AGRICULTURE.

SAVING TREES GIRDLED BY MICE.

At the February meeting of the Northern Ill. Horticultural Society, D. B. Weir, of Lacon, read a paper "On Saving Fruit Trees." He said he had over a hundred trees, seven years planted, completely girdled by mice. There had been for some time a heavy snow on the ground; and mice being plenty and in a starving condition, with nothing else to eat, they ate all the bark from the trees so far as they reach; some of them for a foot up and down all around; and portions of the sap wood in some places half an inch deep. As soon as the damage was discovered, which was on the first thawing days, he banked the snow around the trees, and as soon as the soil thawed he banked that a foot high about the trunks.

This was all the attention they received; and to-day they have all the damaged parts covered by almost as thick a coating of bark as the uninjured portion of the trees. When the girdling is done high up in the trees, banking with soil will be impracticable. If the wounded parts are too high to reach by banking, clay may be bound on with a bandage. The sooner the surface is protected after the injury the better. The death of the tree is caused by the seasoning of the sap-wood.

DESTRUCTION OF STUMPS.—We have always objected to the use of machinery of any sort to take up large stumps in ordinary arable land, that they would take up inevitably a large quantity of earth with each, and leave a hole almost as objectionable as the stump; and moreover, that after the stumps were out there was trouble in disposing of them. The following suggestions which we take from our neighbor, the *Baltimore Weekly Leader*, may be quite practicable, while they are not liable to the same objections. They are at least worthy of trial:—

"We have heard of two methods of getting rid of stumps, which, as they appear feasible and inexpensive, we hope some readers will try and report upon. Bore with a two inch auger to the heart of a stump, fill the cavity thus made with sulphuric acid, or with crude oil of petroleum. In the first case, the acid becomes the destructive agent within a few months; in the latter, when the stump becomes saturated with the oil, it is fired, and will then burn out to the last particle like a candle."—*The American Farmer.*

GAS LIME AS A MANURE.

A correspondent of the *Scottish Farmer* gives his experience with gas lime as a manure, to this effect:

He had heard of the fertilising qualities of the article, and resolving to try it, he applied it bountifully to part of a field of potatoes, and, as we understand him, after they were up, and the result was that the potatoes were destroyed completely. He had previously applied barn-yard manure to the whole field, and that not treated to the gas lime did well. Other crops treated with it were nearly destroyed. After this he was loud in his denunciations of gas lime, and resolved never to use any more of the poisonous stuff.

But the next season he was astonished to find that the limed land produced about twice as much as that which had received none. He then concluded he had applied too much upon a growing crop, and the next fall he spread it lightly upon other lands, and after letting it lie upon the surface a few days, ploughed it in, and the good effect upon the spring crops was very apparent. But the writer seemed to have no idea why the gas lime injured his crops in one case or benefited them in the other, save that in the former case he had applied too much.

As gas lime is turned out in considerable quantities in all our large cities and towns and can be had by the surrounding farmers generally for the taking away, they should understand in what its fertilising qualities consist, and how those qualities minister to the growth of plants, as well as the dangerous properties it contains when fresh from the gas works.

CARE OF WINTER APPLES.

People who have many winter apples usually sustain heavy losses by the premature decay of the fruit, simply because they do not manage right with it. Fall apples may often be kept till winter with proper care. All kinds of fruit impart moisture constantly, until the skin has become more or less shrivelled. The fruit should be enveloped in some dry and porous substance that will quickly absorb all moisture. For this purpose winter apples may be packed in well-dried saw-dust. The saw-dust from hard wood is better than pine, and sound and clean bass-wood or maple would be the nicest. However packed, apples should be carefully picked when they are dry, without the slightest bruise, having remained on the trees as long as there is no danger from frost. In packing in saw-dust they are put in one at a time in compact layers, with an inch of saw-dust at the bottom and sufficient upon each layer to cover them, the whole being gently shaken down occasionally as the filling goes on. The advantage is, that the saw dust keeps the apples from contact with each other, excludes the air, and absorbs any moisture which may come from within or without. This plan is adapted to family use for extreme late keeping, rather than for general marketing purposes, though it would be equally useful for the latter purposes, where saw-dust could be obtained and prepared in sufficient quantities.

Another excellent plan for late keeping is to wrap up each apple in a bit of old paper and pack them in barrels or boxes. Old newspapers, torn into patches eight or ten inches square, will answer. However packed, all wormy or otherwise defective apples should be culled out. Store apples, in fall or winter, should be kept in a dry place, and as cool as is consistent with safety from frost.

ABOUT THE TEETH.

The too early loss of the first teeth has an unfavorable influence upon the beauty and duration of the second. The youngest children should accordingly be made to take care of them. All that is necessary is to brush them several times a day with a little ordinary soap, or magnesia and water. Grown people should clean their teeth at least five times in the course of twenty-four hours—on rising in the morning and going to bed at night, and after each meal. A brush as hard as can be borne without pain should be used, and the best of applications is pure soap and water, always luke-warm.

After eating, the particles of food should be carefully removed from the teeth by means of a tooth pick of quill or wood, but never of metal, and by a thread passed row and again between the teeth. Tooth powders of all kinds are injurious both to the enamel and the gums; and if employed, every particle of them should be removed from the mouth by careful rinsing. The habit, which some women have, of using a lemon, though it may whiten the teeth and give temporary firmness and color to the gums, is fatal to the enamel, as are all acids.—No one, young or old, should turn their jaws into nut crackers, and it is dangerous even for women to bite off, as they often do, the ends of the threads in sewing. It is not safe to bring very hot food or drink, especially if immediately followed by anything cold, in contact with the teeth.

Wholesome gums are more essential even than the teeth to the beauty of the mouth. They should be of a firm texture and a lively red color, and well spread over the base of each tooth, but they are often pale or livid, shrunken, fleshless, and sometimes even ulcerated. The excessive use of sugar and candies does great mischief. It is not only the bad effects of the acids produced by their composition, but the grittiness of these substances which wear away the gum, bores the roots of the tooth, and spoils the mouth. This is the chief danger of the tooth powders. Livid gums will be benefited by occasional, but not too frequent, hard rubbing and pricking with a tooth-brush until they bleed.

INK! INK! INK!

CARTER'S

COMBIND WRITING & COPYING

INK!

THIS COMBINATION INK has been awarded the HIGHEST PREMIUMS over all others in the United States and pronounced by the most celebrated Chemists the best Ink ever offered to the public.

It is used by many of the largest Commercial Houses, Banks, Railroads, and other Corporations and gives perfect satisfaction.

The Advantages of this over other Inks are:

FIRST.—It flows freely from the pen, and does thicken by exposure to the air.

SECOND.—It will give a perfect and instantaneous copy.

THIRD.—It will not mould.

FOURTH.—Being equally as good for Copying as for Book-keeping, it entirely does away with the use of two kinds of Ink.

FIFTH.—It is more permanent than common Inks.

SIXTH.—The color, when first written, is a beautiful dark green, but in a remarkably short time it changes to a BRILLIANT JET BLACK—not a brownish black.

SEVENTH.—It is admirably adapted to the most delicate writing, and ALWAYS "makes its mark."

This Ink is warranted to flow as freely as any other Writing Fluid now in use; to give as perfect a copy as any Copying Ink; and not to mould.

This ink is for Sale at

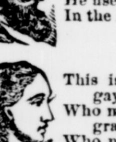
RING'S

Vegetable Ambrosia,

FOR

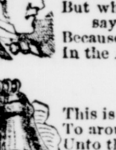
GRAY HAIR.

This is the AMBROSIA that Ring made.

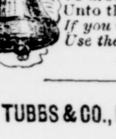


This is the Cure that lay
In the AMBROSIA that Ring made.

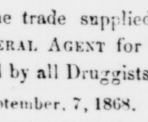
This is the Man who was bald and gray,
Who now has raven locks, they say.
He used the Cure that lay
In the AMBROSIA that Ring made.



This is the Maiden, handsome and gay,
Who married the man once bald and gray,
Who now has raven locks, they say.
He used the AMBROSIA that Ring made.



This is the Parson, who, by the way,
Married the maiden, handsome and gay,
To the man once bald and gray,
But who now has raven locks, they say,
Because he used the Cure that lay
In the AMBROSIA that Ring made.



This is the Bell that rings away
To arouse the people sad and gay
Unto this fact, which here does lay—
If you would not be bald or gray,
Use the AMBROSIA that Ring made.

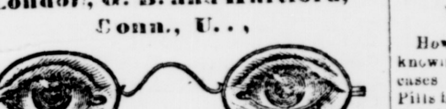
LAZARUS & MORRIS,

Practical Oculists & Opticians,

London, G. B. and Hartford, Conn., U. S.,



HAVE APPOINTED

W. R. Watson, Chemist & Druggist,

CHARLOTTETOWN,

Sole Agent for the Sale of their

CELEBRATED PERFECTED

SPECTACLES,

Which have been extensively used in Great Britain and the United States, the past eight years and for which they claim the undermentioned advantages over those in ordinary use, the proof of which may be seen in their constantly increasing business during the past eight years.

1st. THAT from the perfect construction of the lenses, they assist and preserve the sight, rendering frequent changes unnecessary.

2nd. THAT they confer a brilliancy and distinctness of vision, with an amount of ease and comfort not hitherto enjoyed by spectacle wearers.

3rd. THAT the material from which the Lenses are ground is manufactured specially for optic purposes, and is pure hard and brilliant, and not liable to become scratched.

4th. THAT the frames in which they are set, whether gold, silver or steel are of the finest quality and finish, and guaranteed perfect in every respect.

They are the only Spectacles that preserve as well as assist the sight. And are cheapest because the best, always lasting many years without change being necessary.

One of the Firm will visit Charlottetown, at the Store of their Agent every six months, for the purpose of fitting those having difficult sights, when any spectacles sold by their agent during the interval, will be exchanged free of charge if not properly fitted.

WE EMPLOY NO PEDLARS.

SIGHTS fitted by correspondence.

Sept. 28, 1868. 1y

Wool. Wool.

THE STANFIELD WOOLLEN MILLS at TRYON, having been thoroughly reconstructed and enlarged by additional Machinery and Steam Power, will continue to manufacture Cloth from custom wool as heretofore and at the usual rates. Having doubled their facilities for manufacturing, and procured skilful operatives for every department, the Company feel confident of giving their customers greater satisfaction generally, by manufacturing a better quality of Cloth and making quicker returns for wool left with them. In addition to the various kinds of Cloth previously made, they are manufacturing several new styles for men's wear and full width blanketing.

Wool, which must be clean washed, free of tails and coarse locks, and of good quality, may be left at Hon. H. J. Calbeck's, Charlottetown, or the Mill.

STANFIELD WOOLLEN CO.

Tryon May 18, 1868.

RARE CHANCE

FOR

Ship Builders or Merchants.

THE SUBSCRIBER OFFERS FOR SALE that well known FREEHOLD PROPERTY, the

Ureka House and Premises,

situate at the HEAD of ROLLO BAY, with a front of Ten chains on the Main Post Road leading from East Point to Charlottetown and Georgetown, about four miles from the flourishing village of Souris, comprising about TWELVE ACRES of LAND, with a good convenient DWELLING HOUSE thereon, having a Parlor, Sitting Room Bed Rooms for Seven beds, Kitchen, Wash House and a never-failing Pump of Water at the door.

Also, a NEW STORE fitted up for a Shop and Bar Room, with Offices attached; a large room above with Two convenient Bed Rooms petitioned off. The whole finished complete and in good repair. There are attached to the Shop a Waggon House and Shed for feeding travelling horses in a splendid grove of trees sheltered from winds and storms. Stables for horses, Cow Houses &c., likewise a Granery capable of containing 10,000 bushels of Oats. Meat and Salt House, with Sail Loft above and two other Houses for lumber, or can be rented as tenements all situate on the aforesaid Road side. The Post Office is kept there, and the Charlottetown Mail passes two and fro twice each week. On the Shore, fronting Rollo Bay, is a site for Ship Building, where a number of splendid vessels have been built, with Blacksmith's Forge a large and convenient building for working in, with a Mould Loft above, Saw Pit and other requisites for carrying on an extensive building business, with a lot of plank and timber in the yard, well piled and free from decay. A splendid Spring of Water at the bank—in fact the whole premises are surrounded with all the requisites for carrying on an extensive Mercantile trade or Public Hotel, well worthy the notice of persons intending to enter into Trade or Ship Building with a small capital. The whole will be disposed of by Private Sale, with a good and sufficient title.

Any further particulars respecting the above Property and title may be had on application to W. R WATSON Esq. Druggist, Charlottetown or the Subscriber on the Premises.

TINWARE,

he offers at Low Prices.

GEORGE W. MILLNER.

THE ROAD TO HEATH

AND LONG LIFE

SECURED BY

HOLLOWAY'S PILLS.

Impurities of the Blood.

In selecting the most appropriate medicine for a particular ailment, there may be some difficulty unless one can be found to purify, regulate, and improve the quality of the blood. These Pills possess and exert these three qualifications in an extraordinary degree. They enable the stomach to digest any ordinary food, increase the secretory powers of the liver, cleanse and purify the blood, expel all morbid matter, and throw into the circulation the purest elements for sustaining and repairing the frame.

Weakness and Debility.

How many persons suffer from debility without knowing the causes why they are feeble! In many cases the stomach is the aggressor. Holloway's Pills have long been famed for regulating a disordered stomach, and restoring its healthy digestive tone; they are, therefore, confidently recommended as a never failing remedy in all cases where the constitution, from any cause, has become impaired or weakened.

Disease of the Head and Heart

These formidable diseases are, unfortunately, frequent occurrence; for the most part they creep on gradually, but may be prevented by proper precautions. Holloway's Pills are the surest preservatives against all derangements of the brain, and are the speediest correctors of irregular circulation. If they be taken without delay, when tingling in the limbs, drowsiness, or giddiness comes on, the effect will be marvellous.

Females of all Ages & Classes

The fame of these Pills is partly based upon the beneficial effects they have upon the constitutions of females. From the domestic servant to the peeress universal favor is accorded to them for their invigorating and purifying properties, which render them so safe and invaluable in all disorders peculiar to the sex. Obstructions of every kind, either in young persons entering into womanhood or approaching the turn of life—the most critical period—may be radically removed by a recourse to these Pills.

All Disorders affecting the Liver, Stomach and Bowels

Whenever the stomach, liver, or bowels are disordered by high living, climate, over-indulgence, undue exertion or other causes, these fine regulating Pills will soon rectify the evil, and speedily bring back energy, strength and cheerfulness to the frame where previously all was lassitude, gloom and dejection.

Despondency, Low Spirits.

The misery occasioned by a disordered digestion is, unfortunately, felt by most. These famous Pills should be taken in appropriate doses to adjust the disturbed functions. They dispel headache, biliousness, nausea, lowness of spirits, and all similar ailments. A course of these invaluable purifying Pills never fails in removing the cause of such morbid affections, without subjecting the sufferer to any inconvenience.

Influenza, Diptheria, Bronchitis Coughs and Colds.

In our changeable climate few persons escape without colds, sore throats, influenza, diptheria, or bronchitis, for all of which these famous corrective Pills may be taken with the certainty of effecting a cure. While the Pills are expelling all impurities from the body generally, Holloway's Ointment should be well rubbed upon the chest and throat, it will penetrate the skin, reduce inflammation, and restore lasting soundness.

Holloway's Pills are the best Remedy known in the world for the following diseases:

Ague	Female Irregularities	Scrofula, or King's Evil
Asthma	Fevers of all kinds	Sore Throats
Bilious Complaints	Fits	Stone & Gravel
