CONTRVERSIAL PAINTING

This painting, entitled "Almost Lady Bird" has opened a controversy in Augusta, Ga. The title was removed from the picture by Augusta librarian Miss Jean Cochran because "there were too many political implications."

The Johnston's tenant houses in the town of Augusta, Ga. are being painted in the colors of the American flag. The painting is the work of artist, Mrs. Betty Groover, a North Augusta, S.C. school teacher.

She said, "I was making a statement that Mrs. Lyndon Johnston's tenant houses in the town of Augusta, Ga. are being painted in the colors of the American flag. The painting is the work of artist, Mrs. Betty Groover, a North Augusta, S.C. school teacher."

Quebec China Pottery Firm Planning To Increase Sales

By MICHAEL BLAIR MONTREAL (CP) - Canada's only commercial china pottery has started a cross-country sales drive, pitting the Quebec product against world pottery.

Vandesa Pottery Ltd. was started at Joliette in 1947 and until an infusion of U.S. capital in 1959 produced an economy line of restaurant china.

Since its takeover by the U.S. Syracuse China Corporation, the company has grown and now is the giant of the small Canadian pottery industry with sales of approximately \$1,500,000 last year, and even as the largest only employs 100 craftsmen.

"From an economy line we have switched to high-quality products for commercial institutions, which will compete with the world's best," says Kurt Baier of Joliette, one of the original partners in Vandesa-Syracuse Ltd.

Mining Outlook Said Favorable

TORONTO (CP) - Canada's mining industry enters 1965 with favorable growth prospects but research will play a large role in its development, the Canadian Imperial Bank of Commerce says in a newsletter.

The letter says development of new uses for minerals offers the greatest opportunity for spectacular progress. While United States policies on tariffs, quotas and stockpiles would affect Canadian mining, substantial levels of world consumption for the products of the mining industry were in prospect.

Favorable factors included rising living standards in Europe, economic development of emerging countries and an expanding North American population. The letter says Canada is the world's leading iron ore exporter, but Canadian steel companies import more than 60 per cent of their requirements.

This would be changed by 1970, with Canadian mines supplying the entire domestic market. A special general meeting to be held in Montreal on Feb. 18th, just prior to the annual general meeting, the shareholders will be asked to approve the subdivision of the \$5 per share into five shares of \$1 per share each and an increase in share capital from \$2,500,000 to \$5,000,000.

FOOD BULLETIN Gives Forecast For February

OTTAWA (CP) - The cost of lower grades of beef is expected to decrease slightly in February, the federal agriculture department predicts in its monthly food bulletin.

Cattle slaughter and beef supplies will be slightly lower compared with January but total output will remain considerably above last year. Prices are expected to increase slightly for good and choice grades of beef.

Here are the department's other predictions about food availability and prices this month: Eggs: Egg production should fall off seasonally during February. This coupled with increased demand for hatching eggs is expected to cause an increase in prices from the present low levels.

Broilers: Adequate supplies of broilers are available to meet demand in February and prices are expected to remain near present levels. Creamery butter: Production of creamery butter will be higher in February than a year ago and supplies are generous.

Apples: Although stocks are considerably lower in all regions of Canada with the exception of western Ontario, supplies are expected to be adequate to meet demand in February and prices are expected to remain near present levels.
