

THE DAILY EXAMINER.

AUGUST 28, 1886.

Editorial Notes.

Compared with last year, the traffic returns on the Canadian Pacific Railway show an increase of fifteen per cent. during the month of July.

During the past year 4,000 foreigners have been naturalized in Prussia. Thirty-eight thousand seven hundred and eighty-eight Prussians emigrated during the same period, however.

The Porte has ordered that a universal Mussulman conscription be proceeded with, and that the reserves be summoned for immediate service. Occupation of the frontiers of Macedonia and Roumelia has also been ordered.

We learn that efforts are being made in Montreal to arrange for a united convention of the educationists of Canada and the United States in that city next July, with the object of establishing an educational institution under whose auspices international conventions will be held.

Advices from Tamatave say French influence in Madagascar is meeting with serious obstacles. Public opinion there is absorbed in the conclusion of a treaty giving an English company the right of collecting customs, working mines and coining money in consideration of a loan of \$800,000.

A London despatch says that at the usual weekly meeting of the Executive Council of the Socialist League, the following resolution was adopted: "That the Council expresses its abhorrence of the cowardly conduct of the Government of Illinois in passing a sentence for murder against men who have proved their sympathy with the suffering masses."

People living on this side of the globe have little conception of the magnitude or importance of the Indian railway systems. Recent returns show that capital to the amount of £161,917,840 have been invested in railway enterprises, of which sum the government have spent directly £82,255,391. During last year these railways carried 80,864,779 passengers and collected £5,538,126 for their fares. 18,925,383 tons of freight were transported over the railroads, the receipts from which amounted to £11,915,375.

Russian advices are to the effect that the Journal de St. Petersburg says that it hopes that the politicians of Bulgaria and Roumelia will have the wisdom to understand that the destinies of both nations depend upon the behaviour of the people. The Powers with whom rests the decision of their destinies, adds the Journal, desires above all things that the peace and good will of these Powers should be secured. Politicians should abstain from agitation and not attempt to hamper their good intentions. The Russian press do not generally believe that any of the other Powers will interfere with Russia's direct pacification of Bulgaria.

Commenting on some remarks in the Liverpool Journal of Commerce on the route to the East over British territory opened up by our Pacific Railway, the Miner says that it is only by comparison with a not very distant past that the great advantages of the transcontinental line can be realized. Not long since, as the Liverpool journal points out, a lecturer undertook to indicate some of the benefits that Canada derived from the somewhat protracted reign of King Frost. A single horse, it was pointed out, could make more progress over a winter route than two horses on an ordinary carriage road. We have that benefit still and it is not unworthy of mention. But even on a winter road, what tedious and often painful days of travel lay between the scattered habitations of the Northwest of fifteen years ago! Who could then have dreamed of accomplishing a journey from the Atlantic to the Pacific in a few days, amid all the comforts and amenities of modern civilization!

The Montreal Gazette says that M. Lucien Napoleon Bonaparte Wyse, who is at present in Ottawa on important business, is a man no less distinguished by his birth than remarkable by his career. The grand-nephew of Napoleon the First, by the marriage of his mother, the Princess Letitia, to Sir Thomas Wyse, he was born at Paris on the 13th of January, 1845. Having received his training at the Brest Naval Academy, he took part in several expeditions to American waters chiefly. He shared in the war of 1870-71. In 1875 he received the decoration of the Legion of Honor. In the scheme of a Panama canal he was one of the first to interest himself, and it was his survey which led finally to the undertaking of the work. He explored on foot the well nigh impenetrable and fever-laden swampy jungles of the Isthmus region. In 1878 he obtained the famous concession from the United States of Columbia, of which he has also the exceptional honor of being a naturalized citizen. His reports on the whole subject, with maps, diagrams, etc., have proved of the utmost value in the carrying on of M. de Lesseps' gigantic enterprise. M. Bonaparte Wyse is a man of science, and has obtained testimonials of his worth as such from numerous learned societies, both French and foreign.

Liberal-Conservative Meeting.

Pursuant to notice, a large and influential meeting of delegates from every Polling Division in the Second Electoral District of King's County, for the Legislative Council, was held at the Town Hall, Georgetown, on the 24th inst., at 4 o'clock, p. m., for the purpose of choosing a fit and proper person to represent us in the Legislative Council at the forthcoming election.

The meeting was organized by calling the Honorable D. Gordon, President of the Association, to the chair, and appointing the undersigned Secretary. The Hon. President then explained the nature of the meeting, and called the roll of delegates, which amounted to about ninety, the largest and the most orderly meeting of the kind ever held in King's County, which indicates the growth and strength of the Liberal-Conservatives in this Electoral District.

Mr. Annear was first called upon to give an account of his stewardship, which he did briefly and explicitly, stating the action he had taken to abolish the Legislative Council. George F. Owen, Esq., made an able speech in favor of the abolition of the Council. Messrs. Munn and Edmunds also spoke extensively in favor of abolition.

Hon. W. W. Sullivan being present, delivered a brief telling speech on the policy of the Government and the abolition of the Legislative Council, which was well appreciated by the audience.

There were seven candidates nominated, viz: Thomas Annear, Esq., Montague River; George F. Owen, Esq., Cardigan Bridge; Dugald Munn, Esq., New Perth; John McDougall, Esq., Dundas; Peter E. Edmonds, Esq., Somerville; Alexander Martin, Esq., Valleyfield; James E. McDonald, Esq., Cardigan Bridge.

All the above named candidates were balloted for, and at the closing of the last ballot our esteemed friend, Geo. F. Owen, Esq., was the chosen candidate by a considerable majority. Then one of the best meetings ever held in that hall came to a close by tendering a vote of thanks to the Hon. President for the able manner in which he had presided over the meeting.

JOHN M. CAMERON, Secretary. Dundas, Aug. 25, 1886.

Boston Markets.

BOSTON, Aug. 25.

EGGS.—There is a little firmer feeling, with more inquiry for strictly fresh stock, but prices are unchanged. It is still hard to get over 17½ for best Eastern. Northern and Provincial firsts rule at 15 to 15½, and 15½, is an outside price for P. E. Island. Canadian slow at 14 to 15, and Western at 13 to 14, per dozen.

FISH.—There were two arrivals at Gloucester on Monday from the North Bay, one with 350 barrels and the other with 360 barrels mackerel, the first receipts for over a week, and both were quickly disposed of at \$9.75 per bbl, sea packed, an advance of \$3.25 per bbl. over previous sales. Several small lots received here on Monday by steamer from Halifax and Prince Edward Island have also been sold at a material advance. These sales have entirely unsettled the market and no regular quotations can be given for inspected lots of mackerel. There is now every indication that mackerel will be very scarce this season and dealers are anxious to secure supplies. Consignments from the Provinces will find a ready sale.

The steamer Novelty arrived on Monday with 80,000 fresh mackerel and 80 bbls. sea packed. The fresh fish were sold at \$7 per 100.

POTATOES.—Receipts have increased at the railroads, and prices are easier. Sales of New York at 50 to 55c., and New Hampshire at 60 to 65c. per bushel. Best natives are selling at \$2.50 to \$3 per bushel.

A Dangerous Character.

The most peaceable and dangerous man in all the United States lives in Murray Co., Ga. He is kind-hearted, good-tempered, never had a quarrel in his life, wouldn't hurt a fly, yet everybody is afraid of him. About a year ago he was cutting wood, when the axe flew off the handle and killed a man who had come to pay him \$50. He never got a cent of the money. The next week, while ferrying a friend across the river, he ran the boat against a snag and his friend was drowned. About a month later he felled a tree on top of a stranger who was lying asleep in the woods, killing him instantly. Not long after he shot at a wild turkey and killed a neighbor whom he didn't see at all. Three weeks later he lighted a kerosene lamp, when it suddenly exploded, burning to death a colporteur to whom the inoffensive Georgian had courteously extended the hospitality of his home. All this man's friends run when they see him coming. He would be afraid to extend any kindness save to his enemies, if he had any. His last public act was to cross the street with a ladder on his shoulder last Fourth of July, while the procession was passing, and when somebody shouted to him to "hurry on," he obligingly turned around and started back. The procession was laid out, and the day was spoiled.

THE New England Fair will take place at Bangor, Me., commencing on Tuesday, August 31, and ending Friday, September 3rd. We are pleased to observe that the railway authorities, fully alive to the benefit to be derived by farmers and others from attending exhibitions of this kind, have decided to issue tickets at very much reduced rates. For the three days, 28th, 30th, and 31st, August, tickets via the Intercolonial Railway from Point du Chene to Bangor and return will be issued at \$7.50, and in connection therewith the P. E. I. P. R. on the 30th and 31st August, will grant tickets to Summerside and return at one fare. Many of the people will doubtless avail themselves of this opportunity of seeing "how they do things in the States."

"It knocks the spots," and everything in the nature of eruptions, blotches, pimples, ulcers, scrofulous humors, and incipient consumption, which is nothing more or less than scrofula of the lungs, completely out of the system. It stimulates and invigorates the liver, tones up the stomach, regulates the bowels, purifies the blood, and builds up the weak places of the body. It is a purely vegetable compound, and will do more than is claimed for it. We refer to Dr. Pierce's Golden Medical Discovery.

BANKRUPT STOCK.—A lot of Laddie's Rubber Circles for 99 cents, worth \$1.25, at J. B. Macdonald's.

WHAT THE WIRES TELL US.

The Rev. Henry Ward Beecher is ill. Editor Cutting has been released, and has returned to Texas.

A colored man, 103 years of age, died at Syracuse, N. Y., a few days ago.

Mrs. Nellie O'Connor, of Louisville, Ky., is but 30 years old, yet she has had six men to the altar.

About a hundred persons, half of whom are ladies, visit the imprisoned Chicago Anarchists daily.

Powderly denounces the rioting and violence carried on in the name of the Knights of Labor.

A large number of Russians in Campbell and McPherson Counties, Dakota, are said to be in a destitute condition.

A young woman near Ashton, D. T., works her farm herself, and has 75 acres of wheat and 15 acres of oats. She owns three horses and never hires help.

Capt. David Buskirk, the largest man in Indiana, died at his home near Bloomington last Thursday. He was seven feet tall in his stockings and weighed 400 pounds.

The craze for descending waterfalls in barrels has struck Ottawa. A young man there promises to go over the Chaudiere Falls in a barrel on Monday next—if any one will give him \$100 for doing so.

Mr. James McCullough, of Stonewall, Man., changed his sleeping apartment the other evening, and that night lightning struck the vacated bed, passed out of the room, and broke the stove in the kitchen.

The Newfoundland correspondent of the Montreal Gazette says that the fishermen down there, on the shores of both the Island and Labrador have been fairly successful, all stories to the contrary notwithstanding.

John Irvine, who is employed in the Ontario Cotton Mills Company's engine room, Hamilton, Ont., was badly injured a few days ago by the bursting of a steam-valve, and it is probable that he will lose the sight of both eyes.

The Tageblatt says the Russian Ministers of War and Marine have been summoned to St. Petersburg. The Black Sea fleet has been ordered to be in readiness for a cruise. Several Russian steamship companies have been ordered to equip troop transports.

Bears are reported to be plentiful and very bold in the woods along the upper Ottawa, and quite frequently make their appearance at the farm houses in the district. Each week for some time past the residents and lumberers are reported to have killed several.

Rev. Jas. C. Beecher, of Coscob, Conn., a brother of Henry Ward Beecher, committed suicide at Elmira, N. Y., a few nights ago, by shooting himself through the head with a small rifle. He had been suffering under severe mental troubles for a number of years, and for a time was under treatment at the Middleton Asylum in that State.

A 16-year old Montreal boy was left in charge of his father's establishment during the latter's absence from the city. The lad squandered away \$1400 of his father's money. When his father returned he could not give satisfactory reasons for so doing, and he fled to the States, where his father has gone in search of him to bring him home.

The trial at Newfoundland of Carlos Zozuarrigui, for the murder of Stanislaus Coste, by treacherously hacking off his head, concluded on the 23rd, when the assassin was sentenced to death. A few years before the perpetration of this terrible crime, the assassin was seeking about the town for suitable nails to crucify his mother.

The clothing of a mill hand in Three Rivers, Ont., was caught into a revolving shaft and he was carried around with it until every particle of clothing was torn off his body, and then dropped to the floor, a distance of ten feet or so. Although the space between the beams where the shaft revolved was only about 2½ feet wide, he escaped almost unhurt.

A citizen of Waco, Tex., had a remarkable experience one day recently. He went to visit his mother, who is nearly 60 years old, in a neighboring town, but found she had eloped with a man half her age. On his return home he was met by the startling information that his own wife had "gone with a handsomer man." He has now sold out and started to Utah.

The latest advices from Japan state that the rioting between the Chinese and Japanese at Nagasaki was caused by a fight between eighteen Chinese sailors and the Japanese police. It was a case of simple disorderly conduct on the part of the sailors, and an attempt to suppress it by police, without any admixture of politics whatever. Eight men were killed and 300 wounded, most of the injured being Chinese. The Chinese were considered the aggressors. The strictest inquiry has been ordered into the cause of the riots.

Albert Fier, employed in a St. Thomas, Ont., mill, got his coat caught in the gearing, which quickly stripped the clothing from his body, inflicting terrible wounds from his shoulder to his hip, and drawing his head under the wheel of a conveyer above. The cogs of the conveyer gearing tore the scalp from his head, from the neck to the crown. A spout prevented his leg from being caught in the gearing. The band on his trousers parted from the garment and he succeeded by a great effort in extricating himself. There are hopes of his recovery.

The committee appointed by the French Academy of Medicine to make an investigation and report on the danger to the well-being of the population from the increased use of alcohol, have adopted a series of resolutions on the subject. The government are requested to take the most stringent measures to prevent the entry into France of artificially alcoholized wines. It is also asked that the number of taverns and wine shops shall be largely reduced, and that the laws for the repression of drunkenness shall be strictly enforced.

CHOICE FRUIT.—Bartlett Pears, California Plums, Gravenstein Apples, Bananas, Oranges, etc., selling low. Store open this evening until 9.30. Electric Light, Gas, Carter & Co., Market Square.
