

Frick Says TV Killing Baseball

NEW YORK (AP) — Baseball commissioner Ford Frick Wednesday urged baseball and broadcasting to reach an understanding before the "goose" that laid the golden egg gets killed.

"Unlimited television of major league baseball is killing off the minor leagues," Frick warned in a luncheon speech at the Metropolitan Sportscasters Association, and if the minors are killed, the majors won't be far behind.

Frick said more often than not the radio and television networks which have mushroomed around major league teams are interested only in the money collected from sponsors.

He branded any defence that such networks are supplying a public service as "selfish and phoney."

67 Theatres To Carry Fight On TV

NEW YORK (AP) — A record number of 67 U. S. theatres have been cleared for the theatre telecast of the Rocky Marciano-Ez Charles heavyweight title fight Sept. 15.

Nate Halpern, president of Theatre Network Television, Inc., said Wednesday that more than 70 theatres are expected to carry the closed circuit telecast of the Yankee Stadium 15-rounder.

CBS will radio broadcast the bout coast to coast.

The last Charles-Marciano fight, June 17, was shown in 61 theatres in 45 cities.

Opinions Divided Whether Junior Smarter Than Dad

By JAMES M. LONG
ROME (AP)—It turned out to be a mightily debatable point Wednesday whether junior will grow up to a smarter man than his father.

An expert said "yes"—but big name men in science stood up and said "no."

By the time the argument died down, about an hour and some 30 speakers later, 500 United Nations population experts had heard that there are a lot of reasons to believe mankind is actually getting more stupid each generation.

It started when Dr. Anne Anastasi, professor of psychology at Fordham University, New York, presented statistics pretty much in junior's favor.

They showed a high increase in IQ in army intelligence tests of U. S. soldiers in the Second World War over their fathers who served in the First World War. Other surveys showed progressively higher intelligence tests among United States high school students over the last 20 years.

DEPENDS ON MANY THINGS

Before you could shout "hurray for junior," a couple of dozen scientists from all over the world

H-21A Piasecki Workhorse Helicopter

The R. C. A. F. is acquiring 6 H21A Piasecki Workhorse helicopters for search and rescue operations. The H-21A is a tandem-rotored, single engine rescue and utility helicopter. It is powered by a Wright R-1820 engine with a take-off rating of 1425 horsepower. The engine drives two 44-foot diameter rotors through drive shafts and reduction transmissions.

The fuselage is of all-metal stressed skin monocoque construction. The cockpit incorporates side-by-side pilot seating and complete dual controls. A main entrance door is located on the left side at the aft end of the cabin. A rescue door and rescue facilities with a swinging boom type rescue hoist are located immediately behind the pilot at the forward end of the cabin.

An inflatable rubber flotation gear is provided for each of the three wheels of the helicopter's landing gear. Normally this gear is compactly packed around each wheel, but it can be inflated quickly in the air by the pilot to permit landing on water, snow, or on other soft surfaces.

Overall length of the helicopter is over 52 feet. The cabin is 20 feet long, 5 1/2 feet wide and 5 1/2 feet high. It can accommodate 12 litter or 20 troop seats. Maximum gross take-off weight is over 13,000 lbs. and normal useful load is around 2800 lbs.

The H-21A has a range of more than 300 miles which can be extended by use of extra fuel tanks, and it has a cruising speed of around 100 mph.

At present the S-51 Sikorsky helicopter, is in use by the R. C. A. F. for search and rescue operations. This helicopter, a small type of aircraft, was obtained several years after the end of the Second World War.

Pilot of the H-21A is Squadron Leader R. T. Heaslip, AFC, 35, of Oshawa, S/L Heaslip, a veteran helicopter pilot, is attached to the R. C. A. F. communication flight at R. C. A. F. Station Bagotville, P. Q.

IMPORTANT DUTIES ASSIGNED TO ISLAND BORN ECONOMIC EXPERT

OTTAWA, (CP)—Works Minister Winters, in charge of a \$150,000,000 public construction program, today announced the opening of a new economic study unit to help implement the program "to the best advantage of the Canadian economy."

Appointed to head the new unit is Dr. E. P. Weeks, a Rhodes scholar who initiated a study of the impact of public construction on various regions in 1946.

A 42-year-old native of Prince Edward Island, for the last few years he has been director of the defence production department's economics and statistics branch.

Mr. Winters said in a statement that the primary function of the new body "would be to study and assess the impact of proposed public projects on the economy, particularly of the various areas, and to assist the department in implementing its program to the best advantage of the Canadian economy."

Two years later he became executive assistant to the late Alex Skelton, then assistant deputy minister of trade, and at the same time served as a member of the cabinet secretariat.

In 1950-51, he was acting director of the trade department's international trade relations division, taking over the defence production department's economics post in 1951.

Married and the father of two sons, Dr. Weeks makes a hobby of languages and speaks French, German and Spanish and also reads Italian and Portuguese.

A fellow of the Royal Society of Arts, he also is a member of the Canadian Agricultural Economics Society, the Canadian Institute of International Affairs and the Canadian Political Science Association.

New Canadian Has Language Difficulties

VANCOUVER, (CP) — A pretty new Canadian has progressed to the point where she's learning her English backwards.

Marianne Hising, who came from Eskilstuna, Sweden, about a year ago, says, "When I came to Vancouver, the letter 'j' became 'jay' instead of 'yay'. Now I have to think hard so I don't say 'yellow' for 'yellow' and 'young' for 'young'."

Housing and architecture and eating habits in Canada interest Marianne, but she says it's the people who fascinate her most.

"It's fun to call out 'Hi' when you meet people a second time, and to laugh and have fun right from the start."

She said young men here are nice. Swedish fellows don't find it so easy to tell you if you're smart looking and a good dancer.

Marianne, who has done amateur and professional modelling, said it was a shame so many Vancouver women wear dowdy raincoats and dark felt hats even when it's not raining. "And with smart, weatherproof clothes in the stores, too."

"I have learned to go to Chinatown for food. In Sweden we have the 15-dish smorgasbord but I thought it was delightful the first time I saw your huge mixed salads with just about everything in."

Between modelling jobs Marianne is taking a business course. She would like to be an airline stewardess.

"In the meantime, I'm learning everything I can about Canada," she said. "Maybe it doesn't mean much to you that I can now say 'jump' and 'Jimmy'. But it does to me."

Thinks N. B. Even Lovlier Than Ireland

MONTREAL, (CP)—The Irish lady-in-waiting to Princess Alexandra says: "I hate to admit it, but I believe the New Brunswick countryside is even lovelier than Ireland."

Lady Moyra Kathleen Hamilton made that smiling admission Wednesday after arriving here with the Duchess of Kent and the princess, nearing the end of their Canadian visit.

And Lady Rachel Davidson, lady-in-waiting to the duchess, expressed equal interest in Canada, adding that her young son, a page at the Coronation, "wants to be a Canadian farmer."

Both women were reluctant to be interviewed, wishing to leave the limelight to the royal pair, and divulged only one secret regarding the visit.

"The duchess would love to do some shopping, but except for a brief visit to a candy shop in Quebec, it has been impossible to find time for another," said Lady Davidson.

Lady Hamilton, 24, only daughter of the fourth duke of Abercorn, County Tyrone, was a maid of honor at Queen Elizabeth's Coronation.

Lady Davidson, a war widow like the Duchess, is a sister of the Duke of Norfolk, who as earl marshal of Britain was responsible for the organization of the royal wedding, the funeral of George VI and the Coronation of the Queen.

"Do you think the people realize how lively this tour has been?" Lady Davidson asked. "It has been far more tiring than the tour of Malaya made by the duchess in 1952. We both like tropical heat."

"But weren't the crowds marvel-

ATTENTION ALL SEA CADETS

KENT SEA CADET CORPS
And Those Interested In Joining

Be on board H.M.C.S. Queen Charlotte at 1900, seven o'clock Friday evening, Sept. 10 for commencement of fall drill. Recruiting for the year is between the months of Sept. and November. It gives boys between the ages of 14-18 an opportunity to join. Those who join now will be the ones to attend summer camp. So come and join RCSCC Kent. Your training will be in—

1. Field Training
2. General Seamanship
3. Signalling (Morse Semaphore)
4. Sports
5. General Knowledge
6. Good Citizenship

LT. J. D. SMALLWOOD,
C/O.

Mr. and Mrs. F. A. Merrill left on an extended visit to relatives and friends residing in Kennebunk, Maine, on Sept. 1.

Mr. and Mrs. Nelson Cannon and two children of Picton, Ont., are enjoying a holiday visit among relatives and friends guest of Mr. and Mrs. George R. Cannon.

Week-end visitors at the home of Mr. and Mrs. George Villett, included Miss Basler and her sister, Mrs. Folland, Summerside, niece of Mr. and Mrs. Villett.

Mr. Howard MacKinnon of the Experimental farm staff, accompanied by his sister Mrs. Hilda MacFadyen, left on a two-week visit among friends in Bridgewater, Mass., where Mrs. MacFadyen resides.

It is pleasing indeed to learn that Sandra, daughter of Wendell and Mrs. Howatt, is improving from serious injuries sustained in last week's accident on the highway at North Tryon.

Mr. and Mrs. Merrill Grisdale left on return to their home in Toronto, on Aug. 31, following an enjoyable visit here, guests of Mrs. Grisdale's parents, Mr. and Mrs. James H. Ferguson.

While conversing with friends attending the Crapaud fair, Mr. Daniel Crossman, who has attained the age of 92 years, advised that he attended an Exhibition held at Crapaud over 70 years ago.

Mr. Walter MacQuarrie, son of Dr. W. A. MacQuarrie, and the late Mrs. MacQuarrie, has been enjoying part of his holidays in Hampton. He is stationed with the R. C. N. at Dartmouth, N. S.

Miss Wanda Pearson has returned to her home at Chelton, following an enjoyable visit here, guest of Mr. and Mrs. Earle Calbeck.

Mrs. Robert MacQuarrie and children have returned to Ottawa following an enjoyable visit at the home of her parents, also at the Manse in Hopewell, N. S., guest of Rev. Dr. W. A. MacQuarrie.

Mr. and Mrs. Si Acorn, who have been enjoying their annual holiday visit are soon leaving on return to Toronto, where Mrs. Acorn is a R.N. in Toronto General Hospital. Mrs. Acorn was a teacher in the public schools here before graduating at the P. E. I. Nursing School, and is the daughter of Mr. and Mrs. Boyd MacQuarrie.

Recent shipments of turnips and potatoes, early planted, have brought encouraging returns, and the yield has been good. A ready market and profitable returns is assured to all who have been cultivating plots of cucumbers and strawberries. The yield has also been good with less labor than other farm products and with steadier market prices prevailing.

Friends of Rev. C. U. MacNevin were present in large numbers at Bonshaw Church on Sept. 5, to hear his inspiring message on "Personal Faith" taken from John
