In conversation with several ardent exponents of the eel-fishing art, they report that the ice in the Brudenell River is very thick and tough for the time of year. At present, it looks as though there may be ice in the Rivers and Harbour for some time, which helps retard the coming of spring by its adverse effect on the weather. The trout fishing season is dawning near at hand and if the stories of the trout fishermen can be believed, they will have to be good stories.
