Any Nickel in our house?

CANADIAN Nickel

"That must take a lot of nickel!"
"It does! International Nickel alone produces over 250 million pounds a year. Last year Inco spent 23 million dollars so that they could produce more nickel. It's a good thing we don't have to buy nickel from other countries—because right now a lot of it is needed for equipment for our defense."

"Sure, son! There's nickel all through the house. The heating elements in our toaster, iron, range and percolator are made of nickel-chromium wire. Our knives and forks are made of silver-plated nickel silver. There's nickel in the electric clock and thermostat. There's a lot of nickel in our car too."
