Board Stresses Problem Of City School Accommodation

A deficit of \$4,065.76 for the year 1952 was recorded in the annual report of the Board of School Trustees presented to the annual meeting of the City Council last night by Major T. E. MacNutt, Board Secretary.

The total income of the Board for the year was \$140,388.27 with expenditures of \$144,454.03. The amount paid as supplements to teachers' salaries was \$84,551.25 less deduction for teachers City Pension System \$157.98, and deduction for Blue Cross \$1630.26, making a net supplement to teachers of \$81,368.01.

It was noted in the report that the opening of the Kindergarten in West Kent School in 1951 had proven to be a very valuable addition to the educational system of the City. "Mrs. Willett has continued in charge of this department and is giving splendid service," Major MacNutt said in presenting the report on behalf of Dr. R. G. Lea, Chairman of the Board.

Referring to the overcrowding the report states: "Our schools are terribly overcrowded, and the Board was forced to advertise for space in church hall or even private homes, but were not successful in obtaining space until the close of the year when Principal Lowther made available a room in his dwelling house, where some 20 pupils of Grade I of Prince Street School are receiving instruction. This can only be a temporary arrangement, but points to the fact that additional school accommodation must be provided. By next September with the usual increase in school population, the situation will be desperate."

The number of pupils enrolled in the City Schools in December was as follows: Prince Street School, 657; West Kent, 492; Queen Square, 701; Richmond Square School, 578 and Kindergarten 45. This makes a total of 2473 pupils and represents an increase of 158 pupils over the previous December.

The number of teachers employed at the end of the year was as follows: Prince Street School, 21; West Kent, 20; Queen Square, 22 and Richmond Square 17, making a total of 80. In addition there are four music teachers, two physical instructors, one Home Economics teacher and one Art Instructor.

Reviews Activities Of City Fire Department

The suggestion that the air horn fire alarm system which was installed early last year should be automatically controlled was made by Coun. P. R. McCormac, Chairman of the Fire Committee at the annual meeting of the City Council here last night.

Coun. McCormac said that it was the feeling of the Fire Department that the new horn system, especially for general alarms but it was felt that it should operate automatically.

In a comprehensive report Coun. McCormac told the council that the Fire Board, which has not functioned for years, yet is the real governing body of the Fire Department as set forth in the City By-laws was reconstituted and is now functioning as it should. It had one important internal matter to deal with during the year, and dealt with it in a very satisfactory manner.

"Considerable new equipment was purchased during the year—the two most important items being a deluge gun and a life net—two items that have been requested by the men for a good many years. The latter item, I hope, and pray, we shall never have to use, but like insurance, it is better to have it and not need it, than to need it and not have it," he said.

Coun. McCormac noted that one piece of equipment, the International Fire Truck was practically useless and that another the La-France Pumper was 24 years old. He warned the Council of the possible consequences should two fires break out at the same time.
