery from Bright's disease with all its accompanying horrors of swollen limbs, convulsions, coma, and fearful pains, has been the cause of so much dission in the city, showing that he is still in the enjoyment of the health which he has gained by the judicial use of Dodd's Kidney Pills. For a man who may be said to have had one foot in the grave, and whose health is despaired of, he presented a remarkable picture of health and vigor, and pursued his work at the heavy presses without any indication of weariness. He is loud in his praises of the remedy which cured him.

It is learned that Mr. J. G. Ward, the treasurer of New Zealand, who will probably visit Canada in a short time, is prepared to discuss more than the tariff question. Mr. Ward is an ardent advocate of preferential trade within the colonies and may be expected to put forth every effort possible to effect an arrangement with Canada. He is authorized by the Government of New Zealand to state that it will cordially operate with the Canadian and Australian Governments in making Mr. Huddart's new steam service a success as recommended by Lord Jersey.

20 YEARS OF SUFFERING!

20 Failures to Cure

For 20 years I suffered the torments of the damned with blind and itching piles. Had I known of any cure I would not have hesitated to have given hundreds of dollars to obtain it. I followed the instructions of an eminent physician in using syringe treatments. I used Fowler's Pile Cure and 20 others of different kinds. From some a little relief was gained, but nothing approached a cure. I was about resigned to the fate of having to pass through an almost uninterrupted course of suffering so long as I lived, when Chase's Ointment was brought to my notice. The statements in regard to it were so strong and bore with them a sense of conviction sufficient to overcome my skepticism in regard to its being no better than the rest. I used it, with the result of receiving immediate relief and permanent cure. For weeks and weeks I was fearfully afraid of a return to misery, but it did not occur. I started using Chase's Ointment, hoping for relief and realized a cure that is permanent. I do not believe there ever was a worse case of blind and itching piles than mine, which leads me to think there is not a case to be recorded that Chase's Ointment will not cure.

Yours truly,
GEO. W. MORRIS,

Within the memory of middle-aged people Consumption and other lung troubles were much more prevalent and fatal than they are to-day. The existing improvement in the public health in this respect is, in considerable measure, due to a more widespread appreciation of sanitary laws; but Puttner's Emulsion of Cod Liver Oil, with the Hypophosphites of Lime and Soda, and Pancreatine, may justly claim to have largely aided in the good work. Many persons who some years ago were in a most critical state of health, are to-day sound and well, as a consequence of a faithful use of this valuable remedy.
