## A Statement of Facts.

On July 9th, 1891, after the present government obtained office, the actual debt of the Province, according to a statement furnished by the Assistant Provincial Secretary, amounted to

**\$53,442.21**

Mr. Peters, then leader of the Government, declared that there never been a year since he made that statement without a deficit. Here they are:—

Deficit 1891.....	\$ 30,439.20
Deficit 1892.....	37,651.29
Deficit 1893.....	119,942.33
Deficit 1894.....	20,164.21
Deficit 1895.....	32,862.80
Deficit 1896.....	14,135.35
Deficit 1897.....	38,201.65
Deficit 1898.....	43,611.54
Deficit 1899.....	36,915.03

**Total, \$373,923.40**

The Conservatives imposed no TAXES. The present government collected the following taxes in six years:

1894—Taxes imposed.....	\$ 45,182.81
1895—“.....	47,661.00
1896—“.....	48,466.10
1897—“.....	46,674.50
1898—“.....	44,995.97
1899—“.....	55,668.68

**\$288,649.06**

The present government claim credit for having made the following reduction in the expenditure:

In the abolition of the Legislative Council.....	\$5,000
In the administration of Justice.....	3,000
In the Public Lands Office.....	1,217
In printing, &c.....	800
In abolition of the Reporter for the House.....	400

**\$10,417**

The average expenditure of the Conservatives for the twelve years they had the government, was \$278,959; and the above savings having been made, the average expenditure of the present government should have been \$268,542. But, as a fact, the average expenditure of the present government for the past nine years was \$304,511, or \$35,969 per year more than they claimed it should have been.

The Conservatives obtained an additional subsidy from the Dominion Government of \$20,000 per year. The present government obtained—NOTHING.

The last year the Conservatives were in power they paid for interest \$2,697.44.

The present government paid for interest last year **\$19,075.75**.

In other words, the ADDITIONAL SUBSIDY of \$20,000, obtained by the Conservatives, is now paid away by the present government for INTEREST on the DEBT created by them.

In a statement furnished by the Government on the 22nd May, 1900, the debt of the Province was made up as follows:—

Balance due Banks.....	\$159,365.63
Debentures 1891.....	185,000.00
Debentures 1898-1899.....	35,000.00
Deposits with the Government.....	152,435.77

**\$531,801.40**

If you add to this,

Debentures authorized last session.....	\$48,000.00
Sinking Fund used up.....	11,630.30
Amount due Winsloe estate.....	4,538.87

You have a total debt of **\$595,370.57**

On the 31st Dec. next there will be due

1/2 salary of Teachers.....	\$26,000.00
1/2 year's interest.....	10,000.00

**\$36,000.00**

**Making a total of \$631,370.57**

as the debt of the Province.

The present government says it spends more for Education than the late government. Well, the Conservatives spent for the years 1879 to 1890 the average sum of \$104,181 yearly.

The present government's average expenditure on education from 1891 to 1899 was \$121,868 yearly, or \$17,687 more than the Conservatives.

But they saved \$10,417 per year which the Conservatives had to pay, and they collected on an average \$48,168 per year IN TAXES, while the Conservatives had NO TAXES.

The people may ask where the additional expenditure goes. Well, the answer may in part be found in the fact that more is spent upon the roads—BUT ONLY IN ELECTION YEARS.

In 1893 they spent on roads \$50,178.

In 1897 they spent on roads \$28,190.

In 1899, when there was NO ELECTION, they spent only \$14,913.

In 1893 and 1897 there were elections.

This year, as there are two elections, the expenditure will probably reach, if not exceed, that of 1893.

The government are spending about \$50,000 per year more than the revenue, and are now collecting \$55,000 per year in taxes.

The debt of the Province is over \$600,000, and if the present state of affairs continues the debt will soon be so great that no more money can be borrowed. Then will come TAXATION with a vengeance.

The electors have now the opportunity of stopping this reckless expenditure, by voting the present incapable and extravagant party out of power on the 12th December.

## THE ARMY OF HEALTH

The Army in the Philippines Insignificant Compared With This One.

If all the people in the United States, Canada and Great Britain who make daily use of Stuart's Dyspepsia Tablets could be assembled together it would make an army that would outnumber our army of one hundred thousand by at least five to one.

Men and women who are broken down in health, are only a part of the thousands who use this popular preparation, the greater number are people who are in fair health but who know that the way to keep well is to keep the digestion perfect and use Stuart's Tablets as regularly as meal time comes to insure good digestion and proper assimilation of food.

Prevention is always better than cure and disease can find no foothold if the digestion is kept in good working order by the daily use of Stuart's Dyspepsia Tablets.

Mr. Thomas Seale, Mayfield, Cal., says: "Have used and recommended Stuart's Tablets because there is nothing like them to keep the stomach right."

Miss Lelia Dively, 4627 Plummer St., Pittsburg, Pr., writes: "I wish everyone to know how grateful I am for Stuart's Dyspepsia Tablets. I suffered for a long time and did not know what ailed me. I lost flesh right along until one day I noticed an advertisement of these tablets and immediately bought a 50 cent box at the drug store. I am only on the second box and am gaining in flesh and color. I have at last found something that has reached my ailment."

From Mrs. Del. Eldred, Sun Prairie, Wis., "I was taken dizzy very suddenly during the hot weather of the past summer. After ten days of constant dizziness I went to our local physician, who said my liver was torpid and I had overheated my blood; he doctored me for two weeks without much improvement; I finally thought of Stuart's Dyspepsia Tablets (which I had used long before for various bad feelings) and the first three tablets helped me.

They are easily the best all-round family medicine I ever used."

The army of people who take Stuart's Tablets are mostly people in fairly good health, and who keep well by taking them regularly after meals. They contain no opiates, cocaine or any cathartic or injurious drugs, simply the natural peptones and digestives which every weak stomach lacks.

Stuart's Dyspepsia Tablets are sold by druggists everywhere in the United States, Canada and Great Britain.

## LOCAL NOTICES.

Ice creepers at R. K. Josts. Our ice creepers keep you from falling—Try a pair. R. K. Jost.

Underclothing, 'tis strange that nobody else keeps underwear to fit everybody. Prowse Bros.

## In Distress With Eczema

Mrs. R. Stoddard, Delhi, Norfolk County Ont., writes as follows:—"I was troubled with Eczema or Salt Rheum for over twelve years, and during that time doctored with four different physicians, but found that they could only give temporary relief. I saw Dr. Chase's Ointment advertised, decided to try it and before I had used half a box found great relief and change. Altogether I have used three boxes and am now completely cured. I have recommended it to my neighbors, and can say it is the best I ever used, and in my estimation worth its weight in gold."

The keen misery which many endure from the tortures of skin disease is most appalling, and so much the worse because it is unnecessary. Dr. Chase's Ointment stands alone as the one unfailing remedy for salt rheum, eczema, scald head and every form of itching skin disease. 60 cents a box, at all dealers', or Edmanson, Bates & Co., Toronto.

**Dr. Chase's Ointment.**

THE P. E. ISLAND...

Commercial College

The attention of those who desire a thorough and practical preparation for an active business life is called to the advantages offered by this college. Bookkeeping, Commercial Law, Arithmetic, Penmanship, English, Correspondence, Business Methods, Short Hand, Typewriting, etc., are taught in the most direct and practical manner. Special attention is given to locating graduates in good business positions. New term opened on Monday, August 20th inst., at 9.30 p. m. Send for prospectus. P. O. Box 242.

## STOCK BREEDERS' ASSOCIATION.

Interesting Meetings Held in this City.

ADDRESSES DELIVERED

Containing Much Valuable Information for Breeders.

(Continued.)

Mr. Raynor, of Rose Hall, Ont., then addressed the meeting on feed and feeding. He said he was a farmer and was always pleased to meet with the farmers and hear what they had to say. The value of feed is three-fold—1st, its digestibility; 2nd, its composition, and 3rd, its stand point. In regard to digestion animals behave differently. Cattle and sheep are able to digest much ruffage. The clover plant is one of the most important grown by the farmers; it is looked upon as one of the greatest factors in feeding. We should seed down largely, especially with the red clover. It should be cut as it reaches full bloom, and cut early in the morning. Get it sufficiently dry, rake it up and put it in small coils and then shake it out. When saved in this manner it is as nutritious as when it is growing. When a plant has reached its blooming stage it is not advisable to leave it longer. Cut it early and have it in the barn on the same day. Put it where the hay cannot get the air underneath. Clover handled in this way is cured in its own sap. The great mass of it is of the greatest feed value. If the clover had got wet it would not have cured and would become musty. He understood that the farmers of the Maritime Provinces were mixed farmers. This being the case more nutriment would be obtained if the hay is cured in its own sap. A material change takes place when the plant is allowed to over-mature. If exposed to rain the nutriment of the plant is lost. Therefore, the feeding value of plants depends upon their digestibility. The food constituents of plants are divided into four sections, viz, water; protein: muscle, blood, milk; carbohydrates: fat, heat; fat. A great deal has been said about balanced rations and rules have been laid down by scientific men. In the human family there are different nationalities demanding different foods. We are endeavoring to feed our stock along rational lines. Foods may be so balanced as to be very expensive. Nature has been lavish to us as agriculturists. One-sixth of oats is made up of protein. Green clover and pasture grass is largely made up of water, having from 60 to 90 per cent. The more is understood about the corn plant the more popular it will become. It is not very cheap food. It contains a small amount of protein compared with clover or pasture grass. everything cannot be expected out of the corn plant. Prof. Robertson says that by giving corn the cow is filled without feeding her. It is not advisable to feed corn until it is in Ear—in its milk stage. Protein has not increased in ensilage. Timothy hay is not a first-class milk or flesh producing food. It has a comparative value of about one to fifteen per cent. From a protein standpoint one ton of clover hay is worth two tons of timothy hay. To have a fertile soil we must have nitrogen, phosphoric acid and potash. The clover plant is a collector of nitrogen. The air is four-fifths nitrogen. In the clover plant there is a microscopic organ that gathers the nitrogen from the air. The farmer who does not take care of his liquid manure is losing a lot of the nitrogen collected. There are not much protein properties in oat straw. Pea straw, cut a little on the green side, is an excellent feeding plant. The root crop, in every case, is from 80 to 90 per cent. water. Ten per cent. of solids are digestible. He believed mangels were richer than turnips. Stock will not drink so much water when fed on roots, which is a great advantage where there are no water in the buildings. The feeding of turnips is, at all times, preferable to water. A little oatmeal is helpful for young calves. Milk in its perfect state is an excellent food. Skim milk is rich in protein. Pea meal is spoken of as good for milk purposes. The value lies in its protein properties. For the young growing pig wheat middlings would balance potatoes. When fattening is desired feed, oats, pea-meal and barley, he would recommend the feeding of pea-meal alone. Buckwheat is good in its place. Mashed oats is a better feed than barley. Potatoes for feeding pigs should be cooked and mea-
