

# VIEW FROM THE TOP

THE ENGINEER'S BI-WEEKLY

In beginning our column *View From The Top*, we would like to start on a serious note.

The Engineering Society would like to send our condolences to the family of Alan Moore. In the past two years Alan was very involved in much of the writing of *The View From The Top* column. Alan was a very active participant in the Engineer's intermural and Society activities. His absence will be felt by every member of the Society.

Once again we begin a new year at the Engineering Department, situated in the Ground floor of the Duffy Building. This is where we highly intelligent humans (ENGINEERS) can be found exchanging Mathematical Methods, Mechanical Properties of Fibre Materials, and what happy hour to hit Monday thru Friday... ALL RIGHT!!!

Our famous Bi-weekly will keep the entire campus informed of our highly acclaimed successes and the Artsies high numbered, ever-so popular failures (can't they do anything right).... of course not!!!

The year started off with a very successful pub; how successful, you ask?... total sell-out at 10:10 pm. A new record. We hope and trust you had a good time and our apologies go out to those who did not get into this "Brew Swilling, Barn Storming" event; (This includes a good number of our own Society). Oh well, we can all thank those very intelligent Campus Police who did such a fine job of counting so quickly to 475. We are sure you will do it again at your own pub. Remember everybody, don't get shut out at the next pub.

Special thanks go out to the large number of Freshettes who attended our pub and social get together after. "Well girls it was good for us,...was it good

for you? (Who really cares)

Our ever so popular Society has largely increased its enrollment with the addition of 65 new, lean, mean drinking machines; willing and eager to learn the ins and outs of the Engineering Lifestyle. This increase of the freshmen class has raised the total figure to 155 ale-thirsting Engineers.

Once again, the 2nd and 3rd year classes will be hosting the Freshmen class at the 15th Annual Garden Party and Tea Social in which hors d'oeuvres and soft drinks will be provided. Following this event there will be a brief seminar at Dr. Killorns, to iron out some small wrinkles about the new course being offered; (DRY-OUT 101), which will be covered by the regular Engineering fees.

Yours Truly

Cranston Snord

It brings us great pleasure to announce that the Students of the UPEI Engineering Society will be hosting the annual "Atlantic Student Engineering Conference".

This event is sponsored each year by one of the eleven Atlantic Universities. We are expecting a very large turnout of students and professors to attend from various Universities. We have been working since last November in order to organize and raise funds for this event. More information on this in our next column.

VIEW FROM THE TOP'S QUICK LICK CAMPUS QUIZ  
#1: check: A or B

(A) Is it true Peter Ready's father is disappointed he has failed 3 consecutive years in a row, or

(B) Quite pleased he is eligible to claim young Pete for tax purposes again for the year of 83-84.

## CAMPUS QUESTIONNAIRE

It has come to our attention in the Engineering Society that the skin area covering the pre-frontal lobes of the brain of the much revered President of the School of Business has been expanding in recent years. In other words "Revell's forehead is pushing his hair back". Popular conjecture is that this chronic balding suffered by the illustrious Mr. Revell may be due directly to the fact that he has to put up with so many bonehead Business students in his daily schedule. Anyhow, we don't want to speculate on how or why this balding may have occurred what we are concerned with is that we do have this large balding area going to waste. So realizing this, our question is:

Should Prof. Revell make his forehead available for Campus Advertising. yes  
no

Check one and return to UPEI Engineering Society, Duffy Science Building. If we can get some kind of consensus on this pressing issue we can then present our poll to Prof. Revell and begin working out an arrangement for his services which would be mutually acceptable. (It may be a good site for the new Vet College...with moderate to extra parking facilities.)  
QUOTE OF THE WEEK: (By our BAIRD "The Maverick" JUDSON.)

IN FACT IN A MINUTE WE WILL TAKE A MOMENT TO DISCUSS THIS LATER.

VIEW FROM THE TOPS' GEEK OF THE WEEK J. RONALD COLLINS

Seldom heard of Business professor who never made it through N.S. Tech for that Engineering Degree he always dreamed of. (Due to Massive build-up of hemorrhoidal tissue.) Rumour hath it his highly skilled position of employment is presently being threatened by that of RASHID "O KANADA" KAHN.
