Advancement in Nova Scotia.

THE Premier of Nova Scotia has recently, we are told, been "successful" in floating a million dollar loan. It must be admitted that in the heaping up of a permanent debt, Nova Scotia has, like P. E. Island — under Grit rule—advanced by leaps and bounds. But Premier Fielding's success in selling the debentures of his Province must be wonderful to the good Grit voter who is constantly assured by his party leaders and journals that the whole country is rapidly going to ruin by reason of the N. P. The explanation lies in the fact that Premier Fielding—following a great example—held up, while in England, the other side of the shield! In the official memorandum which he issued to the capitalists, he pointed out that the royalties on minerals have steadily risen from $100,-554 in 1884, to $169,503 last year, and declared that "the outlook of the trade in minerals is most encouraging. The coal mines are attracting the attention of capitalists abroad, and there are good prospects of larger operations in this branch of industry. Vigorous steps are being taken by practical men with a view to a larger development of the iron resources of the province." In short, the success of the Premier of Nova Scotia in floating his loan is due to the fact that he showed the British capitalists that Nova Scotia is in a prosperous condition. This showing is confirmed by the census returns which state that the manufacturing establishments of the Province have increased in number from 386 in 1881 to 2,104 in 1891, and the employes from 2,458 in 1881 to 7,914 in 1891. It is, indeed, clear to even the most superfisial observer that there is a great deal of mining and manufacturing activity in Nova Scotia resulting from the operation of the N. P. The cotton factories at Halifax, Windsor, and elsewhere, are still humming, notwithstanding the grit prediction that evil would befal them, and cotton is sold at prices which, in the ante-N. P. time, would have been considered marvellously low. The two Nova Scotian sugar refineries are still manufacturing for the Nova Scotians, and sending large quantities of sugar "out west." Excellent small steamers, as well as large sailing vessels, have lately been launched from Nova Scotian shipyards; and the future may see ocean liners and ironclads built at New Glasgow. Altogether, it will be admitted that there was a great deal of truth in Premier Fielding's representation, though we fail to see that there is good value to show for the money which he has been compelled to borrow. It has inured to the advantage of the grits in office rather than to that of the country at large.

Summer Watering Places.

The attractions of Nova Scotia for summer touriats are great. Lines of first-class steamers are daily bringing to the province hundreds of passengers. When its beauties become more widely known, and when adequate hotel accommodation shall have been provided, the daily visitors, in the height of the season, may be counted by thousands. The valley of the Annapolis, Windsor, Truro and Halifax, with Chester, Lunenburg, Mahone Bay and other towns along the Western Shore, possess strong claims upon the attention of visitors who are in search of recreation and health. The scenery of Nova Scotia is, for the most part, grand. In some parts, it is surpassingly beautiful. For instance, it is admitted by Scotchmen that Mahone Bay and its vicinity is equal, in point of natural beauty, with the scenery of Scotland; a Welshman has been heard to exclaim, in the fervor of his admiration, that it resembles some parts of Wales; while a travelled and cosmopolitan Englishman has ventured the opinion that it resembles more than any other spot that he has seen, the Bay of Naples. The coasts of Nova Scotia and Prince Edward Island are, without doubt, destined to be the summer watering places of North America. It is hoped that men of enterprise will erect suitable hotels at the most attractive points in both Provinces.

A Warning.

IT is stated that no one was in the Police Station this morning when the telephone first called for the fire alarm on King Street. It is also stated that a man had to run in from the scene of the second fire to the Police Station, in order to give the alarm. These reports may or may not be true. In any case, there ought to be no need to insist upon close attention to duty and constant watchfulness on the part of every officer, and the extension of the fire alarm system to every point in, and on the outskirts of, the town. The fate of St. John's is, surely, a sufficient warning.

White Blouse Suits, also a lot of Light Serge Suits for boys from 4 years up; also, 20 white and colored Vests, gents' sizes; Dusters in large sizes, suitable for summer wear. Will clear the above lot cheap.—James Paton & Co, 168 Victoria Row.

MASONIC.—Remember the Strawberry Festival in aid of the Masonic Temple and Public Hall to-morrow night.

There will be an entertainment in connection with the Strawberry Festival in the Masonic Hall, Water Street, on Tuesday evening.

CHRISTIAN CONVENTION.—The Railway men's Christian Convention will, this year, be held at Richmond, Nova Scotia. The date fixed is Saturday, August 27th and Sunday 28th. All Railway men in the Maritime Provinces, who are in sympathy with the movement, will please accept this invitation. They will find a hearty welcome. Evangelist Meikle is expected to be present. For any further information, address G. H. McKinley, President, Richmond, Nova Scotia.

POLICE COURT.—The following docket was disposed of at the police court this forenoon: A nuisance case, adjourned; breach of the Lord's Day act, fined $1 62 and costs; similar charge on same individual, dismissed; a boy nine years old, for destreying property, admonished and discharged; summons against a saloon keeper, for breach of Ch'town Liquor Regulation Act, discharged. This morning the police laid two informations against parties for breach of the Ch'town Liquor Regulation Act.

THE INQUEST.—At seven o'clock on Saturday night last the jury met in the Stipendiary Magistrate's court room to hear the evidence relative to the shooting of Herbert Carr, whose sad death we chronicled in our last issue. The witnesses were two boys named Teed and Harper. George Carr testified how the accident occurred, and Dr. Kelly gave evidence as to the post mortem examination. After about twenty minutes deliberation the jury returned the following verdict: "That the deceased Herbert Carr came to his death by the accidental discharge of a rifle in the hands of his brother, George Carr. The jury here record their unqualified disapproval of the indiscriminate use of rifles and other firearms in the hands of young and reckless persons."

FIRE.—A fire occurred this morning shortly before eleven o'clock in a stable in the rear of Mrs. Lockhart's residence on Pownal St. The fire burnt stubbornly and spread to the storehouse in the rear of Murray's bakery. After half an hour's hard fighting, the firemen, who were promptly on the scene, had the blaze under control. It was short wark after this to entirely subdue the fire. Had not the firemen set to work so promptly, and had it not been for our excellent water supply, there is no doubt but with the high wind blowing at time, the fire would have been much more serious.

Two fires occurred yesterday—one in front of A. E. McEachern's Boot & Shoe Store, and the other in a dwelling of Mr. Cumming's, near to-day's conflagrations. Both were quickly put out with a few buckets of water. The former was the result of a cigar end having fallen between the platform and the store. The latter was a much more serious affair, for after the fire was put out a lamp partially filled with oil was found in the porch of the dwelling, and the walls were saturated with oil. An investigation will be held by the fire wardens as to this suspicious occurrence. That somebody is determined to burn that block out is evident.

After the fire refreshments were served to the firemen by Mr. Wm. Murray, one of the fire wardens.

About twelve o'clock, the fire alarm was again rung for a blaze in the dwelling of Richard Passmore on Upper Great George St. By the energetic work of Mr. Hammond Large, assisted by several men, the fire was put out on the old bucket plan before the firemen arrived. This fire was evidently caused by a spark from the kitchen chimney catching on the roof. The damage to the building was slight.

Personal.

When Cardinal Gibbons was bishop of Richmond, Virginia, he happened to be the defendant in relation to some church property. When called to the witness stand, the plaintiff's lawyer, a distinguished legal luminary, after vain endeavors to involve the witness in contradictions, struck upon a plan which he thought would annoy the bishop. He thereupon questioned the right of Dr. Gibbons to the title of Bishop of Richmond, and called on him to prove his claim to the office. The defendant's counsel, of course, objected to this as irrelavent; but the bishop, with a quiet smile, said he would comply with the request if allowed half an hour to produce the necessary papers. This being allowed the bishop left the court room and returned in twenty minutes with a document which he proceeded to read with great solemnity, all the more solemn as the paper was in Latin. The plaintiff's lawyer pretended to take notes, industriously bowing his head once in a while as if in acquiesence, and seeming perfectly convinced at the end. When the reading was finished, he announced that the Papal bulls just read were perfectly satisfactory, at the same time apologizing for his expressed doubts. The next day it leaked out that the bishop, unable to find the Papal bulls at his residence, had brought to court and read a Latin essay on Pope Leo the Great, written by one of the ecclesiastical students, and forwarded by the president of the college as a specimen of the young man's skill in Latin composition. That smart lawyer never heard the last of it.

Upper Pacific coast towns have adopted quarantine measures against Victoria, B. C., on account of the smallpox epidemic there.

An earthquake has been felt in Southern Tunis. It is supposed to have been connected with the activity now being shown by Mount Etna.

Bees are said to have such an antipathy to dark-colored objects that black chickens have been stung to death, while white ones of the same brood were untouched.

The jury which has been investigating the death of Matilda Clover, the girl who died in October last, and an examination of whose remains showed that she had been poisoned with strychnine, have returned a verdict of wilful murder against Thomas Neill, alias Dr. T. N. Cream, the blackmailer.

These reports of the advance of cholera towards Europe are ugly, to say the least. Day by day the encroachments are nearing the ways of travel, and it is natural that their progress should excite alarm. Nearly two months ago, when the first outbreaks were reported in Cashmere and Meshed, the Empire, of Toronto, dwelt upon the advisability of distant countries like Britain, the United States and Canada exercising extraordinary vigilance at the quarantine stations. At the present time there is no one who will deny that this watchfulness is a necessity. In New York the people have contracted a mild form of trepidation, and the authorities are on their guard.

ALL who are interested in temperance should attend the tea party at Vernon River Bridge next Wednesday, the 20th inst. A pleasant time may be expected.

THE silver cup presented by Mr. P. S. Brown, Esq., of this city, will be offered for the best vault, instead of the best all round athlete, as advertised.—J. A. McLaren, Sec'y.

MUCH NEEDED.—The fire to-day at Mr. R. Passmore's, proves the necessity of placing a fire alarm box at the corners of Great George and Euston Streets, or somewhere on Malpeque Road. In order to give the alarm to-day, a messenger had to be sent direct to the police station. Our fire engineers should see to this at once, especially as the city is now well built out on Malpeque Road, and have means provided for giving an alarm promptly.

A Question.

SIR,—On looking over the report of the recent examinations for entrance to the Prince of Wales College and Normal School, I have to remark with feelings of regret that whilst the other city schools are well represented, St. Prtrick's School has not one to represent it at all. Now, sir, what is the cause of this? Is it the teachers' or trustees' fault? or whose fault is it? I am sure there is as good mental abilities in St. Patrick's School as in any of the others. But, notwithstanding, we never can have a successful candidate of that School for matriculation honors. My opinion, sir, is that if the Principal of that School were as solicitous for the welfare of his School as he is autocratic in the examinations which of late he has been presiding over, his school would flourish as the other city schools do, and the scholars of a first-class city school would not be defeated by boys and girls from common ungraded country schools.

Hoping that a stimulus will soon be put into St. Patrick's School, in order that it may keep at least in sight of the others, I remain, yours,

A WELL-WISHER.
