**CANADA
LIFE ASSURANCE COMPANY.**
ESTABLISHED 1847.
CAPITAL AND FUNDS
NEARLY 6,000,000 DOLLARS.
Annual Income over \$1,000,000.

HONORARY DIRECTORS:
CHARLOTTETOWN, P. E. I.
GEO. R. BEER, ESQ. CHAS. PALMER, ESQ.
W. E. DAWSON, ESQ. R. R. HODGSON, ESQ.
HON. J. S. CARVELL. HON. W. W. SULLIVAN.

Medical Advisers—DRS. F. D. BEER AND W. H. HOBKIRK.

The advantages of joining an old and successful Company, like the "CANADA LIFE,"
may be judged of from the following facts:—
1st. The rates charged are lower than those of other companies.
2nd. It has the largest business of any Company in Canada.
3rd. The profit bonuses added to Life Policies are larger than any other Company in
Canada.
4th. Profits not only altogether extinguish all premium payments; but, in addition, yield
the holder an annual surplus.

Agent at Summerside, A. L. ANDERSON, ESQ.

Bedroom Suits, Looking Glasses and Mirrors, Window Furniture, Picture Frames and
Picture Mouldings.
JOHN NEWSON.
Charlottetown, Jan. 2, 1883.—1y

The Markets.

In the Boston Market, Eggs are wanted.
Nova Scotia and Island stock is selling at
17 1/2 cents. The outlook for the coming
week is good.
The Toronto Markets reports state that
the quotations for flour during the past
week have been steady at about \$4 65 for
Superior Extra, and \$4.55 for Extra, with
bids occasionally 5c lower, that was the
position at Tuesday's meeting. At the
market to-day there was no change in
quotations, and business was not entered
into. Stocks are low. On Monday last
there were in store here 2,795 bbls. against
3,095 on June 25, and against 3,775 July 3,
1882, and 1,500 barrels July 4, 1881.
Oatmeal is quoted at about \$5.20 for
standard, and about \$5.35 for granulated.
Cornmeal nominal, at \$3.75 to \$3.80 per
barrel.

WHEAT.—The market in Toronto has not
shown any very decided weakness. There
has been a downward tendency, but it was
not of the same kind that has been operat-
ing in Chicago. And if prices in Liverpool
had not given way to the extent of about 1
d per bushel the prices here would not have
given way even so much as they have done.
But the reports of the harvests are general-
ly more favorable both in Europe and
America than was looked for a month ago,
and the prospects for prices advancing are
not good. There has been very little
doing, and neither buyers nor sellers ap-
pear anxious to do business, either for cash
or futures. On Tuesday No. 2 Fall was
quoted at \$1.03, and No. 2 Spring at \$1.05,
and No. 3 both varieties about 2c below
these figures. Goose Wheat is quoted about
99c to \$1. At this day's market there was
nothing doing. Outside markets were not
reported, and neither buyers nor sellers
desired to trade. Stocks in store on Mon-
day last were 189,368 bushels, against
286,332 bushels June 25; and 175,745
July 3, 1882; and 165,203 July 4, 1881.

PROVISIONS.—The decline in Chicago has
operated a weakening of prices of meats in
Toronto. Hams steady at 14c for
smoked, and 14 1/2c for canvassed. Pork
quoted at \$20; Beef at \$16 for prime, and
\$17 for mess. Lard easier, tinnets quoted
at 12 1/2c, large pails 12 1/2c, small pails 13c.
Butter unchanged at 14c to 16c for fair to
good, and 12c to 13c for ordinary. Cheese
steady, medium selling at 10 1/2c, finest job-
bing at 11 1/2c to 12c. Eggs selling at 15c to
16c according to quantity. In the New
York market butter is dull; state 19 to 23 1/2c.
Cheese is also dull at 8 1/2c to 10 1/2c.

Murray Harbor Notes.

On the 30th ult., a very interesting en-
tertainment was given by the scholars be-
longing to the day school at the Harbor,
presided over by the Rev. C. E. Bell. An
address was given by the Rev. E. Bayne.
The children had been well trained by their
esteemed teacher, Miss McRae. The
amount realized was \$20.00. At the close,
one of the oldest scholars, (in the name of
the school), read an address, and presented
Miss McRae with a pair of handsome vases
as a memento of their affection and
esteem. Many in this neighborhood regret
her departure, and it may be some time
before one will be found to fill her place as
fitly.

Lobsters are scarce.
Some of our fishermen are very success-
ful in the cod-fishing.

A Balloon under the Sea.

A Marseilles correspondent writes:—The
International Exhibition of Nice is reserv-
ing some wonders for the foreigners who
may propose to pass a portion of the winter
of 1883-84 upon the borders of the Mediter-
ranean. One of these wonders is a balloon
which its inventor, M. Toselli, calls "the
observatory under the sea." It is made of
steel and bronze, to enable it to resist the
pressure which the water produces at a
depth of 120 metres. This "observatory
under the sea" has a height of eight meters,
and is divided into three compartments.
The upper apartment is reserved for the
commander, to enable him to direct and to
watch the working of the observatory, and
to give the passengers the explanations
necessary as to the depth of the descent, and
what they will see in the depths of the sea.
The second apartment, in the centre of
the machine, is comfortably furnished for
passengers, to the number of eight, who
are placed so that they can see a long dis-
tance from the vessel or machine. They
have under their feet a glass which enables
them to examine at their ease the bottom
of the sea, with its fishes, its plants and its
rocks. The observatory being almost com-
plete at 70 metres of depth, the observatory
will be provided with a powerful electric
sun, which sheds light to a great distance
in lighting these depths. The passengers
have at their disposal a telephone, which
allows them to converse with their friends
who have stopped on the steamboat which
transports the voyagers to such places as
are known as the most curious in the
neighborhood. They have also handy a
telegraph machine. Beneath the passen-
gers an apartment is reserved for the
machine, which is constructed on natural
principles, that is to say, as the waste of a
fish, becoming heavier or lighter at com-
mand, so as to enable the machine to sink
or rise at the wish of the operator.

PRODUCTIVE.—A white hen on the pre-
mises of D. A. McKENZIE, Brookland, laid
five eggs a week during the latter part of
this season, and has produced three eggs
measuring in circumference respectively 6 1/2
by 7 1/2 inches, 6 1/2 by 7 1/2 inches, and 7 1/2 by 8 1/2
inches, each containing two yolks. Next
best!

A number of unsuccessful attempts have
been made to raise the steamer Daphne,
which capsized and sunk at Glasgow on the
3rd inst. Eighty bodies of persons who
lost their lives by the accident have been
recovered.

A Serious Washout.

A FIREMAN KILLED AND AN ENGINE-DRIVER
FATALLY INJURED ON THE CREDIT VALLEY.

A bad washout occurred on Saturday
afternoon on the Credit Valley line, about
a mile east of Beachville, by which the fire-
man of the Pacific express lost his life, and
the engine-driver was badly scalded. It
appears that the train, with Mr. William
White, Superintendent, on board, was proceed-
ing slowly, the driver having been
warned to look out for washouts, when they
suddenly came upon the washout, and be-
fore the train could be stopped it ran into
the spot where the track had been washed
away on the south side, and the engine was
overturned. The driver and fireman were
hemmed in and could not get clear, and
were both so seriously scalded by escaping
steam that the fireman, whose name was
Cochrane, died at nine o'clock the same
night, and doubts are expressed as to the
recovery of Davoney, the driver. The
luggage car also left the track and one of
the brakemen was very slightly hurt, but
no other casualties occurred. Had it not
been for the slow speed of the train there is
no telling how serious the accident might
have been. The damage to the track and
engine is very slight, and probably a hun-
dred dollars will pay the cost of the repairs.
Too much praise cannot be given to the
men who lost their lives in saving those
of the passengers, who would have been
killed or seriously injured but for the ac-
tion of the trainmen, who threw themselves
in the breach to save the lives of those
under their care.

**The First Gentleman in the United
States.**

A Washington letter says:—It is a good
thing when "the first gentleman in the
land" is a gentleman. There is no doubt
about President Arthur's right to this title.
He satisfies the most exacting. I was par-
ticularly struck with his charming manner
and perfect courtesy at the wedding of
General Drum's daughter, on Wednesday
night. In the first place, the flowers he
sent were exquisite and evidenced careful
selection. Then he himself wore a costly
flower of the bride, whose name was
Margaret, in his buttonhole. What he did
throughout the evening was the proper
thing to do, and he said nothing but what
was appropriate—all this without being con-
ventional. And his patient, polite, gentle,
manly way under trying circumstances al-
ways surrounding a lion was very graceful and
restful amid so much fussiness. Several
officials of the second rank were nervously
anxious to present their wives to the head
of the Government. Of course the Presi-
dent didn't know Mr. Official, except as one
of thousands of subordinates. But his
smile was just as fresh and sweet, and his
hand grasp just as close and warm, when
Mrs. Official made her rustic courtesy as
though she had been the wife of a Cabinet
officer. But they bored him terribly.
Why don't such people learn a little social
wisdom? By the way, I observed that the
President still wore three fat gold studs in
his shirt front, although the fashionable
society men are wearing either one or four
studs. But his old fashioned courtesy
covered his old fashioned studs.

Medical Intolerance.

The last number of *Puck* contains a car-
toon which represents a dying child lying
in its cradle, a homopathic doctor on one
side of the little sufferer, while on the other
"Dr. All O'Path" is turning away. The
mother stretches out her hands in mute
agony to the allopath, only to hear him say,
"very sorry, madam, if your child must
die, but you ought not to have called in a
homopathic first." It seems that this is
not a caricature, but a truthful representa-
tion of what actually occurred not long
since in Oconomowoc, Wis. A dying child
needed a surgical operation which, in all
probability, would have saved its life. The
only surgeon in the place was an allopath.
He was called in, but finding the family
physician, who was a homopath, in attend-
ance, declined to operate at the critical
moment. He only acted on the code which
the American Medical Association at its
recent meeting in Cleveland refused to
change. It is said that this code is only
the formal declaration of allopaths against
fellowship with practitioners of other
schools, but that it does no practical harm.
Here is a case that refutes the plea most
conclusively. The *Chicago Tribune*, refer-
ring to this incident, speaks out in strong
terms against the bigotry of "regulars," as
they call themselves, and says, "The code
which the American Medical Association
hugs to its bosom is a code of murder."
—*Waukegan Sun*.

A paper on the Sea Fisheries and Fish-
ing population of the United Kingdom,
written by the Duke of Edinburgh, was
read by his brother, the Prince of Wales,
at the International Fisheries Conference,
The essay contains much valuable infor-
mation put in concise and interesting form.
The number of *bona fide* fishermen in the
United Kingdom is estimated at 90,000
giving a total population directly dependent
upon the sea harvest of 500,000 people.
He deals with the risks to which fisher-
men are exposed over and above those which
are inseparable from their calling, and
humanely suggests remedies. Remarkable
upon the fact that the fisheries of the west
coast of Ireland are comparatively unwork-
ed, and as showing the value of these fish-
eries, the paper says that in 1880, the year
of distress, a Canadian Committee distrib-
uted in one district nets to the value of £200,
and in the following year the people to
whom they were given realized £1,200
worth of mackerel.

The Russian Government has ordered the
establishment of a rigid quarantine on the
Black sea to prevent the introduction of
cholera by vessels from Egypt, and has for-
bidden the pilgrimages to Mecca.
