D. W. FINLAYSON, Charlottetown, Dec. 30, 1895. LEPAGES' OLD STAND.

A Small Boy With an Axe

might be able to make a hole in one of those Cobler Seats. No danger of his spoiling it in any other way. They're the most durable, most stylish, cheap Rocker made. The cheapest and best at JOHN NEWSON'S. Charlottetown, December 10, 1895—dy

Tired but Sleepless

Is a condition which gradually wears away the strength. Let the blood be purified and enriched by Hood's Sarsaparilla and this condition will cease. For two or three years I was subject to poor spells. I always felt tired, could not sleep at night and the little I could eat did not do me any good. I read about Hood's Sarsaparilla and decided to try it. Before I had finished two bottles I began to feel better and in a short time I felt all right and had gained 21 pounds in weight. I am stronger and healthier than I have ever been in my life. JOHN W. COUGHLIN, Wallaceburg, Ontario.

Hood's Sarsaparilla

Is the Only True Blood Purifier. Prominently in the public eye today. Be sure to get Hood's and only Hood's. Do not be induced to buy and other. Hood's Pills cure all liver ills, biliousness, indigestion, headache, etc. How Long Will It Last in Modern Steel-Frame Structures is a Question. The radical change, within the last few years, in the construction of large buildings—steel taking the place of brick and stone in securing strength and rigidity—makes pertinent a discussion on the durability of iron in modern structures, which was the subject before a recent meeting of the Chicago Engineers' Club. When iron is used in a perfectly dry location it can be depended upon indefinitely. But experience has shown that moisture can be driven through a stone or brick wall at least three and one-half feet thick. How to protect the steel from the oxidizing and deteriorating effects of moisture is a subject on which the engineers do not agree. Painting is advocated by many, but the matter of a suitable material for paint is also an open and an important question. One engineer of long experience doubts if any paint will ever be discovered which will prove a permanent protection to iron. He advocated, therefore, that buildings be so constructed that all the vital parts be got at for inspection and treatment. Under present methods the steel structure is encased in stone, brick or terra cotta, where it is apt to become damp and rusted, and where it is impossible to protect it from the corrosive action of the elements. Migration of Sog. "Annie Rooney" is taken directly with a mere change of tempo, from a chorale of Bach, and Wagner derived the so-called leit motif "Parsifal" from the same source as the author of "Down with the King." It was announced as a special attraction that a certain Mlle. Dufont would, in the course of a play, sing the celebre chanson Anglaise, "Tha-ra-ra-boum-dere." When the time came and Mlle. Dufont appeared she had an immense audience. The first few lines made it evident (as to the audience, however) that this ingenious young woman had shrunk from the task of "getting up" the lines of the genuine version, but had instead constructed a set of verses of her own by piecing together all the English words she had ever heard. The first verse then ran something like this: Ticket tramway clergymen, Bistick runstieck, rosbif van Sandwich whitebait lady lunch Sheri-cobler, wicky punch; Oh—yes all right iver stop Pale ale wky nuttun chop Plum cake music steeper box Bull dog high five o'clock. Tha-ra-ra-boum-dere, etc. It was an immense success. The audience rose at her. They knew that the English was all right, because they themselves recognized a good many of the words. She had an ovation and nine encores. Their Thirst For Knowledge. "Mamma, what day is this?" "This is Friday, dear." "Where's Sunday?" "Sunday is still in the future." "How did it get there?" "I mean it hasn't come yet." "It hasn't? What's keeping it?" "Why, dear, it can't come until its time for it." "How does it know when it's time for it?" "Don't bother me, Katie." "Mamma, what's Sunday doing, anyhow?" He Cares for the Lord. "We are the portion the Lord takes out of the hand of His enemy and ours, and He cares for us as such. A love that is everlasting, a care that is likened to that which guards the pupil of the eye, a fidelity of attachment to which the mother's love finds no parallel—these have been expended on us and are still in operation towards us. Can it be doubted, then, that He cares for us."—Dr. John Hall. Power for Good. Multiply your power for good by putting yourself in God's hands, to be led and used by Him. Work with God, and let God work with you, for by being in harmony with God a man increases his ability by an infinite factor, and God and eternity alone can measure and reveal the result. TO LET. That large Shop, part of the "London House" Building, lately occupied by J. T. McKenzie, Tailor, with good room upstairs for work shop or store room. Apply to HON. DANIEL DAVIES, L. H. DAVIES, Q. C., Executors Estate late Geo. Davies, Or to F. W. L. Moore, Solicitor, in the Building. JOHN D. TAYLOR, Proprietor.

THE ELBE LOCATED.

But She is Too Far Down To Be Reached by Divers. The North German Lloyd Company sent a professional diver to try and locate the wreck of the Elbe, and to report about the possibility of getting at bottles, which may still be held in the wreck, and also to attempt to extricate what valuables might be wrecked. He reports the following: "We set out on the wrecking steamer Elise and hovered for almost two weeks around the spot where the Elbe sank. She lies listed to the port side at a depth of over 40 fathoms (230 feet). Favorable results could therefore hardly be expected. In spite of this we tried our best to descend to the vessel, but among six professional divers, two Germans, two Frenchmen and two Englishmen, not one could dive deeper than 170 feet. I attempted it once daily, for six consecutive days, but when I got to the depth mentioned, which was the greatest depth reached by any of those on board, the pressure of the water upon my body was so powerful that it seemed to me all the air was pressed out of my body. It was difficult to breathe; the ears began to pain and bleed, and a numbness seemed to penetrate the head, which I could not shake off. The beginning of warning consciousness. Since, with a diver attired in a scaphander suit, loss of consciousness would be fatal, the attempts to reach the Elbe had to be abandoned. From the deepest point I could reach, I sent a message to the surface as though a fog. This was to the port side, and the masts and smoke-stacks could plainly be seen."

HOOD'S PILLS

How Long Will It Last in Modern Steel-Frame Structures is a Question. The radical change, within the last few years, in the construction of large buildings—steel taking the place of brick and stone in securing strength and rigidity—makes pertinent a discussion on the durability of iron in modern structures, which was the subject before a recent meeting of the Chicago Engineers' Club. When iron is used in a perfectly dry location it can be depended upon indefinitely. But experience has shown that moisture can be driven through a stone or brick wall at least three and one-half feet thick. TO GIVE \$1,000,000 AWAY.

John D. Rockefeller's Proposed New Year's Gift to Chicago University. John D. Rockefeller, who has already given over \$4,000,000 to his pet project, the Chicago University, has notified the trustees that on Jan. 1, 1896, he would give the university \$1,000,000 in cash. Accompanying this generous subscription was an offer of \$2,000,000 more on condition that the University secure an additional \$2,000,000 by Jan. 1, 1900. Mr. Rockefeller will not wait for the entire additional \$2,000,000 to be secured by the university, but has fast as any part of it in \$500,000 or \$100,000 bundles is obtained he will present his cheque for a like amount. Dr. W. R. Harper, president of the university, says he is confident that he can raise the \$2,000,000 and thus secure \$4,000,000. If he does Mr. Rockefeller's endowments and gifts to the Chicago University will amount to more than \$7,000,000. His last cash gifts were in November, 1895, \$500,000. January, 1894, \$300,000; January, 1895, \$175,000. Previous to 1893 he gave \$2,000,000 in 6 per cent. bonds as an endowment, besides \$2,000,000 in other forms for building and school purposes. Chicago men and women have given an aggregate of more than \$5,000,000. The chief contributors are Marshall Field, Martin Ryerson, Sydney Kent and Charles T. Yerkes. It is a coincidence that this enormous gift should come so suddenly after the death of Prof. Bemis, for his attacks on trusts and millionaires. It is equally strange that during the time that Prof. Bemis taught his system of political economy gifts to the university were so plentiful. It is the intention of Mr. Rockefeller and the friends of the university in Chicago to make it one of the most richly endowed universities in the country. The one great factor against the success of the enterprise is that it is so nominal, and therefore narrow. President Harper's attainments are in the way of deciphering Sanskrit and interpreting Scripture, though his best success has been as a money getter.

WHEN IN BATTLE.

A Gigantic Red-Coated Sergeant Tells of Varying Emotions. "I should think there is scarcely more than one man in a thousand who can truthfully say that he has never known fear," remarked a gigantic red-coated sergeant to the writer. "I remember I was mortally afraid for my life the first time I was under fire. I saw men dying all around me, and it seemed impossible that I should escape. I turned cold all over, and shivered so that I could hardly hold my rifle. "When the enemy charged, however, it was different. I saw a man next me struck through the heart with a spear, and in a second I had shot down the man who had slain him. After that I forgot my own risks, and simply fought with one idea, to kill as many of the foe as I could before I was killed myself. Every time I slew one of the enemy I felt a thrill of fierce joy; in short, I was mad with the lust for blood. "Just previous to the engagement I have mentioned I saw a man in the same company who was actually crying from sheer fright; yet in the battle itself, that same man fought like a tiger, and saved the life of an officer by a gallant act, for which he was decorated. "You see, before the battle a man has time to think of what may happen, but in a fight he knows that he must kill or be killed, and he forgets all else. This explains why a man who will readily submit to a 'belting' from a smaller comrade in barracks, in a fight with the utmost courage in actual warfare."—Pittsburg Dispatch. Jews in Jerusalem. The regiment of Jerusalem by the Jews is one of those historical possibilities that specially captivates the mind by their appropriate picturesque. For years a fact probably not widely known among Gentiles—a systematic agitation having in view a return of the race to the home of their fathers, has been going on, and the present results are surely encouraging. Dr. Caleb Merrill, formerly United States consul at Jerusalem, says that of the 47,000 inhabitants of the Holy City, 27,000 are Jews. Another side of this programme of racial revivification and local unification aims at the restoration of Hebrew as a spoken tongue. But it appears from recent statistics that the Hebrew language is a dead language must be classed as a popular delusion. More people to-day are using Hebrew as a literary vehicle than when Moses drove his chariot through the Red Sea. Shakespeare and Goethe have been completely translated into Hebrew, and are read with avidity by thousands who enjoy at the same time the sublime poetry of Isaiah and of Solomon the son of David. All this recalls Disraeli's boast that he belonged to the most vital and unconquerable race in the world. The Greek and the Roman have evaporated, but the despised and tortured Jew—the Christ race of humanity—remains—Illustrated American. Homeless. The saddest thing I can imagine is a homeless man. One who has no abiding place; one who cannot stop without some one having him move on; for whom in all the earth there is no welcome resting place which he can call home and where love shares and softens his sorrows. Sadder than this is the homeless, homeless soul. While you are planning for the body think of the soul. Make provision for it by accepting God's merciful bounty for forgiveness and faith.—Rev. F. E. Smiley. PECULIAR in combination, proportion and preparation of ingredients, Hood's Sarsaparilla possesses great curative value. You should TRY IT.

RHEUMATISM

Its Cause and Cure. A poisonous Acid in the Blood, which needs removal. Only one means for a radical cure. Rheumatism is a blood disease, due to the presence of uric acid—a poison—in the system, and it is only by the removal of this pain-producing poison, that a radical cure can be effected. Acute rheumatism is hereditary, and thus it is that young children are often victims to this torture. The use of liniments, embrocations, and outward applications may give temporary relief, but can never cure, for the poison is in the blood, and until it is expelled, rheumatism, sciatica and neuralgic pains will continue. Scott's Sarsaparilla cures rheumatism by removing the cause—by neutralizing and expelling this poisonous acid. In chronic cases, this medicine reaches the source of the disease as no other medicine can. It gives energy to the organs that sustain life, the forces that make the blood. For the nervous troubles of youth, for the debility that precedes old age, for ladies in their severe ordeals, it is without a peer. Scott's Sarsaparilla is a concentrated compound of the finest medicines known to modern medical science.—The dose is from one half to one teaspoonful and during its use the ordinary vocations are not interfered with.

FURNACE LINE.

Regular Fortnightly Sailings between LONDON and HALIFAX. Under special contract with the Dominion Government. S. S. HALIFAX CITY, 3,000 Tons. S. S. ST. JOHN CITY, 3,000 Tons. S. S.
