

Spending Mark Foreseen For New Plants, Buildings

By JAMES NELSON
OTTAWA (CP)—Spending on new industrial plant and equipment, commercial and government buildings, housing and repairs will reach a record \$18,495,000,000 this year, says a recent survey made by the trade department.

The figure, contained in a report tabled in the Commons by Trade Minister Winters, includes new capital investment amounting to \$14,946,000,000. This is an increase of 13.5 per cent above preliminary figures on actual capital spending in 1965.

The increase will be greatest in the mining and goods-producing industries. Regionally, the Atlantic provinces will show the largest relative gains.

Mr. Winters said in a statement accompanying the report that such a massive spending program will put new strains on the country's economy, already running at or near its capacity to produce.

The report was based on a survey of 20,000 business establishments late in 1965 and in January this year. Estimates were made of capital investment plans of smaller businesses and reports obtained on spending intentions of all levels of government.

Estimates also were made of hour-and-a-half apartment-building intention.

All point to a further expansion in the top of capital expenditures amounting to \$10,944,000,000 and \$12,798,000,000 in the past two years. Capital expenditures 10 years ago were running at half the clip forecast this year.

The survey was taken before recent hikes in interest rates. The report did not indicate what amount of restraint the higher cost of money will mean. A mid-cost of money will be published.

Mr. Winters' statement said: "The program envisaged will add to the demand pressures now present in the economy, particularly for technical skills and materials which are already in tight supply."

CONTRACT BRIDGE

By B. JAY BECKER

At the first table, South arrived at three trump after North had made use of the Stayman convention. This contract should have been defeated but the declarer was accorded unusually friendly treatment by the defense and wound up with a total of nine tricks.

West led the king of spades. Declarer won it and returned a spade, taken by the queen. When West shifted to a diamond, South took the ten with the Jack, cashed the A.K. and returned a low diamond. West took the queen and led a heart, the queen losing to the king. Eventually, South made two spades, two hearts, four diamonds and a club for a score of 600 points.

At the second table, the bidding started exactly the same way, but when North responded two clubs, East doubled for lead purposes. Again three trump played by South became the contract, but at this table West led the queen of clubs, which East could afford to overtake with the king to force out the ace and establish the club.

The declarer did not play the hand well; he started out by losing four clubs, two spades and a heart. Late in the play he also got desperate and tried a diamond finesse, but West had bared his queen by this time and now was also able to cash the 9-8 of hearts and put declarer down six—600 points.

Opening lead—king of spades. This deal occurred in the finals of the board-a-match championship played in Phoenix in 1962. It created a mild stir in the scoring room because the North-South pair on one team sent in a score of plus 600 points while their teammates at the other table, holding the East-West cards, also sent in a score of plus 600 points.

The official scorer quite naturally thought that a mistake had been made at one table or the other, but upon investigation it turned out that both scores were correct.

and the Prairie provinces. New Brunswick capital expenditure is expected to be only five per cent this year but the province had an investment boom last year, 32 per cent greater than in 1964.

Capital and repair expenditure plans by province for 1966 with preliminary figures for actual expenditures in 1965 in parentheses are:

Newfoundland	\$368,000,000	(\$314,000,000)

Flood Curtain Set Back Again

WINNIPEG (CP)—Curtain time for a possible Manitoba flood drama has been set back again.

Though forecasts for peak levels remained unchanged, Manitoba flood control authorities have said the Red River flood crest now is expected in Winnipeg between April 11 and April 21—three days later than a Wednesday estimate of April 8-18.
