Let's Talk It Over

The catch phrase, "Equal pay for equal work" sounds logical from a theoretical point of view, but in practice, when salaries are at a bare subsistence level, it doesn't work. It is just as logical theoretically to say, "Equal taxes for equal government services", and where would that lead you? It would mean that you would benefit from government services to the beneficiaries, but they have to pay a lot higher taxes, based, of course, on their ability to pay more. Some time ago cost-of-living bonuses were paid to teachers and others as their living costs soared. Do the exponents of "equal pay for equal work" approve of cost-of-living bonuses? If not, do then it would knock the "equal pay" theory for those whose marital status made living costs greater, and that would knock the "equal pay" theory into a cocked hat.

Harold Whitman, in a recent article in Collier's, compared two teachers, Angela Smith and Macdonald Jones, both of whom received \$4,500 per year. Angela is married, supports one child, lives with her father, and pays no taxes. Jones has three children and lives in a mortgaged five-room cottage which he is paying for with difficulty. He cannot afford summer courses to improve his professional standing, and indeed sells pots and pans in the summer months to acquire the needed extra income. "When we talk about the adequacy or inadequacy of teachers' pay," the writer says, "we're talking about the struggling Jones or the well-paid Miss Smith?"

Mr. Whitman says that failing to provide salary differentials for teachers with marital status makes it harder to get good men into teaching. Rock Isle, Ill., is one of the schools recognizing the special position of those with dependents, and Superintendent E. H. Hanson told Whitman, "We're able to get more men teachers, and better men."

Falling to give teachers with dependents special consideration tends to reward the transient teacher who uses the profession as a stepping stone to other jobs, perhaps household duties, at the expense of a stable section of teachers who would, if given proper treatment, remain in the profession.
