AMMONIA.

In the mechanical world AMMONIA is of great use. Its alkaline effects make it very valuable for the coarser sort of scouring and cleansing. Some manufacturers of Baking Powder resort to it to the most frequently and recklessly. They by its use make a great saving in Cream of Tartar, and the consumer suffers in its proving highly injurious to the coating of the stomach.

The Official Report of the Dominion Government shows "That a Baking Powder sold in this vicinity contains Ammonia."
