

**A New Grain.**

Mr. Blackwood sends the following to the *N. S. Journal of Agriculture*:—According to the Kansas State Board of Agriculture says the New York *Shipping List*, a new cereal, represented to be more nutritious than corn, rye or oats has recently been discovered in Kansas and New Mexico. This new cereal is variously called 'pamps rice,' 'rice corn' and 'Egyptian corn,' and is supposed to have sprung from seed brought to the United States by the Menonites who came from Southern Russia. The kernels grow in a tuft like that on the top of a sorghum. Each one is somewhat smaller and rounder than a grain of wheat, and is inclosed in a shuck or independent capsule. The berry can be eaten ground into flour or cracked like wheat, or whole like rice, or used generally like another cereal. The meal resembles that of Indian corn, and color, is intermediate between the yellow and white varieties. A chemical analysis shows that its percentage of starch, fat, dextrose and sugar, which produces heat and fat in the animal organization, compares favorably with that of Indian corn, wheat, rye, and oats and in its contents of flesh-forming albuminoids, it surpasses all India corn and ranks with wheat, rye and oats. The small percentage of cellulose, or non-nutritious woody fibre, is remarkable. The stalks make good fodder as corn does, and a few acres will furnish a family with fuel for a winter—a consideration of first importance in that treeless country.

All this signifies little in comparison with its power to resist drought, and as to that, an example, one of the great many, attested by the signatures of practical, well-known farmers, may be given: Forty acres of turned-over sod, which had not been wet with rain for eight months, were planted with two or three grains, deposited with a seed planter, something more than a foot apart. There was no rain for five weeks after planting, yet the corn germinated. After it was fairly started, the hot blast from the Llano Estado blew over it, but it grew right along, although grass and garden-truck besides it were fairly-burned up. It stood the rains equally as well, and finally it yielded sixty 60-pound bushels to the acre. It is, moreover, worm and grass-hopper proof. The Board of Agriculture prints a mass of letters, which place these facts beyond questions, and their significance is of the first importance. From New Mexico to the British lines there are tens of thousands of square miles—500,000,000 acres, according to a reliable estimate—which, it was thought, nothing but an expensive system of artesian wells, could reclaim to any better use than pasturage, and now comes this African plant to furnish food and fuel to this vast country, besides crops, for export, whose value it may yet be impossible to estimate.

A Georgia paper relates the following case of amatory bull-dozing: "James C— went to Dawsonville and procured a marriage license for himself and Miss Laura H— without consulting her or her father—never having said one word to her about marrying. He showed her the license and told her that her father had given her up, and he was ready to marry her. She refused him and he told her she would have to take him then or forever be debarred from the privilege of marrying, for there could never be any other license granted for her until he died, and if she did not marry him he would burn the license and leave the country."

After a few nights trial of unlighted streets in Quebec, with a result of one man killed by a collision of teams, numerous incidents of rowdyism, some fifty burglaries or burglarious attempts, with other crimes and casualties, a special meeting of the City Council was held, and an appropriation of \$5,000 was recommended for the purpose of lighting the streets for the balance of the year. The recommendation has been acted upon and the streets are now lighted.

**Remedy for Hard Times.**

Stop spending so much on fine clothes, rich food and style. Buy good, healthy food, cheaper and better clothing; get more real and substantial things of life every way, and especially stop the foolish habit of running after expensive and quack doctors or using so much of the vile humbug medicine that does you only harm, and makes the proprietors rich, but put your trust in the greatest of all simple pure remedies, Hop Bitters that cures always at a trifling cost, and you will see better times and good health. Try it once. Read of it in another column.

**August Flower.**

The immense sale and great popularity of Green's August Flower in all towns and villages in the civilized world has caused many imitators to adopt similar names, expecting to reap a harvest for themselves at the expense of the afflicted. This medicine was introduced in 1863, for the cure of Dyspepsia and Liver Complaint, with their effects, such as Sour Stomach, Sickheadache, Indigestion, Palpitation of the Heart, vertigo, etc., etc., it never has failed to our knowledge. Three doses will relieve any case of Dyspepsia. Two million bottles sold last year. Price 75 cents. Samples 10 cents.

Five thousand seven hundred dollars have been subscribed by the citizens of Montreal towards outside amusements for visitors during the Dominion Exhibition.
