WANTED — ALE BOTTLES. Pints or quarts. Dial 8695. Michael Bros.

Work Wanted

GIRL WANTS WORK BY DAY—Phone 9705.

Seeks Industry For Owen Sound

OWEN SOUND, Ont., (CP) — Mayor E. C. Sargent of this Georgian bay city of 17,500 has come up with a scheme he hopes will attract industry here.

The mayor has sent out 50 brochures offering industrial land for sale. Sale price of "good clay sites" is $1. And the $1 is pasted to the front of the brochure.

Mayor Sargent said he hopes the stunt will pay off and provide residents with jobs.

The brochure says Owen Sound is particularly suited for heavy industry. The land offered is fully-serviced, including rail transportation.

There is access to the Great Lakes and the St. Lawrence seaway system and the city has an excellent labor supply, good living conditions with no housing shortage.

MUST ASSUME RISK

TORONTO (CP) — The Toronto Transit Commission Monday announced it will continue to provide free rides for blind persons and war amputees but such persons must assume the risk in case of injuries.

VILLAGE OF SPRING PARK

The Annual Meeting of the ratepayers of the Village of Spring Park will be held in Spring Park Community Hall, Tuesday, February 1st, at 7:30 P.M.

Cheese: Ontario, white 30, colored 30¼, f. o. b. factory; Quebec white 29¼, colored 30; f. o. b. Montreal wholesale Quebec white 30¼; colored 31. Receipts: Nil.

No. 1 potatoes: P. E. I. 75s 2.25-2.35; N. B. new white 75s 2.00; N. B. 50s 1.30-1.35; N. B. 10s .30-.32; Maine 50s 1.30-1.35.

N. Y. Stocks

NEW YORK (AP)—Exceptional strength in many key issues, especially in steels and aircrafts, Monday pushed the stock market close to an all-time high level.

Steels and aircrafts were in brisk demand right from the first, and other divisions joined in the rise, especially airlines, oils and selected issues in the rubbers, chemicals, motors, utilities, railroads and radio-televisions.

Some issues shot ahead between five and seven points, and there were frequent gainers of one to around three points. Losses were scattered.

The Associated Press average of 60 stocks was up $1.10 at $156.60, a high for the year topping the previous high of Jan. 3 by 20 cents.

The rise of $1.10 at $156.60 in The Associated Press average of 60 stocks was mainly due to a rise of $2 at a high of $216.20 in the industrial component. The railroads were up 40 cents and utilities ahead 60 cents.

Volume on the rise came to 3,500,000 shares.

Canadian issues were mixed. McIntyre added ¾ and Distillers Seagram advanced ⅛. Hiram Walker and Canadian Pacific both slipped ¼ and Dome Mines fell ⅛.

On the American stock exchange Royalite Oil, a Canadian issue, was up ⅜. Lake Shore and Giant Yellowknife, also Canadian issues, both remained unchanged.

Montreal Stocks

MONTREAL, (CP)— The stock market was irregularly stronger at the close of active trading Monday.

General Dynamics reached the 100 mark with a 5 point gain. Aluminium and Canada Cement each advanced 2 points while Imperial Oil and St. Lawrence were each 1½ higher. International Paper was up 1 and Abitibi up ⅛.

McColl lost a point and Bathurst A moved off ¾ at 59¾.

Miscellaneous industrials, papers, utilities, beverages, senior metals and senior oils improved while steels were a shade easier. There was little movement in the carriers and banks.

Falconbridge advanced $1 and Consolidated Denison was up 23 cents in an irregularly firmer mine section. Lake Dufault increased 32 cents. Calvan was up 15 cents and Scurry improved 13 cents in a mixed western oils section.

Toronto Stocks

TORONTO, (CP)— The stock market climbed modestly from Monday's opening, then shot ahead for some spanking gains in the final hour.

Hudson Bay and International Nickel gained major fractions to lead base metals higher. Golds featured Preston with a 50-cent climb to $6.40 and McIntyre up $2.50 to $72.

Some uraniums moved well ahead after sharp losses last week. Algom jumped $1.25 to $14.75, Lorado 30 cents to $3.50 and Pronto 30 to $5.80. Consolidated Denison, Rayrock, Radiore and a long list of others were also strong. Gunnar closed at $13.25 but the stock's warrants dropped 20 cents to $5.55.

Among other lower-priced mines Beaucage, Maritimes and Bathurst were strong.

Several western oils continued Friday's sharp advances in morning trade but profit-taking set in later and the group ended mixed.

Weston Buys Bakery Concern

LONDON (Reuters) — The Aerated Bread Company, owners of a chain of 160 tea shops and restaurants throughout Britain, Monday decided to sell out for some £2,900,000 to W. Garfield Weston, Toronto-born millionaire.

The company recommended that stockholders accept an offer of 45 shillings for each of the company's 1,282,000 ordinary £1 shares. The offer was made by Allied Bakeries, a huge wholesale company which Weston controls.

Weston last week offered to buy Meredith and Drew, an old-established British biscuit firm, for £1,000,000.

Job-Seekers Cause Jam At Ford Plant

OAKVILLE, Ont. (CP) — Job-seekers outside the Ford of Canada assembly plant Monday created a traffic jam.

Some came in automobiles, others by hitchhiking, after it was reported jobs were available as a result of the reopening of the plant after the strike.

At noon 1,000 men were waiting outside the plant. Police said hundreds of others left after getting a look at the long queues.

BIG INLET

Hamilton inlet on the coast of Labrador is 150 miles long with average breadth of 14 miles.

Whale Supply Brings Mink Ranches To Newfoundland

By STEWART MacLEOD

ST. JOHN'S Nfld. (CP) —Unless the pothead whale quits Newfoundland, the province appears on the verge of becoming a mink rancher's dream.

And there is little doubt about the future of the whales. Thousands of them have been dying on the beaches of Newfoundland for centuries.

Mink ranchers can have them cut up and ready to serve for about two cents a pound. Because of this and the gradual price increase of inland mink food, ranchers are moving here with everything they own — including their mink.

Premier Joseph Smallwood of Newfoundland, who personally invited ranchers to move here, refuses to say how many are coming but has closed the invitation until the ones moving here "have been digested."

DILDO IS WHALE CENTRE

Earl Maxhan of Vermont moved his valuable breeders by boat from a Gloucester, Mass. ranch to Dildo on Trinity bay, where William Dawe of British Columbia had already established his new ranch. Others are expected to move into the area where whales go aground in great numbers.

Fishermen in the area, who have talked over plans with some ranchers, expect to sell some 3,000,000 pounds of whale meat a year to mink men. They think about 10 ranches will be established this year with between 25,000 and 30,000 animals.

Premier Smallwood says only that the number of animals will be in the "tens of thousands."

WHALES HERDED ASHORE

Fishermen, who kill whales for bait and oil, trap the big underwater mammals by circling them in small boats and driving them close to shore where they eventually run aground and die on the beaches.

Then it's only a matter of chopping them up. The meat can be hauled to nearby ranches by truck.

This food is believed to be about nine or 10 cents a pound cheaper than average inland food prices. In any case, the difference was great enough to lure Dawe all the way from British Columbia with 740 animals.

Premier Smallwood has called for a meeting of all mink ranchers for organizing a mink breeders co-operative association. Because he is starting his own ranch, on a farm operated by his son-in-law, the premier will probably become a member.

Hopeful China Will Agree To Formosan Cease Fire

By JOHN M. HIGHTOWER

WASHINGTON (AP)—President Eisenhower and State Secretary Dulles were reported Sunday to be hopeful that in the long run Communist China will agree to end the fighting in Formosa strait.

They apparently are prepared to engage in extensive bargaining, involving disposition of the Chinese coastal islands, provided there is evidence of good faith and peaceful intention on the part of the Red Chinese.

The Quemoy and Matsu island groups will almost certainly become key items in whatever bargaining does develop. In the end, the United States would be prepared to see Chinese Nationalist troops withdraw from those positions if that was part of a settlement affording a solid basis for permanent peace in the Formosa area. Such an arrangement would have to leave Generalissimo Chiang Kai-shek in possession of Formosa and the Pescadores islands.

CHOICE OF ALTERNATIVES

In effect, the Eisenhower-Dulles strategy has confronted Communist China with this choice of alternatives: The Chinese Reds can try to take the coastal islands and eventually Formosa itself at an enormous cost in casualties and at grave risk of setting off a third world war; or they can try to win the coastal islands by peaceful bargaining in which they would have to give up their claim on Formosa.

The peace hopes of American officials are not upset by angry but familiar propaganda blasts from either Peiping or Moscow. Nor will they be upset if progress is extremely slow, with only minor gains to show for months of negotiating effort.

ONE OF MANY STEPS

Today's cease-fire move in the UN Security Council is not expected to be a decisive step in itself. It is regarded here as simply one in a long succession of events.

Even if the Chinese Reds order heavy attacks on Nationalist positions and there is some involvement of U.S. military forces in the Formosa straits, the present temper of the government is to try to prevent the reaction to a clash from involving the United States further in conflicts with Red China. High officials say the president is determined to use his newly-confirmed power of action to get peace rather than war.

Asbestos Industry Spend Millions On Dust Control

THETFORD MINES, Que. (CP) —The asbestos country has its own brand of "smog", and has waged a seven-year war against the menace.

All you have to do to get rid of smog is spend a few million dollars and be surrounded by wide open spaces, says Maurice Lachance, dust control engineer in the asbestos district.

The industry says Lachance has participated in the spending of millions of dollars and reduced the dust count by 50 per cent.

Asbestos companies currently are spending some $4,000,000 on the dust program and estimate that by next year asbestos dust should have "almost completely disappeared."

HEALTH HAZARD

Long before smog made sensational headlines in such places as London and San Francisco, people were frightened by airborne dust in towns like Asbestos, Thetford Mines and Black Lake, said Mr. Lachance.

"Today, it is the big cities like Montreal and Toronto and hundreds of smaller industrial centres that are worried about air contamination," he added.

"Compared to most city-dwellers in Canada, the Asbestonian breathes fresh, clean air.

"In all industrial centres, air contamination is a health hazard. In certain cities the gathering of poisonous gas fumes, smoke and dust particles is frightening. In the asbestos belt we are fortunate in having only dust to cope with. There are no smelters here, and wide open spaces we live in make the job that much easier.

"During the last seven years we have succeeded in decreasing the dust count by 50 per cent in these localized areas. During the next year or so, with all the new machinery, modern ventilation and scientific equipment being put into use, dust control should be even more effective."

Production of Coal Declines

OTTAWA (CP)—Coal production declined almost seven per cent during 1954 to 14,843,000 tons from 15,901,000 the previous year.

The bureau of statistics reported Monday production increased in Nova Scotia to 5,825,000 tons from 5,787,000, in New Brunswick to 760,000 tons from 721,000 and in Saskatchewan to 2,113,000 tons from 2,021,000. However, it declined in Alberta to 4,850,000 tons from 5,917,000 and in British Columbia and the Yukon to 1,295,000 tons from 1,454,000.

The number of mines operating dropped to 241 from 268, the number of employees to 19,485 from 21,753, and their earnings to $59,350,000 from $66,028,000.

Coal imports dipped 13 per cent to 18,533,000 tons from 22,522,000 tons in 1953.

Urges Canada Return To The Gold Standard

TORONTO, (CP)— Courtland Elliott, retiring president of the Toronto Board of Trade, suggested Monday that Canada "return to the gold standard," in order to avoid fluctuations in the value of her dollar.

Addressing the board's annual meeting, Mr. Elliott proposed that Canada declare willingness "to buy or sell gold in unlimited quantities at a fixed price, as is done in the United States, and accompany the declaration by appropriate monetary action to control, if necessary, the financial consequences."

This, he suggested, would give the Canadian dollar foreign-exchange stability with other fixed currencies as long as Canada remained on the gold standard.

Because the Canadian dollar now was quoted at a premium Mr. Elliott thought there was not the same risk as when Canada returned to the gold standard in 1926, when her dollar was at a discount.

If she took the step now, her monetary reserves of gold would surely rise as long as recent conditions continued.

Mr. Elliott said the Canadian dollar's current premium of around 3½ per cent to the American dollar, while a symbol of at least transient strength in the Canadian economy, imposed a penalty on Canadians selling in foreign markets and provided a bonus for those who bought abroad.

Massachusetts May Ban Frozen Lobster Meat

BOSTON, (AP)—A bill aimed to ban the importation of frozen lobster meat is on file for consideration by the Massachusetts legislature.

Under the measure, only lobster or crab meat which has been hermetically sealed as processed for stews, newburgs, or chowders, may be brought into the state.

Lobster or crab meat not opened in licensed establishments could not be sold in Massachusetts, under the bill.

The measure is sponsored by the South Shore Lobstermen's Association, a co-operative of 85 lobstermen. A legislative committee on conservation hearing on the bill has not been set.

The association also filed bills to increase the fee for lobster licences from the present $5 a year to $25 and to set minimum and maximum limits on lobster catches.

The proposed limitations would restrict lobstermen to taking lobsters between 3 3-16 inches and five inches in the shell length. The present law only specifies minimum size.

Ask Federal Aid In Flood Control

OTTAWA (CP) — The federal government was asked Monday for a $5,300,000 contribution toward flood control and conservation program in the vast Humber Valley to prevent recurrence of such disasters as the flood that followed hurricane Hazel last fall.

The request was made to Resources Minister Lesage by an eight-man delegation which presented a brief on behalf of the Humber Valley Conservation Authority, representing 15 municipalities in the Toronto area.

A spokesman for the delegation said the municipalities are ready to put up 25 per cent of the cost and the Ontario government 37½ per cent if the federal government will match the provincial contribution.

The delegation won from Mr. Lesage a promise that "We will certainly study this just as fast as we can."

The scheme would cost an estimated $14,700,000 for five dams and a short diversion channel which engineers believe would prevent the recurrence of floods. The flood which roared down the valley last fall took 62 lives and did vast property damage in the wake of hurricane Hazel.

OLD TERRITORY

British Guiana, British colony in South America, was first partly settled by the Dutch in 1620.
